Rethinking Project

Management for a Dynamic and Digital World Darren Dalcher, 2022-01-25 Although project management is a newly recognised profession it deals with a number of significant challenges We seem to operate in an unprecedented environment rife with change innovation and turbulence Moreover projects by their very nature tend to push boundaries encourage novelty and demand engagement with the uncertain and the unknown Indeed projects reflect our organised impulse to constantly amend shape improve and refine our context So how can future projects overcome the challenges Rethinking Project Management for a Dynamic and Digital World makes a powerful and original statement equipping project leaders and managers with new approaches and frameworks for an increasingly demanding world where the traditional methods models and mindsets no longer suffice The book explores new trends promising ideas and novel concepts and distils the fundamentals for marshalling a world concerned with people communities and value by deploying innovation rethinking

purpose and acting responsibly An increasingly borderless upwardly mobile and entrepreneurial society requires a revamped and revitalised project perspective that is more dynamic adaptive and reflective This volume brings together some of the best writing by leading authorities on many key topics including benchmarking lean quality communicating teams and teamwork followership organising for project work project frameworks agile working project portfolios strategic initiatives strategic alignment trust entrepreneurship putting people first social processes positive organisations rethinking progress the hacker paradigm community stewardship and knowledge management The collection thus offers an invaluable new resource for informed managers looking to engage with the latest thinking and research and for researchers seeking to reflect on how the discipline is changing

The Evolution of Chemical Knowledge Jürgen Jost,Guillermo Restrepo,2022-10-05 Chemistry shapes and creates the disposition of the world s resources and provides novel substances for the welfare and hazard of our civilisation at an exponential rate Can we model the evolution of chemical knowledge This book not only provides a positive answer to the question it provides the formal models and available data to model chemical knowledge as a complex dynamical system based on the mutual interaction of the social semiotic and material systems of chemistry These systems which have evolved over the history include the scientists and institutions supporting chemical knowledge social system theories concepts and forms of communication semiotic system and the substances reactions and technologies material system central for the chemical practice These three systems which have traditionally been mostly studied in isolation are brought together in this book in a grand historical narrative on the basis of comprehensive data sets and supplemented by appropriate tools for their formal analysis We thereby develop a comprehensive picture of the evolution of chemistry needed for better understanding the past present and future of chemistry as a discipline The interdisciplinary character of this book and its non technical language make it an ideal complement to more traditional material in undergraduate and graduate courses in chemistry history of science and digital humanities

The Knowledge of God in the World and the Word Douglas Groothuis,Andrew I. Shepardson,2022-12-06 Intellectual support for defending your faith Knowledge of God in the World and the Word is a clear and succinct introduction to classical Christian apologetics that also addresses the most common objections to natural theology Amid the crisis of authority in our modern and postmodern era Christians need to be able to point to God s revelation in the natural world in addition to defending God s unique revelation in the Bible and in the person of Jesus Christ Classical apologetics takes a two step approach to commending the Christian picture of reality first establishing arguments for the existence of God and then defending key items of Christian revelation including The reliability of the Bible The identity of the historical Jesus The resurrection of Jesus Christ from the dead With this book you will discover an easy point of entry into understanding why Christian beliefs about Jesus are true and rational Perfect for any Christian who wants to articulate a sophisticated and comprehensive defense of their faith

Education Gary Thomas,2021-09-23 Since the early Egyptians human beings have formalised the business of learning setting up a designated environment of some form to pass knowledge and learning on to groups of students In this second edition of his Very Short Introduction Gary Thomas explores how and why education has evolved as it has examining the ways in which it has responded over the centuries to various influences in politics philosophy and the social sciences Focussing on education today he considers especially the controversies over progressive versus formal teaching and also examines education worldwide assessing the accelerating trend on both sides of the Atlantic of the move to charter academy and free schools The COVID 19 pandemic has dramatically accelerated moves to online learning in schools and universities and in this new edition Thomas looks again at curriculums and what shape they should take in a rapidly changing world He asks why action on race gender and social inequality has borne so little fruit thus far questioning the oft made claim of education to be a force for social mobility and offering an analysis on how education may develop over the coming century

Shakespeare Scholars in Conversation Michael P. Jensen,2019-07-29 Twenty four of today s most prominent Shakespeare scholars discuss the best known works in Shakespeare studies along with some nearly forgotten classics that deserve fresh appraisal

