Advances in Automation II Andrey A. Radionov,Vadim R. Gasiyarov,2021-03-19 This book reports on innovative research and developments in automation Spanning a wide range of disciplines including communication engineering power engineering control engineering instrumentation signal processing and cybersecurity it focuses on methods and findings aimed at improving the control and monitoring of industrial and manufacturing processes as well as safety Based on the International Russian Automation Conference held on September 6 12 2020 in Sochi Russia the book provides academics and professionals with a timely overview of and extensive information on the state of the art in the field of automation and control systems and fosters new ideas and collaborations between groups in different countries [It's All Analytics - Part II](#) Scott Burk,David Sweenor,Gary Miner,2021-09-28 Up to 70% and even more of corporate Analytics Efforts fail Even after these corporations have made very large investments in time talent and money in developing what they thought were good data and analytics programs Why Because the executives and decision makers and the entire analytics team have not considered the most important aspect of making these analytics efforts successful In this Book II of It s All Analytics series we describe two primary things 1 What this most important aspect consists of and 2 How to get this most important aspect at the center of the analytics effort and thus make your analytics program successful This Book II in the series is divided into three main parts Part I Organizational Design for Success discusses The need for a complete company organizational Alignment of the entire company and its analytics team for making its analytics successful This means attention to the culture the company culture culture To be successful the CEO s and Decision Makers of a company organization must be fully cognizant of the cultural focus on establishing a center of excellence in analytics Simply culture company culture is the most important aspect of a successful analytics program The focus must be on innovation as this is needed by the analytics team to develop successful algorithms that will lead to greater company efficiency and increased profits Part II Data Design for Success discusses Data is the cornerstone of success with analytics You can have the best analytics algorithms and models available but if you do not have good data efforts will at best be mediocre if not a complete failure This Part II also goes further into data with descriptions of things like Volatile Data Memory Storage and Non Volatile Data Memory Storage in addition to

things like data structures and data formats plus considering things like Cluster Computing Data Swamps Muddy Data Data Marts Enterprise Data Warehouse Data Reservoirs and Analytic Sandboxes and additionally Data Virtualization Curated Data Purchased Data Nascent Future Data Supplemental Data Meaningful Data GIS Geographic Information Systems Geo Analytics Data Graph Databases and Time Series Databases Part II also considers Data Governance including Data Integrity Data Security Data Consistency Data Confidence Data Leakage Data Distribution and Data Literacy Part III Analytics Technology Design for Success discusses Analytics Maturity and aspects of this maturity like Exploratory Data Analysis Data Preparation Feature Engineering Building Models Model Evaluation Model Selection and Model Deployment Part III also goes into the nuts and bolts of modern predictive analytics discussing such terms as AI Artificial Intelligence Machine Learning Deep Learning and the more traditional aspects of analytics that feed into modern analytics like Statistics Forecasting Optimization and Simulation Part III also goes into how to Communicate and Act upon Analytics which includes building a successful Analytics Culture within your company organization All in all if your company or organization needs to be successful using analytics this book will give you the basics of what you need to know to make it happen *The Certified Software Quality Engineer Handbook* Linda Westfall, 2016-09-23 A comprehensive reference manual to the Certified Software Quality Engineer Body of Knowledge and study guide for the CSQE exam **Enterprise Data Governance** Pierre Bonnet, 2013-03-04 In an increasingly digital economy mastering the quality of data is an increasingly vital yet still in most organizations a considerable task The necessity of better governance and reinforcement of international rules and regulatory or oversight structures Sarbanes Oxley Basel II Solvency II IAS IFRS etc imposes on enterprises the need for greater transparency and better traceability of their data All the stakeholders in a company have a role to play and great benefit to derive from the overall goals here but will invariably turn towards their IT department in search of the answers However the majority of IT systems that have been developed within businesses are overly complex badly adapted and in many cases obsolete these systems have often become a source of data or process fragility for the business It is in this context that the management of reference and master data or Master Data Management MDM and semantic modeling can intervene in order to straighten out the management of data in a forward looking and sustainable manner This book shows how company executives and IT managers can take these new challenges as well as the advantages of using reference and master data management into account in answering questions such as Which data governance functions are available How can IT be better aligned with business regulations What is the return on investment How can we assess intangible IT assets and data What are the principles of semantic modeling What is the MDM technical architecture In these ways they will be better able to deliver on their responsibilities to their organizations and position them for growth and robust data management and integrity in the future **BiSL® Next - A Framework for Business Information Management 2nd edition** Brian Johnson, Gerard Wijers, Lucille van der Hagen, Walter Zondervan, 2018-08-22 This book describes the framework of the next

generation of Business Information Services Library BiSL BiSL Next is a public domain standard for business information management with guiding principles good practices and practical templates It offers guidance for digitally engaged business leaders and those who collaborate with them with the ultimate goal to improve business performance through better use of information and technology Twelve elements four drivers four domains and four perspectives are the basis of the guidance in BiSL Next Target audience of this book are business managers business information managers business analysts CIO s and IT managers as well as consultants in this field While describing the twelve elements the book offers them insight in the best way to manage execute and profit from business information management in their enterprise The book is also the official literature for the BiSL Next Foundation exam

Big Data for Big Decisions Krishna Pera,2022-12-30 Building a data driven organization DDO is an enterprise wide initiative that may consume and lock up resources for the long term Understandably any organization considering such an initiative would insist on a roadmap and business case to be prepared and evaluated prior to approval This book presents a step by step methodology in order to create a roadmap and business case and provides a narration of the constraints and experiences of managers who have attempted the setting up of DDOs The emphasis is on the big decisions the key decisions that influence 90% of business outcomes starting from decision first and reengineering the data to the decisions process chain and data governance so as to ensure the right data are available at the right time every time Investing in artificial intelligence and data driven decision making are now being considered a survival necessity for organizations to stay competitive While every enterprise aspires to become 100% data driven and every Chief Information Officer CIO has a budget Gartner estimates over 80% of all analytics projects fail to deliver intended value Most CIOs think a data driven organization is a distant dream especially while they are still struggling to explain the value from analytics They know a few isolated successes or a one time leveraging of big data for decision making does not make an organization data driven As of now there is no precise definition for data driven organization or what qualifies an organization to call itself data driven Given the hype in the market for big data analytics and AI every CIO has a budget for analytics but very little clarity on where to begin or how to choose and prioritize the analytics projects Most end up investing in a visualization platform like Tableau or QlikView which in essence is an improved version of their BI dashboard that the organization had invested into not too long ago The most important stakeholders the decision makers are rarely kept in the loop while choosing analytics projects This book provides a fail safe methodology for assured success in deriving intended value from investments into analytics It is a practitioners handbook for creating a step by step transformational roadmap prioritizing the big data for the big decisions the 10% of decisions that influence 90% of business outcomes and delivering material improvements in the quality of decisions as well as measurable value from analytics investments The acid test for a data driven organization is when all the big decisions especially top level strategic decisions are taken based on data and not on the collective gut feeling of the decision makers in the organization
