Kipling's Children's Literature Sue Walsh, 2016-04-22 Despite Kipling's popularity as an author and his standing as a politically controversial figure much of his work has remained relatively unexamined due to its characterization as children's literature Sue Walsh challenges the apparently clear division between children's and adult literature and poses important questions about how these strict categories have influenced critical work on Kipling and on literature in general For example why are some of Kipling's books viewed as children's literature and what critical assumptions does this label produce Why is it that *Kim* is viewed by critics as transcending attempts at categorization Using Kipling as a case study Walsh discusses texts such as *Kim* *The Jungle Books* *the Just So Stories* *Puck of Pook's Hill* and *Rewards and Fairies* re-evaluating earlier critical approaches and offering fresh readings of these relatively neglected works In the process she suggests new directions for postcolonial and childhood studies and interrogates the way biographical criticism on children's literature in particular has tended to supersede and obstruct other kinds of readings

Stuart Succession Literature Paulina Kewes, Andrew McRae, 2019 Moments of royal succession which punctuate the Stuart era 1603 1714 occasioned outpourings of literature Writers including most of the major figures of the seventeenth century from Jonson Daniel and Donne to Marvell Dryden and Behn seized upon these occasions to mark the transition of power to reflect upon the political structures and values of their nation and to present themselves as authors worthy of patronage and recognition This volume of essays explores this important category of early modern writing It contends that succession literature warrants attention as a distinct category appreciated by contemporaries acknowledged by a number of scholars but never investigated in a coherent and methodical manner it helped to shape political reputations and values across the period Benefitting from the unique database of such writing generated by the AHRC funded Stuart Successions Project the volume brings together a distinguished group of authors to address a subject which is of wide and growing interest to students both of history and of literature It illuminates the relation between literature and politics in this pivotal century of English political and cultural history Interdisciplinary in scope the volume will be indispensable to scholars of early modern British literature and history as well as undergraduates and postgraduates in both fields

Cohen,2007-08-09 The cognitive science of religion has made a persuasive case for the view that a number of different psychological systems are involved in the construction and transmission of notions of extranatural agency such as deities and spirits Until now this work has been based largely on findings in experimental psychology illustrated mainly with hypothetical or anecdotal examples In *The Mind Possessed* Emma Cohen considers how the psychological systems undergirding spirit concepts are activated in real world settings Spirit possession practices have long had a magnetizing effect on academic researchers but there have been few if any satisfactory theoretical treatments of spirit possession that attempt to account for its emergence and spread globally Drawing on ethnographic data collected during eighteen months of fieldwork in Bel m northern Brazil Cohen combines fine grained descriptions and analyses of mediumistic activities in an Afro Brazilian cult house with a scientifically grounded explanation for the emergence and spread of ideas about spirits possession and healing Cohen shows why spirit possession and its associated activities are inherently attention grabbing Making a radical departure from traditional anthropological medicalist and sociological analyses she argues that a cognitive approach offers more precise and testable hypotheses concerning the spread and appeal of spirit concepts and possession activities This timely book presents new lines of enquiry for the cognitive science of religion a rapidly growing field of interdisciplinary scholarship and challenges the theoretical frameworks within which spirit possession practices have traditionally been understood
