Henri Labrouste Structure Brought To Light:

Henri Labrouste Henri Labrouste, Corinne Bélier, Barry Bergdoll, Marc Le Cœur, Martin Bressani, 2012 Henri Labrouste is one of the few nineteenth century architects consistently lionized as a precursor of modern architecture throughout the twentieth century and into our own time The two magisterial glass and iron reading rooms he built in Paris gave form to the idea of the modern library as a collective civic space His influence was both immediate and long lasting not only on the development of the modern library but also on the exploration of new paradigms of space materials and luminosity in places of great public assembly Published to accompany the first exhibition devoted to Labrouste in the United States and the first anywhere in the world in nearly 40 years this publication presents nearly 225 works in all media including drawings watercolors vintage and modern photographs film stills and architectural models Essays by a range of international architecture scholars explore Labrouste's work and legacy through a variety of approaches

The Tacit Dimension Lara Schrijver, 2021-05-03 In architecture tacit knowledge plays a substantial role in both the design process and its reception The essays in this book explore the tacit dimension of architecture in its aesthetic material cultural design based and reflexive understanding of what we build Tacit knowledge described in 1966 by Michael Polanyi as what we can know but cannot tell often denotes knowledge that escapes quantifiable dimensions of research Much of architecture's knowledge resides beneath the surface in nonverbal instruments such as drawings and models that articulate the spatial imagination of the design process Awareness of the tacit dimension helps to understand the many facets of the spaces we inhabit from the ideas of the architect to the more hidden assumptions of our cultures Beginning in the studio where students are guided into becoming architects the book follows a path through the tacit knowledge present in materials conceptual structures and the design process revealing how the tacit dimension leads to craftsmanship and the situated knowledge of architecture in the world Contributors Tom Avermaete ETH Zürich Margitta Buchert Leibniz Universität Hannover Christoph Grafe Bergische Universität Wuppertal Mari Lending The Oslo School of Architecture and Design Angelika Schnell Academy of Fine Arts Vienna Eireen Schreurs Delft University of Technology Lara Schrijver University of Antwerp

Building Theories Franca Trubiano, 2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L'Orme Le Camus de Mézières Boullée Laugier Rondelet Semper Viollet le Duc Hebsch Betticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive

definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect s composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material

transformations have always been at the origins of built form **Quatremère de Quincy** David Gilks,2024-05-31 Antoine Chrysosth me Quatrem re de Quincy 1755 1849 was the most distinguished writer on art and architecture at the end of the enlightenment However as David Gilks shows in Quatrem re de Quincy Art and Politics during the French Revolution he was never simply an esoteric antiquarian and theoretician he was also a zealous functionary and skilled publicist whose writings on the arts often served political purposes Quatrem re de Quincy Art and Politics during the French Revolution demonstrates how Quatrem re s early writings on art and antiquity formed the foundation for a politics grounded in faith authority and hierarchy that favoured gradual social and political evolution over destruction and experimentation Gilks then traces how Quatrem re set aside his antiquarian research and became a royalist politician and publicist during the revolutionary decade Quatrem re feared that the Revolution would destroy the cosmopolitan republic of letters that had flourished when states across Europe supported the papacy s rediscovery of the past restoration of taste and revival of learning Yet Gilks reveals that Quatrem re was also a resourceful and an opportunistic political actor who deployed his opponents language for strategic reasons Gilks therefore reinterprets Quatrem re s interventions by situating them in their polemical contexts and treating them as contributions to debates and quarrels by locating his sources and reconstructing his social and political networks The resulting study revises our understanding of Quatrem re s famous reflections on the Academy of Painting and Sculpture the Panth on art plunder and museums but it also discovers and sheds light on previously ignored writings Although the study focuses on the period 1789 1799 it examines the second half of Quatrem re s life to substantiate his commitment to crown and altar and show how he fought against the Revolution s legacy of godless materialism and calculation that was inimical to the arts This is a thoroughly researched and richly detailed contextual study of the most eventful period in Quatrem re s life but it also offers an original and unfamiliar history of the French Revolution Gilks integrates the study of political power with the history of ideas and art history and provides a window into institutional and legal reforms and debates about cultural patronage and education Horace Vernet and the Thresholds of Nineteenth-Century Visual Culture Daniel Harkett,Katie Hornstein,2017-03-07 This collection reconsiders the life and work of Emile Jean Horace Vernet 1789 1863 presenting him as a crucial figure for understanding the visual culture of modernity

The book includes work by senior and emerging scholars showing that Vernet was a multifaceted artist who moved with ease across the thresholds of genre and media to cultivate an image of himself as the embodiment of modern France In tune with his times skilled at using modern technologies of visual reproduction to advance his reputation Vernet appealed to patrons from across the political spectrum and made works that nineteenth century audiences adored Even Baudelaire who reviled Vernet and his art and whose judgment has played a significant role in consigning Vernet to art historical obscurity acknowledged that the artist was the most complete representative of his age For those with an interest in the intersection of art and modern media politics imperialism and fashion the essays in this volume offer a rich reward

