Logic And Reality Essays On The Legacy Of Arthur Prior:

Logic and Reality B. Jack Copeland, Jack Copeland, 1996 A N Prior has a special place in the history of postwar philosophy for his highly original work at the intersection of logic and metaphysics His logical innovations have found many applications in the areas of philosophical logic mathematics linguistics and increasingly computer science In addition he made seminal contributions to debates in metaphysics particularly on modality and the nature of time This volume presents a selection of current research in the areas that were of most interest to Prior temporal and tense logic modal logic proof theory quantification and individuation and the logic of agency Both title and contents reflect Prior s view that logic is about the real world and the orientation of the volume is towards the application of logic in philosophy computer science and elsewhere Following Prior modal syntax is now widely applied to the formalization of a variety of subject matters and tense logic has found numerous applications in computing for example in natural language processing logical deduction involving time dependent data program verification and VLSI A special feature of the volume is the inclusion of three hitherto unpublished pieces by Prior on modal logic and the philosophy of time along with a complete bibliography of Prior s published philosophical writings

Logic and Reality Jack Copeland, 2023 *The Reconstruction of A. N. Prior's Ontology* Zuzana Rybaříková, Although the first analytic philosophers were primarily focused on the logical analysis of language some of their initial works also contained ontological discussions One of the most distinct ontological positions of the twentieth century was defended by Arthur Norman Prior The unusual nature of the position could be demonstrated by the fact that he was ascribed to such divergent positions as nominalism and platonism This might have been caused by his atypical combination of ontological views He was on the one hand a nominalist in his mature works On the other hand he advocated intensional logic and presentism The aim of this study is to reconstruct the ideas which influenced him as he formulated his ontological positions Not only are Prior s ideas introduced but also the ideas of his precursors and contemporaries who influenced him In contrast the ideas of logicians and philosophers who Prior opposed are also presented The dissertation consists of four parts which deal with Prior s concepts of possible worlds theories of quantifications propositions and individuals It is a historical study and therefore the polemics which arose after Prior s death are not discussed

Oxford Studies in Metaphysics Volume 1 Dean Zimmerman, 2004-01-08 Oxford Studies in Metaphysics is a major new series dedicated to the timely publication of new work in this highly fertile field of philosophy The subject is broadly construed taken to include not only perennially central topics modality ontology and mereology metaphysical theories of causation laws of nature persistence through time and time itself and realism and anti realism in the many senses of these terms but also the rich clusters of metaphysical questions that open up within other subfields such as philosophy of mind and philosophy of science questions about supervenience and materialism the nature of qualia mental causation metaphysical implications of relativity and quantum physics mereological theories of biological species and so on Besides independent essays volumes will often contain

a critical essay on a recent book or a symposium that allows participants to respond to one another's criticisms and questions Each future volume shall also include an essay by the winner of the Oxford Studies in Metaphysics younger scholar award a prize inaugurated with this first issue

contribute incisive and up to date critical surveys of the principal areas of research The coverage is broad with sections devoted to moral philosophy social and political philosophy philosophy of mind and action philosophy of language metaphysics epistemology and philosophy of the sciences This Handbook will be a rich source of insight and stimulation for philosophers students of philosophy and for people working in other disciplines of the humanities social sciences and sciences who are interested in the state of philosophy today

Conceptions of Truth Wolfgang Künne, 2003-06-06 Truth is one of the most debated topics in philosophy Wolfgang Künne presents a comprehensive critical examination of all major theories Conceptions of Truth is organized around a flow chart comprising sixteen key questions ranging from Is truth a property to Is truth epistemically constrained Künne expounds and engages with the ideas of many thinkers from Aristotle and the Stoics to Continental analytic philosophers like Bolzano Brentano and Kotarbinski to such leading figures in current debates as Dummett Putnam Wright and Horwich He explains many important distinctions between varieties of correspondence for example between different conceptions of making true between various kinds of eternalism and temporalism which have so far been neglected in the literature Künne argues that it is possible to give a satisfactory modest account of truth without invoking problematic notions like correspondence fact or meaning And he offers a novel argument to support the realist claim that truth outruns justifiability The clarity of exposition and the wealth of examples will make Conceptions of Truth an invaluable and stimulating guide for advanced students and scholars in metaphysics epistemology and the philosophy of language

Krister Segerberg on Logic of Actions Robert Trypuz, 2013-10-22 This volume describes and analyzes in a systematic way the great contributions of the philosopher Krister Segerberg to the study of real and doxastic actions Following an introduction which functions as a roadmap to Segerberg's works on actions the first part of the book covers relations between actions intentions and routines dynamic logic as a theory of action agency and deontic logics built upon the logics of actions The second section explores belief revision and update iterated and irrevocable beliefs change dynamic doxastic logic and hypertheories Segerberg has worked for more than thirty years to analyze the intricacies of real and doxastic actions using formal tools mostly modal dynamic logic and its semantics He has had such a significant impact on modal logic that it is hard to roam for long in modal logic without finding Krister Segerberg's traces as Johan van Benthem notes in his chapter of this book

Rationality and Logic Robert

Hanna,2009-01-23 An argument that logic is intrinsically psychological and human psychology is intrinsically logical and that the connection between human rationality and logic is both constitutive and mutual In *Rationality and Logic* Robert Hanna argues that logic is intrinsically psychological and that human psychology is intrinsically logical He claims that logic is cognitively constructed by rational animals including humans and that rational animals are essentially logical animals In order to do so he defends the broadly Kantian thesis that all and only rational animals possess an innate cognitive logic faculty Hanna s claims challenge the conventional philosophical wisdom that sees logic as a fully formal or topic neutral science irreconcilably separate from the species or individual specific focus of empirical psychology Logic and psychology went their separate ways after attacks by Frege and Husserl on logical psychologism the explanatory reduction of logic to empirical psychology Hanna argues however that despite the fact that logical psychologism is false there is an essential link between logic and psychology Rational human animals constitute the basic class of cognizers or thinkers studied by cognitive psychology given the connection between rationality and logic that Hanna claims it follows that the nature of logic is significantly revealed to us by cognitive psychology Hanna s proposed logical cognitivism has two important consequences the recognition by logically oriented philosophers that psychologists are their colleagues in the metadiscipline of cognitive science and radical changes in cognitive science itself Cognitive science Hanna argues is not at bottom a natural science it is both an objective or truth oriented science and a normative human science as is logic itself [The Antipodean Philosopher](#) Graham Oppy,N. N. Trakakis,Lynda Burns,Steven Gardner,Fiona Leigh,2011-02-22 Philosophy in both Australia and New Zealand has been has been experiencing for some time now something of a golden age exercising an influence in the global arena that is disproportionate to the population of the two countries To capture the distinctive and internationally recognised contributions Australasian philosophers have made to their discipline a series of public talks by leading Australasian philosophers was convened at various literary events and festivals across Australia and New Zealand from 2006 to 2009 These engaging and often entertaining talks attracted large audiences and covered diverse themes ranging from local histories of philosophy in particular the fortunes of philosophy in Melbourne Sydney Brisbane Adelaide and New Zealand to discussions of specific topics including love free will religion ecology feminism and civilisation especially as these have featured in the Australasian philosophy and to examinations of the intellectual state of universities in Australasia at the beginning of the twenty first century These talks are now collected here for the first time to provide not only students and scholars but also the wider community with a deeper appreciation of the philosophical heritage of Australia and New Zealand
