Pippin, 1980-11 A practical guide to casework in public social service agencies Pippin begins by discussing the different worlds of client and helper outlines the ingredients for a productive relationship and gives a detailed method for a task focused approach Crises long standing conditions unusual client behaviour and the

Underwood, 1996 Soft systems techniques can be used by managers at all levels to analyse the needs of individuals or groups of people working in or affected by what goes on in an organization. The technique has developed as an alternative to more reductionist hard approaches which tend not to take account of the social and political dimensions of issues and have led to the implementation of systems that have failed to meet the needs of users. In this introduction to the soft systems approach Professor Underwood suggests ways in which this type of analysis offers advantages when used in the context of libraries, information services and resource centres. Soft systems take into account the subjective element in problem solving and are of especial value in the new Internet driven information situation where traditional information boundaries are being challenged. At a time when the information world has been undergoing fundamental technological and social changes, the need to find techniques to promote greater understanding of this change has become an important challenge for information managers. Soft systems analysis offers the practitioner, the consultant and the student an in depth view of the application of soft systems analysis as a tool for exploring the potential for change in organizations.

How Personal Growth and Task Groups Work Robert K. Conyne, 1989 Focusing on normal rather than clinical populations, this book presents an account of how practitioners can develop effective groups. Two major categories of groups are explored: task groups such as committee groups for solving problems and accomplishing tangible goals, and personal groups such as psychotherapy groups for achieving individual change and developing interpersonal skills. The author utilizes two extensive examples or stories throughout to demonstrate the applicability of his conceptual framework for group facilitation.

Working with Children Dana K. Lewis, 1981-04 **The Planning Commissioners Guide** David J. Allor, 1984 This step by step guidebook gets new commissioners off on the right foot and helps experienced commission members navigate their roles. The authors, all practicing planners, have worked extensively with planning commissions for decades. They have watched commissioners scramble up a steep learning curve, sit in the hot seat of controversy and strive to make sound decisions for the places they call home. In this helpful handbook, the authors share ideas, insights and information to help commissioners succeed. Eight detailed chapters cover everything from the nuts and bolts of development applications to the nuances of legal issues to the part commissioners play in long range planning. Readers will learn how to prepare for their first commission meeting, review a development plan, invite productive public input and steer clear of ethical dilemmas.
