research The VMT project has dual goals a to provide a source of experience and data for practical and theoretical explorations of group knowledge building and b to develop an effective online environment and educational service for collaborative learning of mathematics Studying Virtual Math Teams reflects these twin orientations reviewing the intertwined aims and development of a rigorous science of small group cognition and a Web 2.0 educational math service It documents the kinds of interactional methods that small groups use to explore math issues and provides a glimpse into the potential of online interaction to promote productive math discourse *Investigations in Number, Data, and Space*, 2008 Part of a K-5 mathematics curriculum with curriculum units for classroom use and resources for teachers the Investigations curriculum was developed at TERC formerly Technical Education Research Centers *Theoretical Investigations* Gerry Stahl, 2021-04-23 Computers have transformed how we think discuss and learn as individuals in groups within cultures and globally However social media are problematic fostering flaming culture wars and fake news This volume presents an alternative paradigm for computer support of group thinking collaborative learning and joint knowledge construction This requires expanding concepts of cognition to collectivities like collaborative groups of networked students Theoretical Investigations explores the conditions for group cognition supplying a philosophical foundation for new models of pedagogy and methods to analyze group interaction Twenty-five self-contained investigations document progress in research on computer-supported collaborative learning CSCL both in Stahl's own research and during the first decade of the CSCL journal The volume begins with two new reflections on the vision and theory that result from this research Representing both ethnomethodological and social constructivist research paradigms the investigations within this volume comprise a selection of seminal and influential articles and critical commentaries that contribute to an understanding of concepts and themes central to the CSCL field The book elaborates an innovative theory of group cognition and substantiates the pedagogical potential of CSCL Theoretical Investigations Philosophical Foundations of Group Cognition is essential as a graduate text for courses in educational theory instructional design learning and networked technologies The investigations will also appeal to researchers and practitioners in those areas *Making a Difference: Volume I and II* Sasha A. Barab, Kenneth E. Hay, Nancy Butler Songer, Daniel T. Hickey, 2017-09-05 William Wordsworth 1770-1850 needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally This broad-ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period It discusses many of Wordsworth's later poems comparing his work with that of his regional contemporaries as well as major writers such as Scott The key theme of relationship both between characters within poems and between poet and reader is explored through Wordsworth's construction of community and his use of power relationships A serious discussion of the place of sexual feeling in his writing is also included **Taking Charge** JoAnne Nordling, JoAnne Nordling, 1999 *Essays In Computer-Supported*

Collaborative Learning Gerry Stahl, 2016-01-26 These essays are some of the most important papers co written with my colleagues that supplement the discussion of CSCL research in the published books These chapters take the discussion in specific directions They begin with my general reflections on the importance of CSCL as a research field situating my work on the VMT Project and my theory of group cognition within the field of CSCL They describe the VMT research project including its research approach technology pedagogy and analysis methods Mostly they discuss in some detail the findings that have emerged from the VMT Project about the nature of online interaction in that type of CSCL setting The volume concludes with reports of work in the project and future directions that were underway **Autumn Drawings** Kelli
