Ground Work Culture Address Delivered Distribution:

Richard Owen Nicolaas Rupke, 2024-05-31 In the mid 1850s no scientist in the British Empire was more visible than Richard Owen Mentioned in the same breath as Isaac Newton and championed as Britain's answer to France's Georges Cuvier and Germany's Alexander von Humboldt Owen was as the Times declared in 1856 the most distinguished man of science in the country But a century and a half later Owen remains largely obscured by the shadow of the most famous Victorian naturalist of all Charles Darwin Publicly marginalized by his contemporaries for his critique of natural selection Owen suffered personal attacks that undermined his credibility long after his name faded from history With this innovative biography Nicolaas A Rupke resuscitates Owen's reputation Arguing that Owen should no longer be judged by the evolution dispute that figured in only a minor part of his work Rupke stresses context emphasizing the importance of places and practices in the production and reception of scientific knowledge Dovetailing with the recent resurgence of interest in Owen's life and work Rupke's book brings the forgotten naturalist back into the canon of the history of science and demonstrates how much biology existed with and without Darwin

Drawing on that experience, this collection examines six recent RTI International projects funded mostly by the United States Agency for International Development that pursued several different paths to integrating service delivery and governance through engaging citizens, public officials and service providers on issues related to accountability and sectoral services. The six cases illustrate the multiple ways in which citizen participation in accountability, called social accountability, can lead to positive effects on governance, citizen empowerment and service delivery. The analysis focuses on both the intended and actual effects and unpacks the influence of context on implementation and the outcomes achieved. *International Agreements to Protect the Environment and Wildlife* United States International Trade Commission, 1991 **Gene Therapy Methods** M.
