The Essential Ericksonian Hypnosis Primer Bryan Westra, 2015-01-12 This book is not meant to be an exhaustive investigation of all things Milton Erickson Instead this book will help serve as a practical book on specifically Ericksonian Hypnosis or what has become commonly referred to as Conversational Hypnosis This is a very indirect and covert means of hypnotizing someone through simply having an ordinary conversation with them The objective of this book is to first give you a model from which to work off of so you can hypnotize people with your conversations Then we explore hypnotic language patterns from an Ericksonian approach This means we will be investigating together the Milton Model from a new perspective You will get some examples and new insights into the Milton Model This will be especially helpful to individuals who have tried to study the model only to find they quickly forget it or cannot apply it usefully in a conversational induction Next after this we will explore hypnotic storytelling or what I like to call hypnotic story selling It is no real secret that Milton Erickson used stories to help his therapy patients He could tell a story and hypnotize someone through the psychological principle of Narrative Transportation Theory This is a theory where someone becomes transported into the story leaving behind consciously their immediate reality Stories are powerful contraptions that let us bypass our hypnotic subject's critical thinking faculty so we can talk to their limbic brain or hypnotic brain so we can influence and persuade a person to

take an action we want them to do This is where hypnosis becomes a very powerful tool for helping people overcome bad habits alleviate pain affect mindset and so much more In this book we ll especially be looking at numerous sales contexts while also a minimal amount of hypno psychotherapeutic contexts Grab your copy today
