journeying to become visionary creator and architect of strategy *Management of Network Organizations* Włodzimierz Sroka, Štefan Hittmár, 2015-06-05 Effective management is crucial to the success of network organizations and can reduce the risk inherently associated with cooperative strategy This contributed volume addresses the management of network organizations from both theoretical and practical perspectives as well as an international standpoint in the form of selected cases from various Central European countries The authors claim that without some type of network management irrespective of the type of network it is impossible to effectively compete with other companies and or networks As network organizations are representative of a broad range of possible network types i e alliance networks clusters outsourcing and virtual organizations this book presents various perspectives on the management of network organizations The book features articles from different scholars who have practical experience in network organizations written in simple and easy to follow language with a wide application of practical cases Given its successful combination of theory and practice together with the nature of the texts presented the book offers a valuable resource for a broad readership including scholars managers and management science students **Towards an Integrative Approach to Alliance Failure** Jan-Philipp Büchler, 2006-02-06 Inhaltsangabe Abstract The past decade has seen increased academic interest in strategic alliances because alliances have developed to a centerpiece of corporate strategy The number of newly formed alliances has been growing at more than 25 percent annually throughout the last decade and most large companies have at least 30 alliances many have more than 100 in their alliance portfolio According to empirical studies about 90 percent of the questioned companies are embedded in one or more alliances which seem to be proliferating with increasing competition and globalization Yet despite the ubiquity of strategic alliances reality shows that many alliances fail They do not meet the goals of the parent companies and fall short of expectation for different reasons i e alliances do not perform as intended Empirical researchers find that between 30 percent and 70 percent of alliances fail However there is neither a comprehensive understanding of alliance failure and success nor a managerial framework that would allow to improve alliance performance Although a number of theoretical approaches as well as empirical studies have developed possible answers for the understanding of alliance failure by examining single factors the review of the existing literature and investigation into the different theories shows that the reasoning is of a narrow view To date researchers mostly pay attention to individual aspects but do not hold a holistic perspective Most studies attribute failure to a wide range of factors including cultural technical financial structural and strategic aspects The identified factors are neither wrong nor right but based on different assumptions and views that still remain unclassified unstructured and incomparable Due to overlaps imprecise terms and a missing conceptual framework the outcome is very limited in terms of explanation of alliance failure and success Thus the literature on alliance failure does not provide an adequate view of the interdependence and system of the identified factors Furthermore researchers have not developed a multidimensional and systematic framework for the analysis of alliance failure and success so far The importance of the

interdependence amongst different alliance failure factors is not reflected in the existing literature Due to the high rate of failure of strategic alliances and the lack of a systematic and coherent understanding of the influencing factors of failure
