Green Rage Radical Environmentalism And The Unmaking Of Civilization:

Green Rage Christopher Manes,1990-01-01 Written from within the radical environmental movement this work calls into question not only the wisdom but the legitimacy of humanity's domination of nature **From Environmental Action to Ecoterrorism?** Gerry Nagtzaam,2017-01-27 This book scrutinizes the growth of the eco terrorism movement operating on a global scale focusing on the main groups and their more radical offshoots both historically and those currently active These include Earth First the Earth Liberation Front the Animal Liberation Front and the Sea Shepherd Conservation Society It critically examines how these groups form and how they have evolved their key personnel their strategies and tactics principles motivating philosophies and attitudes to violence Specifically the book seeks to understand whether such groups inevitably evolve from activists to militants to terrorists as the literature suggests Lastly it considers the future of such groups asking whether they will become more prominent as more people become ecologically aware and as global environmental conditions deteriorate or whether such groups have peaked as a force for environmental change

Environmental and Animal Rights Extremism, Terrorism, and National Security Elzbieta Posluszna,2015-01-29 As concerns about human treatment of the environment and animals have increased over the years so have decentralized and extremist groups related to these causes Environmental and Animal Rights Extremism Terrorism and National Security analyzes the international development of radical movements relating to environmental concerns and animal rights in the context of the threats they pose to national security In addition to tracing the factors responsible for the rapid growth of these movements over the last 25 years this text presents countermeasures that governments can deploy to neutralize the risk posed by these threats now and in the future Bringing to bear new developments such as cyber activity and online activism Environmental and Animal Rights Extremism Terrorism and National Security offers an examination of the direct and indirect violence lone wolf terrorism and leaderless resistance that have characterized these radical wings from their inception By not only identifying the tactics and organizational structures often employed by these groups but also addressing future trends toward increased radicalization Environmental and Animal Rights Extremism Terrorism and National Security is an important resource for identifying anticipating and mitigating threats posed by such movements Describes the psychological social and organizational mechanisms responsible for the functioning of the extremist wings of the interconnected environmental and animal rights movements in the context of national security Identifies the main tactical and organizational ways these movements develop moving from hierarchical organization to network structures leaderless resistance and lone wolf activities Covers radical environmental and animal rights groups including Earth First Animal Liberation Front Earth Liberation Front Animal Rights Militia and the Sea Shepherd Conservation Society Looks to future trends in radicalization of these movements Political Ideologies and the Democratic Ideal Terence Ball,Richard Dagger,Daniel I. O'Neill,2016-08-31 Political Ideologies and the Democratic Ideal analyzes and compares political ideologies

Direct Action
L.A. Kauffman, 2017-02-21 A longtime insider explores the origins of modern protest movements like Black Lives Matter and Occupy Wall Street offering a groundbreaking history of disruptive protest and American radicalism since the Sixties As Americans take to the streets in record numbers L A Kauffman s timely trenchant history of protest offers unique insights into how past movements have won victories in times of crisis and backlash and how they can be most effective today This deeply researched account twenty five years in the making traces the evolution of disruptive protest since the Sixties to tell a larger story about the reshaping of the American left Kauffman a longtime grassroots organizer examines how movements from ACT UP to Occupy Wall Street to Black Lives Matter have used disruptive tactics to catalyze change despite long odds Kauffman s lively and elegant history is propelled by hundreds of candid interviews conducted over a span of decades Direct Action showcases the voices of key players in an array of movements environmentalist anti nuclear anti apartheid feminist LGBTQ anti globalization racial justice anti war and more across an era when American politics shifted to the right and a constellation of decentralized issue and identity based movements supplanted the older ideal of a single unified left Now as protest movements again take on a central and urgent political role Kauffman s history offers both striking lessons for the current moment and an unparalleled overview of the landscape of recent activism Written with nuance and humor Direct Action is essential reading for anyone interested in understanding the protest movements of our time The best overview of how protest works when it does and what it s achieved over the past 50 years Rebecca Solnit The New York Times

Ecofeminist Natures Noel Sturgeon, 2016-01-08 Examining the development of ecofeminism from the 1980s antimilitarist movement to an internationalist ecofeminism in the 1990s Sturgeon explores the ecofeminist notions of gender race and

nature She moves from detailed historical investigations of important manifestations of US ecofeminism to a broad analysis of international environmental politics

