Since the publication of the first edition of this book there have been many important new developments in the field of molecular physics. The new methods and results which are most significant for students are treated extensively in this second edition. Among these are in particular single molecule spectroscopy and the field of molecular electronics which is in a stage of rapid development including the areas of electroluminescence and organic light emitting diodes. In addition we have extended and corrected the earlier material in a number of places. We have also included exercises in this new edition they will allow students to deepen their understanding and offer a basis for further individual study. The complete solutions to the exercises can be found on the Internet under [www.springeronline.com](http://www.springeronline.com) 3 540 40792 S. We are grateful to Mr C D Bachem and Dr Th Schneider of the Springer Verlag for their continuous and very agreeable cooperation during the preparation of the book. We thank our colleague Prof W D Brewer for his competent translation. Stuttgart February 2004 H Haken H C Wolf
