Cox, Ian Thompson, 1998 This work examines the current use and performance of standard forms of contract and dispute resolution in the UK construction industry It draws on extensive research into which contractual conditions are most appropriate to adopt in individual circumstances It concludes with a guide for all clients and construction professionals to the selection of the contracting methods which generate business success It reviews the main forms of contract currently in use including ICE 6th edition ICE Design ICE Minor Works FIDIC NEC 2nd edition GC Works IChemE Red and JCT Forms

Unidroit's Rules in Practice: Standard International Contracts and Applicable Rules G. Letterman, 2001-11-29 In the law of contracts the term internationalization has come to mean the removal of transactions from any nation's legal standards system of dispute resolution or commercial practices The trend has picked up speed in recent years to the point where many business people want their contracts internationalized as a matter of course This convenient volume contains the heart of the matter It focuses on the essential elements that make a contract international in the new sense and the interrelationships between those elements rather than on the constantly changing mass of attendant detail To clarify such an understanding of internationalization the author describes and analyzes various aspects of international contract law regimes including The United Nations Convention on Contracts for the International Sale of Goods CISG The UNIDROIT Principles CISG and UNIDROIT Jurisprudence The lex mercatoria and other international regional and national contract law principles A final

chapter deals exclusively with practical applications when to and when not to internationalize a contract how to plan for effectiveness and the best advantage and selecting appropriate and consistent devices for internationalization

Construction Contracts John Murdoch, Will Hughes, 2002-01-04 Although the legal principles involved in construction contracts and their management and administration are an aspect of general contract law the practical and commercial complexities of the construction industry have increasingly made this a specialist field Recognizing this *Construction Contracts* is a fully revised edition of the UK's leading textbook on the law governing this area Brought up to date with recent cases and developments in the law as it stands at July 2000 this new edition takes full account of the effects of the Housing Grants Construction and Regeneration Act 1996 the Arbitration Act 1996 the Contracts Rights of Third Parties Act 1999 and the changes in the legal system brought about by the Woolf reforms includes extended coverage of financial protection construction insurance and tendering controls as well as the Construction Design and Management Regulations has been revised to take account of changes to the common standard form contracts particularly the New Engineering Contract and the GC Works family of contracts Retaining the same basic approach as its successful predecessors this important text introduces the general principles that underlie contracts in construction illustrating them by reference to the most important standard forms currently in use

Guide to the Use of FIDIC, 1989 **The NEC Compared and Contrasted** Frances Forward, 2002 This volume sets out to compare the NEC family of contracts with other construction industry standard forms It should assist all levels of professionals involved in procurement in the construction industry to make informed choices and give balanced advice when deciding which contract to use
