Developing and Sustaining Adult Learners Carrie J. Boden, Kathleen P. King, 2013-10-01

Developing and Sustaining Adult Learners is the second volume in a series of scholarly publications associated with the annual Adult Higher Education Alliance AHEA The Alliance conference The title of this volume derived from the theme of the 2012 conference co sponsored by American Association of Adult and Continuing Education AAACE in Las Vegas NV encompasses significant issues and questions at the forefront of the field of adult education At the conference scholars practitioners and adult educators gave presentations and received feedback on some of the most significant and timely issues in their praxis The Alliance which values collaboration transformative dialogue and collegiality among professionals considers this volume a continuation of those conversations as the presentations were expanded into chapters We are glad that you are joining the conversation This volume confirms not only that adult learning higher education and both fields of research have many contexts but also that there is so much more to learn about different perspectives and opportunities for research and practice Opportunities for symbiotic relationship abound We hope that Developing and Sustaining Adult Learners will be a book that you pull off your bookshelf or open in your e reader often We know that as we engage in program and course planning design and teaching this book will provide needed refreshment and new vision When research ideas seem too similar this volume will also provide many seeds for new opportunities

Positive Feedback in Natural Systems Donald L. DeAngelis, Wilfried M. Post, Curtis C. Travis, 2012-12-06

Cybernetics a science concerned with understanding how systems are regulated has reflected the preoccupations of the century in which it was born Regulation is important in twentieth century society where both machines and social organizations are complex Cybernetics focused on and became primarily associated with the homeostasis or stability of system behavior and with the negative feedbacks that stabilize systems It paid less attention to the processes opposite to negative feedback the positive feedback processes that act to change systems We attempt to redress the balance here by illustrating the enormous importance of positive feedbacks in natural systems In an article in the American Scientist in 1963 Maruyama called for increased attention to this topic noting that processes of change could occur when a deviation in anyone component of the system caused deviations in other components that acted back on the first component to reinforce or amplify the initial deviation The deviation amplification is the result of positive feedback among system components Maruyama demonstrated by numerous examples that the neglect of such processes was unjustified and suggested that a new branch of cybernetics the second cybernetics be devoted to their

study **In Restraint of Trade** Butler D. Shaffer,1997 What emerges from this book is an awareness that the relationship between government and business has been far more symbiotic than adversarial in the years following World War I and that government regulatory practices have served the needs of the business community far more than the interests of the public

The Fourth Wave Herman Maynard,Susan E. Mehrtens,1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in The Third Wave Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave an era of integration and responsibility far beyond Toffler s revolutionary description of third wave postindustrial society Whether we attain this stage of global well being however will depend on how well our business institutions adapt and change The Fourth Wave examines the ways business has changed in the second and third waves and must continue to change in the fourth The changes concern the basics how an institution is organized how it defines wealth how it relates to surrounding communities how it responds to environmental needs and how it takes part in the political process Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment personal integrity and spiritual values are integrated The authors also demonstrate the need for a new kind of leadership managers and CEOs who embrace an attitude of global stewardship who define their assets as ideas information creativity and vision and who strive for seamless boundaries between work and private lives for all employees **Open Source**

Leadership L. Gadman,C. Cooper,2009-05-18 The authors offer an approach to leadership practice which is more appropriate for the challenges of today s digitally networked economy They conclude that contrary to popular opinion the practices proposed are not provoked by leadership education as they are evoked from a deep emotional feel for leading and leadership Mutual Causality in Buddhism and General Systems Theory Joanna Macy,2010-03-29 This book brings

important new dimensions to the interface between contemporary Western science and ancient Eastern wisdom Here for the first time the concepts and insights of general systems theory are presented in tandem with those of the Buddha Remarkable convergences appear between core Buddhist teachings and the systems view of reality arising in our century from biology and extending into the social and cognitive sciences Giving a cogent introduction to both bodies of thought and a fresh interpretation of the Buddha s core teaching of dependent co arising this book shows how their common perspective on causality can inform our lives The interdependence of all beings provides the context for clarifying both the role of meditative practice and guidelines for effective action on behalf of the common good Solar Architecture United States.
