The Handbook of Formal Methods in Human-Computer Interaction Benjamin Weyers,Judy Bowen,Alan Dix,Philippe Palanque,2017-04-24 This book provides a comprehensive collection of methods and approaches for using formal methods within Human Computer Interaction HCI research the use of which is a prerequisite for usability and user experience UX when engineering interactive systems World leading researchers present methods tools and techniques to design and develop reliable interactive systems offering an extensive discussion of the current state of the art with case studies which highlight relevant scenarios and topics in HCI as well as presenting current trends and gaps in research and future opportunities and developments within this emerging field The Handbook of Formal Methods in Human Computer Interaction is intended for HCI researchers and engineers of interactive systems interested in facilitating formal methods into their research or practical work **Transactions of the Second Army Conference on Applied Mathematics and Computing** ,1986 A Guide to Numerical Modelling in Systems Biology Peter Deuflhard,Susanna Röblitz,2015-07-06 This book is intended for students of computational systems biology with only a limited background in mathematics Typical books on systems biology merely mention algorithmic approaches but without offering a deeper understanding On the other hand mathematical books are typically unreadable for computational biologists The authors of the present book have worked hard to fill this gap The result is not a book on systems biology but on computational methods in systems biology This book originated from courses taught by the authors at Freie Universit t Berlin The guiding idea of the courses was to convey those mathematical insights that are indispensable for systems biology teaching the necessary mathematical prerequisites by means of many illustrative examples and without any theorems The three chapters cover the mathematical modelling of biochemical and physiological processes numerical simulation of the dynamics of biological networks and identification of model parameters by means of comparisons with real data Throughout the text the strengths and weaknesses of numerical algorithms with respect to various systems biological issues are discussed Web addresses for downloading the corresponding software are also included **Automated Solution of Differential Equations by the Finite Element Method** Anders Logg,Kent-Andre Mardal,Garth Wells,2012-02-24 This book is a tutorial written by researchers and developers behind the FEniCS Project and explores an advanced expressive approach to the development of mathematical software The

presentation spans mathematical background software design and the use of FEniCS in applications Theoretical aspects are complemented with computer code which is available as free open source software The book begins with a special introductory tutorial for beginners Following are chapters in Part I addressing fundamental aspects of the approach to automating the creation of finite element solvers Chapters in Part II address the design and implementation of the FEnicS software Chapters in Part III present the application of FEniCS to a wide range of applications including fluid flow solid mechanics electromagnetics and geophysics *Formal Methods and Software Engineering* Shaoying Liu,Keijiro Araki,2008-10-08 This book constitutes the refereed proceedings of the 10th International Conference on Formal Engineering Methods ICFEM 2008 held in Kitakyushu City Japan October 2008 The 20 revised full papers together with 3 invited talks presented were carefully reviewed and selected from 62 submissions The papers address all current issues in formal methods and their applications in software engineering They are organized in topical sections on specification and verification testing verification model checking and analysis tools application of formal methods semantics **Computer Algebra** R. Albrecht,B. Buchberger,G.E. Collins,R. Loos,2013-06-29 The journal Computing has established a series of supplement volumes the fourth of which appears this year Its purpose is to provide a coherent presentation of a new topic in a single volume The previous subjects were Computer Arithmetic 1977 Fundamentals of Numerical Computation 1980 and Parallel Processes and Related Automata 1981 the topic of this 1982 Supplementum to Computing is Computer Algebra This subject which emerged in the early nineteen sixties has also been referred to as symbolic and algebraic computation or formula manipulation Algebraic algorithms have been receiving increasing interest as a result of the recognition of the central role of algorithms in computer science They can be easily specified in a formal and rigorous way and provide solutions to problems known and studied for a long time Whereas traditional algebra is concerned with constructive methods computer algebra is furthermore interested in efficiency in implementation and in hardware and software aspects of the algorithms It develops that in deciding effectiveness and determining efficiency of algebraic methods many other tools recursion theory logic analysis and combinatorics for example are necessary In the beginning of the use of computers for symbolic algebra it soon became apparent that the straightforward textbook methods were often very inefficient Instead of turning to numerical approximation methods computer algebra studies systematically the sources of the inefficiency and searches for alternative algebraic methods to improve or even replace the algorithms Emerging Technologies in Agriculture and Food Science Karim Ennouri,2020-10-29 Cultivators and livestock farmers are increasingly arranging innovative technical and scientific estimations with the aim to enhance agricultural sustainability effectiveness and plant health Innovative farming technologies incorporate biology with smart technology computers and sensor devices exchanging information with one another autonomously in a structured farm management system This book presents reviews on innovative techniques and methodologies to complement conventional plant control and breeding attempts toward enhancing

crop yield and production Reviews covered in this volume include Active compounds from pomegranate seeds Application of Enterococci and their bacteriocins for meat biopreservation Technological advancement in the detection and identification of plant pathogens Machine learning for precision agriculture Use of remote sensing technology and geographic information systems for agriculture and environmental observation The information presented in this volume will provide helpful updates for students technology experts and professionals in the food security and sustainable agriculture sectors **HCI for Children with Disabilities** Josefina Guerrero-Garcia,Juan Manuel González-Calleros,Jaime Muñoz-Arteaga,César A. Collazos,2017-05-03 In this book the authors present an HCI principle based approach to develop applications to assist children with disabilities Design knowledge related to developing complex solution for this audience is explained from an interaction design point of view Different methodologies models and cases studies are covered with the aim of helping practitioners to adopt any of the proposed techniques presented in this book HCI methodologies that adopt an agile strategy are presented including novel techniques at different development steps such as board games agile planning agile implementation method engineering As this is a huge research field the authors do not just focus on a specific disability but test their methods in different contexts with excellent results Readers of this book will find both a well organized and structured set of methodologies and also material that has been tested and refined throughout years of research Using detailed case studies the reader is guided towards specific solutions which will also provide insights into how to address related problems **Computer Science and Education in Computer Science** Tanya Zlateva,Georgi Tuparov,2025-03-13 This book constitutes the refereed post conference proceedings of the 20th International Conference on Computer Science and Education in Computer Science CSECS 2024 held in Sofia Bulgaria during June 28 30 2024 The 19 full papers and 4 short papers were carefully reviewed and selected from 49 submissions The papers cover the following topics Computer Science Implementations Computational Math Computing Technologies Implementations in Medicine Engineering Implementations Education in Computer Science
