Locating August Strindberg's Prose Anna Westerstahl Stenport, 2010-11-01 The setting of a novel is more than just an anonymous interchangeable backdrop In *Locating August Strindberg's Prose* Anna Westerstahl Stenport argues that spatial setting is a key though often neglected tool for exploring the fundamentals of European literary modernism Stenport examines the importance of location by exploring the prose of Swedish exile August Strindberg 1849-1912 challenging previous studies of the author that have focused on identity and subject formation Strindberg wrote in both Swedish and French situating his stories in various places across Europe from Berlin to the French countryside the Austrian Alps and Stockholm to purposely destabilize concepts of national belonging language and literary history Close readings of Strindberg's prose find that his boundary challenging narratives redefine and rewrite the meaning of a marginal literary identity By contextualizing Strindberg against other early modernists including Kafka Conrad Rilke and Breton Stenport emphasizes the burgeoning transnationality of literature at the turn of the last century

Die Landschaft interpretieren: Interdisziplinäre Ansätze Werner Kreisel, Peter H. Marsden, Tobias Reeh, 2021 There is no generally valid recognised definition of what landscape actually is On the basis of its relatedness to the environment to aesthetics territory society politics economics geography planning

ethnology and philosophy the concept of landscape is considered to be a composite notion shaped by a thousand years of Central European ideas and of literary and art history In other words the very term landscape is ambiguous and it is used in different ways both in the scholarly world and everyday speech The aim of this volume is to present various possible approaches to the phenomenon of landscape Far from laying any claim to be exhaustive or comprehensive we have simply tried to do justice to the overarching interdisciplinary approach of the Zentrum für Landschaftsinterpretation und Tourismus ZELT Centre for Landscape Interpretation and Tourism by singling out and addressing individual instances of this fascinating multifaceted phenomenon

Film as World Literature Robin Truth Goodman, 2025-10-16 Redefines the theoretical and thematic contents of world literature by considering it in connection with film What gets lost when we understand film as essentially different from literature What gets lost when we think them essentially the same Does the constructed difference between literature and film also create social and political exclusions exclusions that may exacerbate class struggle or exclusions of certain ways of thinking the future as different Film as World Literature seeks to undo disciplines and disciplinarity the division between film and literature indeed conceals the possibilities of world by bracketing out undisciplined parts Contributors apply ideas of translatability and untranslatability not just as a linguistic exercise of transfers between language groups cultures and national origins but also as an approach to media and transfers between media Is film a visual acknowledgement that literary language is by definition multilingual that is is film a place where political conflicts as Bakhtin observed can be rendered visible Chapters discuss film's relation to world literature not only by considering literary adaptations across nations regions languages ideologies and contexts but also by exploring film's

intersections with literary theory narrative history genre and experimentation Film as World Literature calls for recognition that while the category of world demands a radical defense in the face of risks to democracy the world that literature and film combined bring forth must interrogate the conditions for a future politics of interaction engagement belonging and difference

Nature's Experiments and the Search for Symbolist Form Allison Morehead, 2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices Looking at avant garde figures such as Maurice Denis douard Vuillard August Strindberg and Edvard Munch Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes She shows how the concept of nature's experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists solutions to the problem of symbolist form and provided a ready made methodology for fin de siècle truth seekers By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation automatism the arabesque and madness to create modern works that were radically and usefully strange Focusing on the scientific psychological and experimental tactics of symbolism Nature's Experiments and the Search for Symbolist Form demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism
