Sutton, 2015-06-04 This book provides an up to date coverage of green vegetated roof research design and management from an ecosystem perspective It reviews explains and poses questions about monitoring substrate living components and the abiotic biotic and cultural aspects connecting green roofs to the fields of community landscape and urban ecology The work contains examples of green roof venues that demonstrate the focus level of detail and techniques needed to understand the structure function and impact of these novel ecosystems Representing a seminal compilation of research and technical knowledge about green roof ecology and how functional attributes can be enhanced it delves to explore the next wave of evolution in green technology and defines potential paths for technological advancement and research

Sustainable Surface Water Management Susanne M. Charlesworth, Colin A. Booth, 2016-09-13 Sustainable Surface Water Management a handbook for SUDS addresses issues as diverse as flooding water quality amenity and biodiversity but also mitigation of and adaptation to global climate change human health benefits and reduction in energy use Chapters are included to cover issues from around the world but they also address particular designs associated with the implementation of SUDS in tropical areas problems

with retrofitting SUDS devices SUDS modelling water harvesting in drought stricken countries using SUDS and the inclusion of SUDS in the climate change strategies of such cities as Tokyo New York and Strasbourg

Ecology, Planning, and Management of Urban Forests Margaret M. Carreiro, Yong-Chang Song, Jianguo Wu, 2007-10-31 It has been increasingly recognized that trees and vegetation in urban areas provide a number of ecological services beyond beautifying cities The purpose of urban forestry is to use trees and natural habitat patches to ameliorate negative environmental impacts of cities and to contribute to the creation of more livable ecological sustainable cities Ecology Planning and Management of Urban Forests takes an international approach to sharing knowledge about the management of urban forests that has been learned through studies in many different regions This allows the reader to evaluate methods and management that are appropriate for particular geographic environmental and socio political contexts Urban forests are also approached on regional and landscape scales to encompass more natural environments in and around cities rather than within arbitrary municipal boundaries

Regreening the Built Environment Michael A. Richards, 2024-09-18 Now in its second volume Regreening the Built Environment provides an overview of physical and social environmental challenges that the planet is facing and presents solutions that restore ecological processes reclaim open space foster social equity and facilitate a green economy Healing the planet requires a combination of strategies networked across multiple scales of development including buildings sites communities and regions Case studies from a range of locations in the United States Denmark Vietnam Germany South Korea Switzerland France and the United Kingdom among others demonstrate how existing gray infrastructure can be retrofitted with green infrastructure and low impact development techniques From this the author shows how a building can be designed that creates greenspace or generates energy likewise a roadway can be a parkway an alley can be a wildlife corridor and a parking surface can be a garden This new edition also includes case studies that have successfully reconnected communities that were fragmented by unjust planning practices and irresponsible patterns of development resilient design solutions in response to natural disasters passive design strategies that can make interior spaces more efficient and healthier and expanded discussions on capturing carbon renewable energy agriculture waste public transit and adaptive reuse including innovative ideas on how to reimagine the shopping mall in the era of e commerce The strategies presented in this book will stimulate discussions within the design profession and will be of great interest to students and practitioners of environmental studies architecture landscape architecture and urban design

The Green Studio Handbook Alison G Kwok, Walter Grondzik, 2018-01-19 The Green Studio Handbook remains an essential resource for design studios and professional practice This extensive and user friendly tool presents practical guidelines for the application of green strategies during the schematic design of buildings Students and professionals can quickly get up to speed on system viability and sizing Each of forty three environmental strategies includes a brief description of principles and concepts step by step guidance for integrating the strategy during the early stages of design annotated tables and charts to assist with preliminary

sizing key issues to consider when implementing the strategy and pointers to further resources Ten new in depth case studies illustrate diverse and successful green buildings integrated design projects and how the whole process comes together This third edition features updated tables and charts that will help to save energy water and material resources during the early stages of design More than 500 sketches and full color images illustrate how to successfully apply strategies A glossary a project index listing 105 buildings in 20 countries updated tables and drawings and I P and SI units increase the usefulness of The Green Studio Handbook
