INSTALLATION

(Figure 1)

(Figure 2)

Line Cord Connection

With a modular telephone system, connect the 10 feet of straight telephone line cord included with the phone to the modular jack located on the bottom of the handset (Fig. 1). Insert the other end of the cord into a modular wall jack (Fig. 2). Make sure all plugs snap firmly in place.

Receiving a Phone Call

When the phone rings, pick up the handset and open the phone. Slide the switch to **ON** (talk) position and it will work like any basic telephone. Slide the switch to **OFF** to "hang-up" the telephone when you have completed your conversation.

Dialing a Call

Pick up the handset, slide the talk switch to **ON** (talk), and wait for a dial tone. Press the numeric keypad (dialing keys) for the number you want.

KEY FEATURES

Sound Effects

There are two sound effects buttons that activate **Queen Amidala** and **Padme** voice clips from the movie. Push a button anytime when you want to insert one into your conversation.

Redial

If the line is busy when you call someone, or you want to call someone you just called, there is no need to dial the number again manually. When pressed, the **REDIAL** button automatically dials the previous number. Slide the talk switch to **ON**. When you hear a dial tone, press **REDIAL** instead of dialing the number.

Ringer Volume Selector

The **Queen Amidala Phone** features a harmonic ringer which can be adjusted to a loud (**HIGH**) or soft (**LOW**) sound level. When you do not want to be disturbed by incoming calls, slide the switch to the **OFF** position. You can still make outgoing calls without being disturbed by incoming calls.

Flash

The **FLASH** button is used to switch from one call to another call if you subscribe to call waiting with your phone service (this service is provided by your local phone company and is not a feature of the phone itself). To switch from one call to another, briefly press **FLASH** and then release the button. You can switch back to the first call in the same manner.

Volume Control

Your **Queen Amidala Compact Phone** features a dial control to regulate the volume of the reception. If you are having trouble hearing the person you are talking to, increase the volume until it is at a desirable level. If the reception is too loud, decrease the volume level until it is at a desired level.

TROUBLESHOOTING

No Dial Tone

- Check all modular plug connections to make sure they are securely connected.
- Problem with the wiring. Try another phone jack. If the phone works on another jack, you may have a problem with your wiring. Contact your local phone company.

Redial Function Does Not Operate

- Check if the last number you dialed was the number you intended to call with the redial feature.

Phone Does Not Ring

- Check to see if the ringer switch is set correctly. Make sure **RINGER VOLUME SELECTOR** is in either the **LOW** or **HIGH** position.
- Too many telephones may be installed on the same line. Contact your local telephone company to determine the maximum number of extensions for your calling area.

Sound Volume Is Too Low

- Check the **VOLUME CONTROL DIAL** to make sure it is not turned down too low.
- Another extension may be off the hook. Hang up extension.
