Mastering The Techniques Of Teaching:

Mastering the Techniques of Teaching Joseph Lowman, 1984 In this second edition of his classic resource Joseph Lowman expands on his earlier model of effective teaching to place greater emphasis on motivational skill and commitment to teaching He presents a practical new learning model that compares six sources of influence on what and how students learn in a college course All types of teachers and instructors will discover options on how to organize classes and use group work to promote learning They will also find a checklist for assessing their classroom performance on video detailed instructions for using video analysis to improve their technique and an innovative approach to evaluating their overall performance

Mastering the Techniques of Teaching Joseph Lowman, 1995-09-15 Since the publication of the first edition of *Mastering the Techniques of Teaching* in 1984 national interest in promoting effective college teaching has risen to an all time high While Joseph Lowman's revised second edition of this widely praised work retains the vision of exemplary teaching presented in the original it has been completely updated to reflect the results of a wealth of additional research 140 new references appear in this second edition and practice Lowman presents for the first time a new learning model that details the relative strength of six sources of influence on what and how much students learn in a college course He expands his earlier model of effective teaching to place more emphasis on motivational skill and commitment to teaching And he presents still more options on how to organize classes and use group work to promote learning This second edition also includes an expanded checklist to help college teachers analyze their classroom performance on videotape detailed instructions on how to use videotape analysis to improve teaching and a new approach to evaluating college teaching based on Lowman's expanded model of exemplary teaching

Wesolowski, Arnie H. Zencius, 2013-06-29 Behavioral neuropsychology presents at once a challenge and an opportunity for the field of behavior analysis A great diversity of problem areas including education classroom management child rearing

retardation and industry have been treated effectively by the behavior analytic approach which has traditionally and quite deliberately chosen to deemphasize physiology and cognitive variables Yet brain injury by its nature entails neurological insult that is often closely related to specific cognitive dysfunctions The challenge for behavior analysis is to develop effective treatments for a disorder with such clearly defined tripartite characteristics The opportunity exists for behavior analysis to expand its conceptual basis as well as to provide benefits to patients otherwise despairing of assistance Case histories demonstrate over 20 years of successful applications of behavior analysis to brain injured individuals indicating that some applications are possible but are these reports notable exceptions or the harbingers of a new general therapeutic approach The present book describes an overall focused behavioral program for dealing with the diversity of brain injury problems in a general brain injury rehabilitation setting The authors describe what types of neurological damage are associated with specific types of cognitive emotional dysfunction and in turn with specific types of behavioral dysfunction thereby demonstrating how the choice of behavioral treatment is guided by the neurological and subjective assessment The result is a conceptually unified approach The distinctive value of this book lies in the detail as well as the programmatic guidelines for actual implementation of this behavioral approach
