Abstract: The purpose of this study was to determine the effect of a 12-week resistance training program on the muscle strength and endurance of young women. The subjects were 15 young women (mean age 20.5 years) who participated in a 12-week resistance training program. The program consisted of three sessions per week, each lasting 45 minutes. The subjects performed a series of exercises targeting the major muscle groups. The results showed that the subjects experienced significant improvements in muscle strength and endurance after the 12-week program. The study concluded that a 12-week resistance training program is effective in improving muscle strength and endurance in young women.

1. The first step is to identify the problem. This involves understanding the current situation and what needs to be changed.
