QTS Numeracy Test Questions: The Ultimate Guide to Passing the QTS Numerical Tests Richard McMunn, 2014

New Teacher Identity and Regulative Government Tony Brown, Olwen McNamara, 2006-03-30 This book seeks to address the question of how the task of teaching mathematics to young children might be better understood But rather than starting out with a conception of mathematics derived from the many histories mathematics might claim as its own we centre the analysis instead within the social practices that surround the teaching of the subject to children aged four to eleven in English primary schools today That is we do not commence with an a priori conception of mathematics and see what people are saying about it Rather we start from what people are saying and see where this points We probe how the desires of society have manifested themselves in a societal decision to teach

mathematics and how this decision now shapes that which is called mathematics We focus on the operation of the noun mathematics and verb mathematical and consider how the meanings of these terms derive from the social domain in which they are being used This extends and develops a conception of how language intervenes in the task of mathematics education presented elsewhere Brown 2001 In this present book however we have a particular focus on trainee and newly qualified teachers with a view to pinpointing how this conception of mathematics manifests itself in their evolving practices We question how such teachers with many years of experience as a pupil in school might now re orient themselves towards the demands of teaching mathematics in schools

Successful Induction for New Teachers Sara Bubb, 2007-09-18 Investing in people right at the start of their career is crucial because no matter how good initial training is the first year as a fully fledged teacher is bound to be tough Induction is there to make sure new teachers succeed and enjoy their work Supporting new teachers is not just a good thing to do it s statutory With the new professional standards every Newly Qualified Teacher NQT and Induction Tutor needs this book to ensure that the induction year is a success This book is an accessible engaging guide to surviving the tricky bits of the first year of teaching It offers the sort of clear information and practical tips that Sara Bubb knows people are crying out for because they raise them in the TES virtual staffroom Written in a lively yet authoritative style the book is packed with illuminating anecdotes handy checklists and useful examples covers much that NQTs need to know including how induction works how to meet the core standards dealing with difficult people how to get the most out of professional development and performance management gives detailed guidance about how induction tutors and mentors can support monitor and assess new teachers Indispensable for any new teacher needing up to date advice and information induction tutors CPD coordinators local authority advisers in charge of induction and trainee teachers towards the end of their course this book is an invaluable resource to success in the induction year Sara Bubb has an international reputation in the field of induction and supports new teachers and induction tutors at the Institute of Education University of London and across the country She writes a popular weekly advice column for new teachers in the Times Educational Supplement and answers questions on its online staffroom