Patience and Fortitude Scott Sherman,2017-09-26 A riveting investigation of a beloved library caught in the crosshairs of real estate power and the people s interests by the reporter who broke the story In a series of cover stories for The Nation magazine journalist Scott Sherman uncovered the ways in which Wall Street logic almost took down one of New York City s most beloved and iconic institutions the New York Public Library In the years preceding the 2008 financial crisis the library s leaders forged an audacious plan to sell off multiple branch libraries mutilate a historic building and send millions of books to a storage facility in New Jersey Scholars researchers and readers would be out of luck but real estate developers and New York s Mayor Bloomberg would get what they wanted But when the story broke the people fought back as famous writers professors and citizens groups came together to defend a national treasure Rich with revealing interviews with key figures *Patience and Fortitude* is at once a hugely readable history of the library s secret plans and a stirring account of a rare triumph against the forces of money and power

Healing Spaces, Modern Architecture, and the Body Sarah Schrank, Didem Ekici, 2016-07-15 Healing Spaces Modern Architecture and the Body brings together cutting edge scholarship examining the myriad ways that architects urban planners medical practitioners and everyday people have applied modern ideas about health and the body to the spaces in which they live work and heal The book s contributors explore North American and European understandings of the relationship between physical movement bodily health technological innovation medical concepts natural environments and architectural settings from the nineteenth century through the heyday of modernist architectural experimentation in the 1920s and 1930s and onward into the 1970s Not only does the book focus on how professionals have engaged with the architecture of healing and the body it also explores how urban dwellers have strategized and modified their living environments themselves to create a kind of vernacular modernist architecture of health in their homes gardens and backyards This new work builds upon a growing interdisciplinary field incorporating the urban humanities geography architectural history the history of medicine and critical visual studies that reflects our current preoccupation with the body and its corresponding therapeutic culture

The Architects of Ottoman Constantinople Alyson Wharton-Durgaryan, 2015-02-26 The Balyan family were a dynasty of architects builders and property owners who acted as the official architects to the Ottoman Sultans throughout the 18th and 19th centuries Originally Armenian the family is responsible for some of the most famous Ottoman buildings in existence many of which are regarded as masterpieces of their period including the Dolmabah e Palace built between 1843 and 1856 parts of the Topkap Palace the ra an Palace and the Ortak y Mosque Forging a unique style based around European contemporary architecture but with distinctive Ottoman flourishes the family is an integral part of Ottoman history As Alyson Wharton s beautifully illustrated book reveals the

Balyan's own history of falling in and out of favour with increasingly autocratic Sultans serves as a record of courtly power in the Ottoman era and is uniquely intertwined with the history of Istanbul itself

Function and Fantasy: Iron Architecture in the Long Nineteenth Century Paul Dobraszczyk, Peter Sealy, 2016-07-01 The introduction of iron and later steel construction and decoration transformed architecture in the nineteenth century. While the structural employment of iron has been a frequent subject of study, this book re-directs scholarly scrutiny on its place in the aesthetics of architecture in the long nineteenth century. Together its eleven unique and original chapters chart for the first time the global reach of iron's architectural reception from the first debates on how iron could be incorporated into architecture's traditional aesthetics to the modernist cleaving of its structural and ornamental roles. The book is divided into three sections. *Formations* considers the rising tension between the desire to translate traditional architectural motifs into iron and the nascent feeling that iron buildings were themselves creating an entirely new field of aesthetic expression. *Exchanges* charts the commercial and cultural interactions that took place between British iron foundries and clients in far-flung locations such as Argentina, Jamaica, Nigeria and Australia. Expressing colonial control as well as local agency, iron buildings struck a balance between pre-fabricated functionalism and a desire to convey beauty, value and often exoticism through ornament. *Transformations* looks at the place of the aesthetics of iron architecture in the late nineteenth and early twentieth centuries, a period in which iron ornament sought to harmonize wide social ambitions while offering the tantalizing possibility that iron architecture as a whole could transform the fundamental meanings of ornament. Taken together, these chapters call for a re-evaluation of modernism's supposedly rationalist interest in nineteenth-century iron structures, one that has potentially radical implications for the recent ornamental turn in contemporary architecture.

A Delicate Balance: Global Perspectives on Innovation and Tradition in the History of Mathematics David E. Rowe, Wann-Sheng Horng, 2015-05-12 Joseph W. Dauben, a leading authority on the history of mathematics in Europe, China and North America, has played a pivotal role in promoting international scholarship over the last forty years. Cities of Light Sandy Isenstadt, Margaret Maile Petty, Dietrich Neumann, 2014-12-17 *Cities of Light* is the first global overview of modern urban illumination, a development that allows human wakefulness to colonize the night, doubling the hours available for purposeful and industrious activities. Urban lighting is undergoing a revolution due to recent developments in lighting technology and increased focus on sustainability and human-scaled environments. *Cities of Light* is expansive in coverage, spanning two centuries and touching on developments on six continents without diluting its central focus on architectural and urban lighting. Covering history, geography, theory and speculation in urban lighting, readers will have numerous points of entry into the book, finding it easy to navigate for a quick reference and/or a coherent narrative if read straight through. With chapters written by respected scholars and highly regarded contemporary practitioners, this book

will delight students and practitioners of architectural and urban history area and cultural studies and lighting design professionals and the institutional and municipal authorities they serve At a moment when the entire world is being reshaped by new lighting technologies and new design attitudes the longer history of urban lighting remains fragmentary Cities of Light aims to provide a global framework for historical studies of urban lighting and to offer a new perspective on the fast moving developments of lighting today