An extensive bibliography provides a reading list of the most important works in the field A filmography then lists the most important Shakespeare films along with the films that influenced Shakespeare filmmakers Interviewees include Sir Stanley Wells Sir Jonathan Bate Sir Brian Vickers Ann Thompson Virginia Mason Vaughan George T Wright Lukas Erne MacDonald P Jackson Peter Holland James Shapiro Katherine Duncan Jones and Barbara Hodgdon Maya Christian Murals of Early Modern Yucatán Amara Solari,Linda K. Williams,2024 This multidisciplinary project studies religious murals that were painted by Christianized Maya artists in the first centuries after the conquest of Mexico Solari and Williams study the paintings all of which are based in the Yucatán Peninsula from an art history perspective along with the printed sources referencing the murals At the same time they examine the chemical signatures left by the murals pigments and the techniques used in their production through state of the art imaging technologies By using these methodologies the authors seek to explain the many ways in which cultural and material exchange took place between the Spanish and Maya peoples At first glance murals depicting Spanish ideals of Western Christianity would appear to be an obvious and frequent tool of oppression in the Yucatán as they were elsewhere in the Americas but they were also a form of agency for Indigenous people as a means to shape these narratives with their own subtle imagery and ideas drawn from Mayan cosmologies and cultural traditions These painters used European pictorial techniques such as perspective while also using local materials to create vivid pigments and colors never before seen in murals in Europe The authors seek to trace how the initial and continued use of these material sources to create these images led to a much more localized form of Catholicism that continues to be practiced by Mayan speakers today **The Rise and Fall of Animal Experimentation** Richard J. Miller,2023 Written by a scientist with over 40 years of laboratory experience The Rise and Fall of Animal Experimentation critically examines the assumption that animal experimentation is necessary to the advancement of biomedical research whether animal based research achieves its aims and if there are alternatives to performing animal based science **The Ethics of Neoliberalism** Peter Bloom,2017-06-26 The 21st century is the age of neo liberalism a time when the free market is spreading to all areas of economic political and social life Yet how is this changing our individual and collective ethics Is capitalism also becoming our new morality From the growing popular demand for corporate social responsibility to personal desire for work life balance it would appear that non market ideals are not only surviving but also thriving Why then does it seem that capitalism remains as strong as ever The Ethics of Neoliberalism boldly proposes that neoliberalism strategically co opts traditional ethics to ideologically and structurally strengthen capitalism It produces the ethical capitalist subject who is personally responsible for making their society workplace and even their lives more ethical in the face of an immoral but seemingly permanent free market Rather than altering our morality neoliberalism individualizes ethics making us personally responsible for dealing with and resolving its moral failings In doing so individuals end up perpetuating the very market system that they morally oppose and feel powerless to ultimately change This analysis reveals the complex and paradoxical

way capitalism is currently shaping us as ethical subjects People are increasingly asked to ethically save capitalism both collectively and personally This can range from the moral responsibility to politically accept austerity following the financial crisis to the willingness of employees to sacrifice their time and energy to make their neoliberal organizations more humane to the efforts by individuals to contribute to their family and communities despite the pressures of a frantic global business environment Neoliberalism thus uses our ethics against us relying on our good nature and sense of personal responsibility to reduce its human cost in practice Ironically

Transformation Processes in Europe and Beyond Florian Weber, Olaf Kühne, Julia Dittel, 2024-07-05 Europe and the world in all their diversity and complexity have always been and continue to be in a state of change Recent geo political environmental social and economic developments demonstrate a world in constant flux These ever changing framework conditions require corresponding transformations in many different structures This anthology takes these observations as a starting point to illuminate theoretical perspectives methodological approaches and empirical insights related to recent transformation processes in Europe and beyond with a special focus in this respect on the USA In view of their comprehensive nature transformation processes cannot be analysed from a single perspective a uniform approach or theory would fail to address their complexity and contingency In this sense horizontal geographies serves as our theoretical framework The concept refers to comprehensive synthesizing regional analyses which collect structure and reflect on knowledge with diverse spatial social and cultural contexts The interdisciplinary and international authorship does justice to the idea of horizontal multi perspective geographies and considers a wide range of transformation processes in Europe and beyond

Political Economy, New Media, and Nigerian Popular Cultures Benjamin Olumuyiwa Popoola, Israel Ayinla Fadipe, 2025-04-15 The Nigerian media industry with the introduction of information and communication technologies social networking sites and the internet has energized popular cultures that revolve around movies Nollywood Hollywood Bollywood etc music Afro hip hop American music sports football European leagues fandom celebrity worship religious movements pentecostalism nationalistic identities online streaming platforms yahoo yahoo cultures money ritualism and so on Thus the present book examines how political economy theory of the media has been used to shape these listed popular cultures in the country and what uses and gratifications people seek from them how people symbolically interacted with them and how they socially learn from these popular cultures As a matter of fact using cogent and relevant case studies with postulations of popular economy theory of the media the papers have looked into the intersection between political economy theory popular cultures and new media using postulations from other relevant media theories and methodologies Communication popular cultures and media studies scholars and students will find this book useful for academic purposes

From AI to Robotics Arkapravo Bhaumik, 2018-02-28 From AI to Robotics Mobile Social and Sentient Robots is a journey into the world of agent based robotics and it covers a number of interesting topics both in the theory and practice of the discipline The book traces the earliest ideas for autonomous machines to the mythical lore of

ancient Greece and ends the last chapter with a debate on a prophecy set in the apparent future where human beings and robots technology may merge to create superior beings the era of transhumanism Throughout the text the work of leading researchers is presented in depth which helps to paint the socio economic picture of how robots are transforming our world and will continue to do so This work is presented along with the influences and ideas from futurists such as Asimov Moravec Lem Vinge and of course Kurzweil The book furthers the discussion with concepts of Artificial Intelligence and how it manifests in robotic agents Discussions across various topics are presented in the book including control paradigm navigation software multi robot systems swarm robotics robots in social roles and artificial consciousness in robots These discussions help to provide an overall picture of current day agent based robotics and its prospects for the future Examples of software and implementation in hardware are covered in Chapter 5 to encourage the imagination and creativity of budding robot enthusiasts The book addresses several broad themes such as AI in theory versus applied AI for robots concepts of anthropomorphism embodiment and situatedness extending theory of psychology and animal behavior to robots and the proposal that in the future AI may be the new definition of science Behavior based robotics is covered in Chapter 2 and retells the debate between deliberative and reactive approaches The text reiterates that the effort of modern day robotics is to replicate human like intelligence and behavior and the tools that a roboticist has at his or her disposal are open source software which is often powered by crowd sourcing Open source meta projects such as Robot Operating System ROS etc are briefly discussed in Chapter 5 The ideas and themes presented in the book are supplemented with cartoons images schematics and a number of special sections to make the material engaging for the reader Designed for robot enthusiasts researchers students or the hobbyist this comprehensive book will entertain and inspire anyone interested in the exciting world of robots
