

BWC Operation:

1. Set the POWER slide switch on the bottom of the Vantage unit to the ON position.

2. Insert and dock the Vantage unit into the Base Station in order to sync them together and to charge the BWC battery.

Tips:

- BWC will not charge in base station if the car is off.
- The last two Vantage cameras are the only devices that are going to transmit to ICV.
- Ensure the BWC are fully charged and connected before use.

3. The Vantage can be used to start a recording by pressing the REC button. You will feel a single buzz or hear a single beep (depending on the set up) and LED will appear red or flashing red.
4. While recording, the Vantage can be muted by pressing the mute. Press the switch again to return to active mode.

- Even when audio is muted, video recording continues.

Quick Reference Guide

Eyewitness® HD ICV System

DVR / Agency-MDC Controller Configuration
with EyePortal Audio Integration

Loading/Unloading Recording Media:

Before turning on the system, confirm that a media drive is loaded in the DVR. If not, insert the drive and lock it in place. If you remove the drive at the end of the shift (as opposed to using wireless file transfer), use the key to unlock the cartridge, then pull it out of the DVR and turn it in for ingestion into the database.

System Start-up:

Your system has been configured to power on and off automatically with the vehicle's ignition, or you will control power with the small controller module pictured here. You will also need to open the EyeHD program on your laptop (usually an icon for the program is added to the desktop to make this easier). Bootup should take a couple minutes. Once live video is shown on the MDC display, the system is ready to operate.

Start and Stop Recording:

- 1) Most record activations occur automatically by activating the emergency lights. Recording can also be started by activating the Wireless Transmitter or Siren (if connected to the system), or you can manually start recording by selecting any active camera icon. You can also start a recording by double-clicking (or tapping) the primary video window.
- 2) Regardless of how the recording starts, recording is indicated by:
 - The video window outline will turn red (and flash if configured)
 - The corresponding camera icon will turn red
 - The record icon at the top of the screen will turn red
- 3) Press the STOP button to stop all cameras recording, or press the camera icon to stop just the selected camera. If configured with Stop-Hold Classifications, they will appear on screen each time a recording is stopped, allowing you to make a selection.
