1. The North pp 173-176

Key Concepts & Main Ideas	Notes	Analysis
Regional economic specialization, especially the demands of cultivating southern cotton, shaped settlement patterns and the national and international economy. Despite some governmental and private efforts to create a unified national economy, most notably the American System, the shift to market production linked the North and the Midwest more closely than either was linked to the South.	Read the first two paragraphs on page 173. Why was the nation fragile? <i>Sectional differences</i> What does Daniel Webster refer to in his quote at the top of the page? <i>He attempts to portray the dangers of this sectionalism.</i> The North... <i>a. two parts: Northeast (New England and Mid Atlantic States) and Old Northwest (Ohio to Minnesota)</i> <i>a. most populous section (lots of high birthrate and increased immigration)</i> The Industrial Northeast... <i>Before, Industrial Rev centered in textile industry but by 1820's northern factories were producing wide range of goods.</i>	What is the key difference between the Northeast and the Northwest? <i>The Northeast had emphasis on industry and the Northwest had emphasis on agriculture.</i> Explain the historical significance of Commonwealth v. Hunt. Consider broad context. <i>Massachusetts Supreme Court ruled that "peaceful unions" had the right to negotiate better contracts with employers.</i>

Cooper, 2018-12-20 The Mental Health Substance Use series provides clear guidance for professionals on this complex and increasingly recognised field. It concentrates on the concerns, dilemmas and concepts that impact on the life and well-being of affected individuals and those close to them, as well as the future direction of practice, education, research, services, intervention and treatment. This final book in the series provides the basis of best practice for offering effective interventions to affected individuals and their families, exploring the effects of various substances, both controlled and proscribed, and the impact of substance use in schizophrenia. Therapeutic interventions such as Eye Movement Desensitisation and Reprocessing (EMDR) and dialectical behaviour therapy are discussed, as are relapse prevention and the specific needs of groups such as older people and young adults. Associated topics such as individuals within the criminal justice system and brain injury, the symptoms of which often mimic mental health substance use, complete this highly comprehensive guide. The volumes in this series are designed to challenge concepts and stimulate debate, exploring all aspects of the development in treatment, intervention and care response, and the adoption of research-led best practice. They are essential reading for mental health and substance use professionals, students and educators.
