O'Brien, 2009-10-09 Experts discuss the risks global environmental change poses for the human security including disaster and disease violence and increasing inequity In recent years scholars in international relations and other fields have begun to conceive of security more broadly moving away from a state centered concept of national security toward the idea of human security which emphasizes the individual and

human well being Viewing global environmental change through the lens of human security connects such problems as melting ice caps and carbon emissions to poverty vulnerability equity and conflict This book examines the complex social health and economic consequences of environmental change across the globe In chapters that are both academically rigorous and policy relevant the book discusses the connections of global environmental change to urban poverty natural disasters with a case study of Hurricane Katrina violent conflict with a study of the decade long Nepalese civil war population gender and development The book makes clear the inadequacy of traditional understandings of security and shows how global environmental change is raising new unavoidable questions of human insecurity conflict cooperation and sustainable development Contributors W Neil Adger Jennifer Bailey Jon Barnett Victoria Basolo Hans Georg Bohle Mike Brklacich May Chazan Chris Cocklin Geoffrey D Dabelko Indra de Soysa Heather Goldsworthy Betsy Hartmann Robin M Leichenko Laura Little Alexander Lopez Richard A Matthew Bryan McDonald Eric Neumayer Kwasi Nsiah Gyabaah Karen L O'Brien Marvin Soroos Bishnu Raj Upreti      *Climate Change, Ethics and Human Security* Karen O'Brien, Asunción Lera St. Clair, Berit Kristoffersen, 2010-07-22 Presenting human security perspectives on climate change this volume raises issues of equity ethics and environmental justice as well as our capacity to respond to what is increasingly considered to be the greatest societal challenge for humankind Written by international experts it argues that climate change must be viewed as an issue of human security and not an environmental problem that can be managed in isolation from larger questions concerning development trajectories and ethical obligations towards the poor and to future generations The concept of human security offers a new approach to the challenges of climate change and the responses that could lead to a more equitable and sustainable future Climate Change Ethics and Human Security will be of interest to researchers policy makers and practitioners concerned with the human dimensions of climate change as well as to upper level students in the social sciences and humanities interested in climate change      Environmental Change and Human Security in Africa and the Middle East Mohamed Behnassi, Katriona McGlade, 2017-01-17 This volume brings together insights on the interactions between environmental change and human security in the Middle East and Africa These regions face particular challenges in relation to environmental degradation the decline of natural resources and consequent risks to current and future human security The chapters provide topical analysis from a range of disciplines on the theory discourse policy and practice of responding to global environmental change and threats to human security Case studies from Morocco Tunisia Egypt Turkey Iraq and Syria provide empirical evidence with a focus section dedicated to the critical issue of water resources and water security in the region The contributions demonstrate above all that the risks posed to human security arise through multiple and interconnected processes operating across diverse spatial and temporal scales The complexity of these processes requires new ways of thinking and intervening As a contribution the current volume provides engaging insights from theory and practice for those seeking to address the challenges of environmental change      *Blurring Boundaries: Human Security and Forced Migration* Stefan Salomon, Lisa

Heschl, Gerd Oberleitner, Wolfgang Benedek, 2017-06-12 In *Blurring Boundaries Human Security and Forced Migration* scholars from law and social sciences offer a fresh view on the major issues of forced migration through the lens of human security. Although much scholarship engages with forced migration and human security independently they have hardly been weaved together in a comprehensive manner. The contributions cover the issues of refugee law, maritime migration, human smuggling and trafficking and environmental migration. *Blurring Boundaries* critically engages boundaries produced in the law with the main ideas of human security thus providing a much needed novel vocabulary for a critical discourse in forced migration studies. *Routledge Handbook of Human Security* Mary Martin, Taylor Owen, 2013-11-07 This Handbook will serve as a standard reference guide to the subject of human security which has grown greatly in importance over the past twenty years. Human security has been part of academic and policy discourses since it was first promoted by the UNDP in its 1994 Human Development Report. Filling a clear gap in the current literature this volume brings together some of the key scholars and policy makers who have contributed to its emergence as a mainstream concept including Nobel prize winner Amartya Sen and Sadako Ogata who jointly chaired the 2001 Commission on Human Security. Drawing upon a range of theoretical and empirical analyses the Handbook provides examples of the use of human security in policies as diverse as disaster management, arms control and counter terrorism and in different geographic and institutional settings from Asia to Africa and the UN. It also raises important questions about how the concept might be adapted and operationalised in future. Over the course of the book the authors draw on three key aspects of human security thinking: Theoretical issues to do with defining human security as a specific discourse; Human security from a policy and institutional perspective and how it is operationalised in different policy and geographic contexts; Case studies and empirical work. Featuring some of the leading scholars in the field the *Routledge Handbook of Human Security* will be essential reading for all students of human security, critical security, conflict and development, peace and conflict studies and of great interest to students of international security and IR in general. *Climate Change, Human Security and Violent Conflict* Jürgen Scheffran, Michael Brzoska, Hans Günter Brauch, Peter Michael Link, Janpeter Schilling, 2012-05-26 Severe droughts, damaging floods and mass migration. Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures. But how severe are the security risks and conflict potentials of climate change? Could global warming trigger a sequence of events leading to economic decline, social unrest and political instability? What are the causal relationships between resource scarcity and violent conflict? This book brings together international experts to explore these questions using in depth case studies from around the world. Furthermore the authors discuss strategies, institutions and cooperative approaches to stabilize the climate-society interaction. *The Handbook of Global Security Policy* Mary Kaldor, Iavor Rangelov, 2014-03-20 This Handbook brings together 30 state of the art essays covering the essential aspects of global security research and practice for the 21st century.
