Postcolonial Denmark Lars Jensen, 2018-06-28 This book adopts a global approach to analysing Danish nationhood in the current context of a Europe paralysed by crises Focusing on the global strands which have produced understandings of national selfhood as a consequence of a series of historical and contemporary global encounters it calls for the production of narratives which better capture how European nations including Denmark are shaped by narratives that cannot be understood in national isolation but are contingent on ideas about the nation s globality In historical terms this entails examining how colonialism shaped national self perceptions in a contemporary context it requires looking at colonialism s unfinished business The first chapters revisits colonialism throughout the Danish empire In the second section the book revisits Danish post 1945 attempts to restage global interventions and military intervention since 2000 and considers how migration since 1965 has led to a profound questioning of relationships with the non European world and increasingly with Europe itself Postcolonial Denmark situates Denmark at the centre of a number of current and ever more urgent challenges facing Europe As such it will appeal to scholars of sociology political science and cultural studies with interests in Europe the

Nordic region through a postcolonial a whiteness and a decolonial inspired approach
