Great Idea to a Great Company Larry

Kilham, 2015-04-02 This book takes the reader through the essential steps of forming a successful technically based company. Included are such topics as forming a vision, creating a product, patents and trademarks, formulating a business plan, the basics of marketing, finance, production, patents, and all the various elements formal and informal that pull the whole process together. All major points are illustrated by examples drawn primarily from family companies based on inventions. The story telling style captures the attention of beginners as well as seasoned entrepreneurs. The book is very meaty and avoids the mantras over simplification and feel good approaches of many How to business books. **MegaMinds** Larry

Kilham, 2010-08-01 **MegaMinds** How to Create and Invent in the Age of Google explains how people do genius level thinking and how this can be augmented by the new Web based search and invent services. Kilham reviews the major creative epochs and thinkers such as Leonardo da Vinci and Einstein and then moves on to the latest in computer aided thinking. He reviews artificial intelligence and highlights its limitations and then goes on to explore the possibilities with Google and other massive Web based connected collectivized intelligence. Noting that we are entering an era where the lone genius may no longer be equal to solving the problems such as ecology, Kilham proposes new problem solving approaches combining the best of the imaginative and creative individual and the computer. Kilham combines historical research, current laboratory studies using such modern techniques as fMRI and his own experience as an inventor with several successful patents in complex technical areas. He offers suggestions along the way for everyone from emerging inventors and technical problem solvers to research teams seeking to utilize the best in cognitive science and computer technology. **Popular Mechanics**, 1935-10 **Popular Mechanics** inspires, instructs and influences readers to help them master the modern world.
