**Brief Interventions with Bereaved Children** Barbara Monroe, Frances Kraus, 2010 Recent years have seen increasing interest in the needs of children facing bereavement and a corresponding increase in services to support them This book addresses and explains the theoretical concepts and practical implications behind the idea of brief work with bereaved children and families Flexible and accessible short term services delivered at the right time underpin the strengths of bereaved children supporting their recovery rather than pathologising the grief process In this way the book also speaks to the current interest in the concept of resilience and working with families strengths and possibilities rather than merely identifying their problems This second edition continues to be a unique book within the growing field of childhood bereavement and the new chapters added to this edition discuss managing situations with learning disability supporting very young children and emotional literacy The book also presents

cases from the service user's perspective. It looks at different approaches to intervention such as the importance of assessment and the value of groupwork and also covers work with children and families before a death. Brief interventions with bereaved children will appeal to practitioners, educators and service providers managing scarce resources. The editors have more than twenty-five years' experience as practitioners within the field as service providers and educators. The book features chapters from distinguished contributors with backgrounds in healthcare, education, social work and the police alongside theoretical and practice-based chapters from workers in the field of bereavement care for children. *Treating Trauma and Traumatic Grief in Children and Adolescents, Second Edition* Judith A.