The Origins of Modern Environmental Thought J. Edward de Steiguer, 2006-09-15 The Origins of Modern Environmental Thought provides readers with a concise and lively introduction to the seminal thinkers who created the modern environmental movement and inspired activism and policy change Beginning with a brief overview of the works of Thoreau Mill Malthus Leopold and others de Steiguer examines some of the earliest philosophies that underlie the field He then describes major socioeconomic factors in post World War II America that created the milieu in which the modern environmental movement began with the publication of Rachel Carson s Silent Spring The following chapters offer summaries and critical reviews of landmark works by scholars who helped shape and define modern environmentalism Among others de Steiguer examines works by Barry Commoner Paul Ehrlich Kenneth Boulding Garrett Hardin Herman Daly and Arne Naess He describes the growth of the environmental movement from 1962 to 1973 and explains a number of factors that led to a decline in environmental interest during the mid 1970s He then reveals changes in environmental awareness in the 1980s and concludes with commentary on the movement through 2004 Updated and revised from The Age of Environmentalism this expanded edition includes three new chapters on Stewart Udall Roderick Nash and E F Schumacher as well as a new concluding chapter bibliography and updated material throughout This primer on the history and development of environmental consciousness and the many modern scholars who have shaped the movement will be useful to students in all branches of environmental studies and philosophy as well as biology economics and physics

Bioregionalism and Global Ethics Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures

and natural environments which allow for the flourishing of both

A New Understanding of Terrorism M.R. Haberfeld, Agostino Hassell, 2009-07-09 Terrorism is a complex phenomenon that cannot be understood through reading of a number of unrelated academic articles or a dry overview of the history of terrorism or the investigative techniques For A New Understanding of Terrorism the Editors have chosen a different paradigm They have selected numerous case studies from actual events that illustrate various typologies of terrorist actions be it from a separatist nationalist lone wolf individual terrorist religious fanatics or environmentalist orientation and they present these cases within the context of following the trajectories of the terrorist activity the terrorist act itself and the response to the event from the relevant authorities Some chapters concentrate on terrorist attacks that actually took place others speculate about the possibilities of an attack occurring sometime in the future such as the chapters on the Olympic Games Aviation or Rail Security When possibilities rather than a specific event are discussed the authors of these chapters draw the attention of the reader towards the same direction the reasoning the actual event and the response that followed The thorough analysis of the presented case studies and the applied counter measures will hopefully if not curtail then possibly at least mitigate the operational and ideological strength of terrorist groups or individual actors A New Understanding of Terrorism will enable the reader to make the connection between the emotional charge inherent in any terrorist activity the cold blooded tactics that lead to the terrorist event itself and the pragmatic and very straightforward but at the same time very simplistically designed strategic response that has to come from a synergy between academics military and law enforcement brainstorming design in order to be more effective in the future

ABOUT THE EDITORS M R Maki Haberfeld is a Professor of Police Science at John Jay College of Criminal Justice in New York City She has worked for the U S Drug Enforcement Administration in the New York Field Office as a special consultant Prior to that she has served in a counter terrorist unit in the Israeli Defense Forces and she left the army at the rank of Sergeant She was also a lieutenant in the Israel National Police For the past eight years Dr Haberfeld has been involved in developing coordinating and teaching in a special training program for the New York City Police Department where she teaches courses in police ethics leadership and counter terrorism She was also an Academic Coordinator of the Law Enforcement Executive Police Institute for the State of New York where she taught modules on counter terrorism response Agostino von Hassell is the president of The Repton Group LLC a New York City based consulting group that deals mostly with national security issues He has written numerous political and historical articles and is the author of two major military histories Warriors The United States Marine Corps and Strike Force Marine Corps Special Operations In 2003 he published a pictorial portrait of the United States In Honor of America He has taught as an adjunct professor in the graduate program of John Jay College of Criminal Justice in New York teaching members of the New York City Police Department in subjects such as counter terrorism and leadership He is a life member of the United States Marine Corps Combat Correspondents the National Defense Industry Association the Association of Former Intelligence Officers and

the Authors Guild **International Environmental Law** Gerry Nagtzaam, Evan van Hook, Douglas Guilfoyle, 2019-10-23
 This book seeks to better understand how International Environmental Law regimes evolve The authors address throughout the major environmental economic and political tensions that have both shaped and constrained the evolution of international environmental policy within regimes and its expression in international legal rule and norm development Readers will gain an increased understanding of the growing role played by non state actors in global environmental governance including environmental non government organisations scientists the United Nations and corporations The authors also look ahead to the future of International Environmental Law evaluating key challenges and decisions that the discipline will face The text is clear concise and accessible It is ideally suited to students and professionals interested in International Environmental Law and individuals who are intrigued by this dynamic area of law *Nature Writing* Don Scheese, 2013-10-28 In this comprehensive study of the genre Don Scheese traces its evolution from the pastoralism evident in the natural history observations of Aristotle and the poetry of Virgil to current American writers He documents the emergence of the modern form of nature writing as a reaction to industrialization Scheese s personal observations of natural settings sharpen the reader s understanding of the dynamics between author and locale His study is further informed by ample use of illustrations and close readings core writers such as Thoreau John Muir and Mary Austin showing how each writer s work exemplifies the pastoral tradition and celebrate a spirit of place in the United States **The Politics of the Earth** John S. Dryzek, 2022 John Dryzek provides an accessible introduction to thinking about the environment by looking at the way people use language on environmental issues He analyses the main discourses from the last 30 years and those likely to be influential in future **Environmental Sociology** John Hannigan, 2022-09-09 John Hannigan s definitive textbook offers a distinctive balanced coverage of environmental issues policies and action This revised fourth edition has been expanded and fully updated to explore contemporary developments and issues within global environmental sociology Environmental Sociology reconciles Hannigan s widely cited model of the social construction of environmental problems and controversies which states that incipient environmental issues must be identified researched promoted and persuasively argued in the form of claims with an environmental justice perspective that stresses inequality and threats to local communities For example this new edition explores the interconnections between indigenous communities and environmental activists via a study of the difficult relationship between Aboriginal people and environmentalists in Australia The updated fourth edition also discusses new direct action protest groups such as Extinction Rebellion who have reframed the discourse around the climate emergency using apocalyptic language and imagery Environmental Sociology also signposts exciting new directions for future research The fourth edition re interrogates the classical roots of environmental theory with a focus of the work of Alexander von Humboldt Hannigan also asserts the need for environmental sociologists to turn their attention to The Forgotten Ocean arguing that the discipline should incorporate cutting edge concepts such as marine justice striated space

