Northrop Yb-49 Flying Wing Pilot's Flight Manual Film Com Periscope Film Com,Periscope Film.Com Staff,2006-04-04 Visionary designer Jack Northrop built a series of experimental flying wing aircraft both before and during WWII One of the most radical designs of the post war era the propeller driven YB 35 bomber s all wing design minimized drag and promised maximum payload capacity and terrific endurance The YB 49 a turbojet powered variant built on the YB 35 airframe forever altered aviation history and inspired the design of the B 2 Spirit stealth bomber Originally printed by Northrop Aircraft in 1948 the YB 49 Flying Wing Pilot s Flight Operating Manual taught pilots everything they needed to know before entering the cockpit Originally classified Restricted the manual was declassified long ago and is here reprinted in book form This affordable facsimile has been reformatted and color images appear as black and white Care has been taken however to preserve the integrity of the text **Glider Flight Instructor Manual** Francesco Daniele Padovano,2022-09-16 For decades and in the interests of greater flight safety Competence criteria have been introduced in professional training The results obtained in professional aviation are indisputable and the proposed new paradigm aims to increase the pilot s ability to resolve in particular unfamiliar situations There is no doubt that during soaring the conditions faced are as a general rule highly variable which requires the pilot to be highly adaptable However even though this flying technique is the one that requires the most resilience there is no single criterion in the development of training that would lead the future pilot to develop the necessary skills nor is there a single evaluation criterion that would determine a common standard From my experience in professional teaching in organisations such as CAE the experience as an EASA inspector and my own experience as a gliding instructor I wanted to propose a new way of teaching and above all of assessing a future glider pilot with COMPETENCE criteria in which the elements of CRM and TEM are always present together with the application of KSA

In this text I hope that gliding instructors will find a tool for teaching their classes and a greater standardisation as a guide to develop their own Competence Based Training and assessment adapted at the local conditions and gliders The future is not white or black but an infinite scale of greys where different solution could be proposed successfully By this the list of mission proposed is my personal view adapted to my programs but it not pretends to be an absolute criterion Hope you will enjoy
