Handbook on Transport and Land Use João de

Abreu e Silva, Veronique Van Acker, Kristina M. Currans, Robert J. Schneider, 2023-06-28 Synthesizing current understandings on the relationship between transport and land use this timely Handbook proposes an agenda for research and practice that leads toward more human centered communities within an increasingly urbanized world facing rapid technological change. Leading scholars reframe and expand conventional transport policy holistically with concepts grounded in behavioral economic psychological and sociological theories in this fundamental reference work. Chapters explore the role of institutional policies and informal cultural contexts in influencing transport and land use systems before examining the impacts of transportation and land use decisions across multiple areas including equity public health climate environment and lifestyle preferences. The Handbook concludes by emphasizing pathways for human centered development planning and policy in an age of rapid innovation in new mobility technologies. Outlining the fundamental emerging and developing theories methods models and policies across the fields of transportation and land use this interdisciplinary Handbook will be invaluable to students and scholars of urban planning and transport studies. Setting an agenda for future research and policy initiatives it will also prove a useful resource to policymakers and practitioners working within transport and land use planning.

It also complements the textbook Principles of Transport Economics.

Transport Development in Asian Megacities Shigeru Morichi, Surya Raj Acharya, 2012-07-27 The rapid growth of the Asian urban population concentrates on a few large cities turning them into giant megacities. Despite new theoretical insights into the benefits of megacities the emerging Asia is facing a daunting challenge concerning the management of infrastructure and services in their megacities. The deteriorating urban mobility is the most difficult challenge with respect to the sharp increase in vehicle numbers and to inadequate and poorly managed road infrastructure. Public transport a sustainable mode of mobility is subjected to a vicious cycle of poor service decreasing ridership and lower investment. Despite

various policy initiatives the situation has not improved The scale and growth pattern of Asian megacities have distinctive features which generate a unique set of challenges and opportunities New perspectives are needed to effectively address the transportation problems making the best use of available opportunities This book which is a result of an international collaborative research addresses these challenges by providing insightful analysis and novel viewpoints *Air Transport and Regional Development Case Studies* Anne Graham,Nicole Adler,Hans-Martin Niemeier,Ofelia Betancor,António Pais Antunes,Volodymyr Bilotkach,Enrique J.
