complex dataset is crucial for organizations to uncover market intelligence and make informed decisions. However, without the proper guidance and understanding of Big Data analytics techniques and methodologies, scholars may struggle to navigate this landscape and maximize the potential benefits of their research. In response to this pressing need, Professor Dina Darwish presents *Big Data Analytics Techniques for Market Intelligence*, a groundbreaking book that addresses the specific challenges faced by scholars and professionals in the field. Through a comprehensive exploration of various techniques and methodologies, this book offers a solution to the hurdles encountered in extracting meaningful information from Big Data. Covering the entire lifecycle of Big Data analytics, including preprocessing, analysis, visualization, and utilization of results, the book equips readers with the knowledge and tools necessary to unlock the power of Big Data and generate valuable market intelligence. With real-world case studies and a focus on practical guidance, scholars and professionals can effectively leverage Big Data analytics to drive strategic decision-making and stay at the forefront of this rapidly evolving field.

Value Management in Healthcare Nathan William Tierney, 2017-10-06 Nathan Tierney's powerful storytelling is rarely seen in today's health care business environment. We must redesign the health care delivery system; a team sport in service of patients holds it accountable with measurement to improve outcomes and quantify the resource costs over the full cycle of care. Value-based health care is a framework through which these goals are achieved, and Tierney provides a detailed playbook to get your organization there. Outlined in incredible detail and clarity, he presents core concepts and dives into the key metrics needed to build, maintain, and scale a successful value-based health care organization. Nathan shares a realistic vision of what any CEO should expect when developing their own Value Management Office. Nothing is more important to me than improving the lives of those I love. My personal mission is to create systemic change with an impact on the global stage. This playbook needs to be on the desk of every executive, clinician, and patient today.

Mahek Shah MD, Senior Researcher and Senior Project Leader, Harvard Business School. Our current healthcare system is broken. The Organization for Economic Cooperation and Development (OECD) predicts health care costs could increase from 6% to 14% of GDP by 2060. The cause of this increase is due to: 1. a global aging population, 2. growing affluence, 3. rise in chronic diseases, and 4. better informed patients, all of which raise the demand for healthcare. In 2006, Michael Porter and Elizabeth Teisberg authored the book *Redefining Health Care: Creating Value-Based Competition on Results*. In it, they present their analysis of the root causes plaguing the health care industry and make the case for why providers, suppliers, consumers, and employers should move towards a patient-centric approach that optimizes value for patients. According to Porter, value for patients should be the overarching principle for our broken system. Since 2006, Professor Porter, accompanied by his esteemed Harvard colleague Professor Robert Kaplan, have worked tirelessly to promote this new approach and pilot it with leading healthcare delivery organizations like Cleveland Clinic, Mayo Clinic, MD Anderson, and U.S. Department of Veteran Affairs. Given the current state of global healthcare, there is urgency to achieve widespread adoption of this new approach. The intent of this book is to equip

all healthcare delivery organizations with a guide for putting the value based concept into practice This book defines the practice of value based health care as Value Management The book explores Professor Porter's Value Equation Value Outcomes Cost which is central to Value Management and provides a step by step process for how to calculate the components of this equation On the outcomes side the book presents the Value Realization Framework which translates organizational mission and strategy into a comprehensive set of performance measures and contextualizes the measures for healthcare delivery The Value Realization Framework is based on Professor Kaplan's ground breaking Balanced Scorecard approach but specific to healthcare organizations On the costs side the book details the Harvard endorsed time driven activity based costing TDABC methodology which has proven to be a modern catalyst for defining HDO costs Finally this book covers the need and a plan to establish a Value Management Office to lead the delivery transformation and govern operations This book is designed in a format where any organization can read it and acquire the fundamentals and methodologies of Value Management It is intended for healthcare delivery organizations in need of learning the specifics of achieving the implementation of value based healthcare *Enterprise Innovation* Michele Missikoff, Massimo Canducci, Neil

Maiden, 2015-08-05 The World is changing and then also how enterprises carry out innovation needs to change The book presents new methods and tools from Creativity to Engineering aimed at promoting and sustaining enterprise innovation and production improvement The book is primarily but not exclusively based on the new approaches methods frameworks and tools conceived for enterprise innovation and production improvement developed during the European Project BIVÉE Business Innovation for Virtual Enterprise Ecosystems Addressed topics range from Open Innovation in Virtual Enterprises to shared virtual spaces for collaborative creativity to Innovation metrics and monitoring in the context of networked SMEs
