**Environmental Planning Handbook** Tom Daniels, 2017-11-08 Environmental protection is a global issue But most of the action is happening at the local level How can communities keep their air clean their water pure and their people and property safe from climate and environmental hazards Newly updated The Environmental Planning Handbook gives local governments nonprofits and citizens the guidance they need to create an action plan they can implement now It's essential reading for a post Katrina post Sandy world *Environmental Planning and Geology* Donald R. Nichols, Catherine C. Campbell, 1971 Expert Systems in Environmental Planning Jeff R. Wright, Lyna L. Wiggins, Ravinder K. Jain, T. John Kim, 2012-12-06 The connections between economics planning and the environment are receiving increased attention among scholars and policy makers in many countries The common denominator among these three variables is the earth's life support systems the ecosystems on which the world depends When we describe our physical surroundings as a collection of possible uses we are establishing linkages between economics planning and the environment Because possible alternative uses compete with each other and conflicts arise over scarce land resources the varying environmental impacts of alternative uses are major concerns for the current as well as the next generation How to achieve sustainable development is the pressing question for today's environmental professionals Environmental planners and engineers help us study the implications of our choices and new technologies and techniques that improve the practice of environmental planning should enhance our ability to protect our future The depletion of the earth's natural resources and loss of biodiversity the degradation of air land and water quality the accumulation of greenhouse gases leading to changes in our climate and the depletion of the ozone layer comprise only a partial list of environmental issues that concern our policy makers To support their decisions environmental planning must be a multidimensional and multidisciplinary activity that incorporates social economic political geographical and technical factors Solutions for problems in these areas frequently require not only numerical analyses but also heuristic analyses which in turn depend on the intuitive judgements of planners and engineers