and volumetrics Environmental Sociology is a key text for students and researchers in environmental studies political ecology social geography and environmental sociology Federal Land, Western Anger R. McGreggor Cawley,1993 Cawley objectively investigates the Sagebrush Rebellion looking at the driving force behind the movement the strategies used by the Rebels and the consequences of the controversy He also offers a provocative interpretation of events in federal land policy from the 1960s to the 1990s and establishes a framework for assessing future developments in federal land policy Includes an analysis of James Watt s beleaguered tenure as Reagan s Secretary of the Interior **Environmental Crime and**

Criminality Sally M. Edwards,Terry D. Edwards,Charles B. Fields,2013-08-01 First published in 1996 One of the primary goals of this series has been to explore new areas of criminology and criminal justice topics that constitute the frontiers of the field This work edited by Sally Edwards Terry Edwards and Charles Fields exemplifies that purpose in its coverage of environmental crime While corporate and political crime developed slowly into mainstream criminology over the last half century environmental crime as an area of emphasis is still in its infancy It is unusual to have many varied and informative perspectives early in a subject s development This volume however demonstrates that many people are already examining environmental crime perhaps as an extension of both the greater environmental movement and the broadening of the popular parameters of crime Critical Issues in Homeland Security James D. Ramsay,Linda A. Kiltz,2018-04-27 Critical Issues in

Homeland Security A Casebook encourages analytical and careful examination of practical homeland security problems through the presentation of contemporary cases involving major state or national events Case studies demonstrate the complexity of challenges within the domain of homeland security policy and administration Editors James D Ramsay and Linda Kiltz carefully curated fourteen cases all from top scholars and practitioners to cover a broad range of legal policy and operational challenges within the field of homeland security Timely and interesting cases on such issues as arctic security the use of drones in targeted killings cyber security and the emergency management lessons of the 2010 Haiti earthquake give students a deeper understanding of the relationship between the theories and the practices of homeland security Discussion questions at the end of each case and an online instructor s manual make Critical Issues in Homeland Security an even more effective learning tool for any homeland security program **Extreme Deviance** Erich Goode,D. Angus Vail,2008 This book

takes a look at normative violations that earn the violators a deviant identity in the eyes of the members of mainstream society And so serious likewise that the lives of violators do revolve around the actions the beliefs or the characteristics as well as the consequences such violations have mainly with respect to the social reactions they generate in others When others really don t like what you do believe or are they usually let you know that in no uncertain terms and this is likely to drastically alter your life The Power of the Periphery Peder Anker,2020-05-28 Examines how Norway has positioned itself as an alternative environmentally sound nation in a world filled with tension and instability **The Terrorist Argument** Christopher C. Harmon,Randall G. Bowdish,2018-01-09 From chants and pamphlets to the Internet terrorist propaganda can

be deadly effective Propaganda used by terrorists and armed groups might not always be the most sophisticated or nuanced form of rhetoric but with the right mix of emotion and logic it can be extremely effective in motivating supporters and frightening opponents This book examines how terrorist groups in recent history have used propaganda and how they had adapted to new communications technologies while retaining useful techniques from the past Harmon and Bowdish trace how armed groups and terrorists around the globe have honed their messages for maximum impact both on the communities they hope to persuade to support them and on the official state organs they hope to overthrow Sometimes both the messages and the techniques are crude others are highly refined carefully crafted appeals to intellect or emotion embracing the latest forms of communications technology Whatever the ideas or methodology all are intended to use the power of ideas along with force to project an image and to communicate not merely intimidate The Terrorist Argument uses nine case studies of how armed groups have used communications techniques with varying degrees of success radio newspapers song television books e magazines advertising the Internet and social media It is fascinating reading for anyone interested in civil conflict terrorism communications theory and practice or world affairs in general

Handbook of Political Citizenship and Social Movements Hein-Anton van der Heijden, 2014-10-31 This Handbook uniquely collates the results of several decades of academic research in these two important fields The expert contributions successively address the different forms of political citizenship and current approaches and recent development
