*Poverty and Development in China* Caizhen Lu, 2013-03-01 China has made huge economic strides in recent decades but poverty is still a major issue on the agenda for rural China. *Poverty and Development in China* analyses how poverty is recognized and measured and how people in poverty are identified, literally asking who is poor in China. Lu Caizhen's research compares four approaches to poverty assessment: China's official poverty identification method, the participatory approach to poverty assessment, the monetary approach, and use of multidimensional poverty indicators. Each of these is applied to the same population of households to identify the poor in rural Wuding County, Yunnan Province. The analysis shows that there is in fact very little overlap of households identified as poor by the various means, and that choice of approach does matter in the outcome of who is identified as poor. This has implications at the theoretical, methodological, and policy levels. Lu discusses these in detail, concluding that at present there is a need to shift away from poverty reduction strategies that narrowly emphasize income generation activities, as these are often short-term efforts. Instead, the focus should move towards a broader combination of short-term and long-term strategies to break poverty's inter-linked structural causes.

*Climate Change, Justice and Sustainability* Ottmar Edenhofer, Johannes Wallacher, Hermann Lotze-Campen, Michael Reder, Brigitte Knopf, Johannes Müller, 2012-06-25 Analysing and synthesising vast data sets from a multitude of disciplines including climate science, economics, hydrology, and agricultural research, this volume seeks new methods of combining climate change mitigation, adaptation, development, and poverty reduction in ways that are effective, efficient, and equitable. A guiding principle of the project is that new alliances of state and non-state sector partners are urgently required to establish cooperative responses to the threats posed by climate change. This volume offers a vital policy framework for linking our response to this change with progressive principles of global justice and sustainable development. **Displaced O.**

Bennett, C. McDowell, 2012-04-09 A collection of oral histories that reveal the loss of cultural continuity, identity shifts in family responsibilities, gender roles, and fractured relationships between generations that are just some of the challenges people face as they attempt to rebuild lives and communities. Climate Variability and Water Dependent Sectors Dannele

E. Peck, Jeffrey M. Peterson, 2016-02-22 Demand for water in agricultural, municipal, industrial, and environmental uses is growing. More frequent and severe extreme weather conditions now exacerbate water shortages in many locations, and existing infrastructure to store and release water rarely has the capacity to both prevent floods during wet periods and meet demand during drought periods. Competition among sectors adds pressure not only on water infrastructure but also on management policies and allocation institutions. This book of contributed chapters assesses the performance of existing infrastructure, institutions, and policies under different climate variability scenarios. It also provides suggestions for minimizing conflict over scarce water resources. More flexible water allocation institutions and management policies and better tools for decision making under uncertainty will be required to maximize society's net benefit from less reliable water resources. The chapters show how incentives for individuals to conserve water and policies for helping vulnerable populations

prepare for and recover from extreme events will also need to be improved This book was originally published as a special issue of the Journal of Natural Resources Policy Research      **Body Politics in Development** Wendy Harcourt,2009-10-15 Body Politics in Development sets out to define body politics as a key political and mobilizing force for human rights in the last two decades This passionate and engaging book reveals how once tabooed issues such as rape gender based violence and sexual and reproductive rights have emerged into the public arena as critical grounds of contention and struggle Engaging in the latest feminist thinking and action the book describes the struggles around body politics for people living in economic and socially vulnerable communities and covers a broad range of gender and development issues including fundamentalism sexualities and new technologies from diverse viewpoints The book s originality comes through the author s rich experience and engagement in feminist activism and global body politics and was winner of the 2010 FWSA Book Prize

**International Handbook of Interpretation in Educational Research** Paul Smeyers,David Bridges,Nicholas C. Burbules,Morwenna Griffiths,2015-01-06 This handbook focuses on the often neglected dimension of interpretation in educational research It argues that all educational research is in some sense interpretive and that understanding this issue belies some usual dualisms of thought and practice such as the sharp dichotomy between qualitative and quantitative research Interpretation extends from the very framing of the research task through the sources which constitute the data the process of their recording representation and analysis to the way in which the research is finally or provisionally presented The thesis of the handbook is that interpretation cuts across the fields both philosophically organizationally and methodologically By covering a comprehensive range of research approaches and methodologies the handbook gives early career researchers what they need to know in order to decide what particular methods can offer for various educational research contexts fields An extensive overview includes concrete examples of different kinds of research not limited for example to teaching and learning examples as present in the Anglo Saxon tradition but including as well what in the German Continental tradition is labelled p dagogisch examples from child rearing and other contexts of non formal education with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice combined in each case with consideration of the role of interpretation in the process The handbook includes examples of a large number of methods traditionally classified as qualitative interpretive and quantitative used across the area of the study of education Examples are drawn from across the globe thus exemplifying the different opportunities and constraints that educational research has to confront in different societies      Dimensions of Poverty Valentin Beck,Henning Hahn,Robert Lepenies,2020-06-10 This anthology constitutes an important contribution to the interdisciplinary debate on poverty measurement and alleviation Absolute and relative poverty both within and across state boundaries are standardly measured and evaluated in monetary terms However poverty researchers have highlighted the shortfalls of one dimensional monetary metrics A new consensus is emerging that effectively addressing poverty requires a nuanced understanding of

poverty as a relational phenomenon involving deprivations in multiple dimensions including health standard of living education and political participation This volume advances the debate on poverty by providing a forum for philosophers and empirical researchers It combines philosophically sound analysis and genuinely global research on poverty s social embeddedness Next to an introduction to this interdisciplinary field which links Practical Philosophy Development Economics Political Science and Sociology it contains articles by leading international experts and early career scholars The contributors analyse the concept of poverty detail its multiple dimensions reveal epistemic injustices in poverty research and reflect on the challenges of poverty related social activism The unifying theme connecting this volume s contributions is that poverty must be understood as a multidimensional and socially relational phenomenon and that this insight can enhance our efforts to measure and alleviate poverty

*Ideas for Development* Robert Chambers,2013-06-17 Our world seems entangled in systems increasingly dominated by power greed ignorance self deception and denial with spiralling inequity and injustice Against a backdrop of climate change failing ecosystems poverty crushing debt and corporate exploitation the future of our world looks dire and the solutions almost too monumental to consider Yet all is not lost Robert Chambers one of the glass is half full optimists of international development suggests that the problems can be solved and everyone has the power at a personal level to take action develop solutions and remake our world as it can and should be Chambers peels apart and analyses aspects of development that have been neglected or misunderstood In each chapter he presents an earlier writing which he then reviews and reflects upon in a contemporary light before harvesting a wealth of powerful conclusions and practical implications for the future The book draws on experiences from Africa Asia and elsewhere covering topics and concepts as wide and varied as irreversibility continuity and commitment administrative capacity as a scarce resource procedures and principles participation in the past present and future scaling up behaviour and attitudes responsible wellbeing and concepts for development in the 21st century

*Development Dramas* Dia da Costa,2013-11-12 This book uses political theatre to trace the present day protests in West Bengal against the Left government s acquisition of agricultural land for industrialisation to decades of public protest by the rural Bengali against an accumulated dispossession of meanings
