**Learning from a Disaster** Scott D. Sagan, Edward D. Blandford, 2016-04-06 This book the culmination of a truly collaborative international and highly interdisciplinary effort brings together Japanese and American political scientists nuclear engineers historians and physicists to examine the Fukushima accident from a new and broad perspective It explains the complex interactions between nuclear safety risks the causes and consequences of accidents and nuclear security risks the causes and consequences of sabotage or terrorist attacks exposing the possible vulnerabilities all countries may have if they fail to learn from this accident The book further analyzes the lessons of Fukushima in comparative perspective focusing on the politics of safety and emergency preparedness It first compares the different policies and procedures adopted by various nuclear facilities in Japan and then discusses the lessons learned and not learned after major nuclear accidents and incidents in other countries in the past The book's editors conclude that learning lessons across nations has proven to be very difficult and they propose new policies to improve global learning after nuclear accidents or attacks

**Japan's Nuclear Disaster and the Politics of Safety Governance** Florentine Koppenborg, 2023-06-15 In Japan's Nuclear Disaster and the Politics of Safety Governance Florentine Koppenborg argues that the regulatory reforms taken up in the wake of the Fukushima disaster on March 11 2011 directly and indirectly raised the costs of nuclear power in Japan The Nuclear Regulation Authority resisted capture by the nuclear industry and fundamentally altered the environment for nuclear policy implementation Independent safety regulation changed state business relations in the nuclear power domain from regulatory capture to top down safety regulation which raised technical safety costs for electric utilities Furthermore the safety agency's extended emergency preparedness regulations expanded the allegorical backyard of NIMBY demonstrations Antinuclear protests mainly lawsuits challenging restarts incurred additional social acceptance costs Increasing costs undermined pronuclear actors ability to implement nuclear power policy and caused a rift inside the nuclear village Small nuclear safety administration reforms were in fact game changers for nuclear power politics in Japan Koppenborg's findings contribute to the vibrant conversations about the rise of independent regulatory agencies crisis as a mechanism for change and the role of nuclear power amid global interest in decarbonizing our energy supply

**The Oxford Handbook of Nuclear Security**, 2024-07-12 The Oxford Handbook of Nuclear Security provides a comprehensive examination of efforts to secure sensitive nuclear assets and mitigate the risk of nuclear terrorism and other non state actor threats It aims to provide the reader with a holistic understanding of nuclear security through exploring its legal political and technical dimensions at the international national and organizational levels Recognizing there is no one size fits all approach to nuclear security the book explores fundamental elements and concepts in practice through a number of case studies which showcase how and why national and organizational approaches have diverged Although focused on critiquing past and current activities unexplored yet crucial aspects of nuclear security are also considered and how gaps in international efforts might be filled Contributors to the

handbook are drawn from a variety of different disciplinary backgrounds and experiences to provide a wide range of perspectives on nuclear security issues and move beyond the Western narratives that have tended to dominate the debate. These include scholars from both developed and developing nuclear countries as well as practitioners working in the field of nuclear security in an effort to bridge the gap between theory and practice.

**Law and Disaster** Shigenori Matsui, 2018-09-03 On the 11th of March 2011 an earthquake registering 9.0 on the Richter scale the most powerful to ever strike Japan hit the Tohoku region in northern Japan. The earthquake produced a devastating tsunami that wiped out coastal cities and towns leaving 18,561 people dead or registered as missing. Due to the disaster the capability of the Fukushima Nuclear Power Plant operated by Tokyo Electric Power Company (TEPCO) was compromised causing nuclear meltdown. The hydrogen blast destroyed the facilities resulting in a spread of radioactive materials and subsequently serious nuclear contamination. This combined event earthquake tsunami and nuclear meltdown became known as the Great East Japan Earthquake Disaster. This book examines the response of the Japanese government to the disaster and its attempts to answer the legal questions posed by the combination of earthquake tsunami and nuclear meltdown. Japanese law policy and infrastructure were insufficiently prepared for these disasters and the country's weaknesses were brutally exposed. This book analyses these failings and discusses what Japan and other countries can learn from these events.

*Information Technology for Peace and Security* Christian Reuter, 2019-03-12 This book offers an introduction to Information Technology with regard to peace conflict and security research a topic that it approaches from natural science technical and computer science perspectives. Following an initial review of the fundamental roles of IT in connection with peace conflict and security the contributing authors address the rise of cyber conflicts via information warfare cyber espionage cyber defence and Darknets. The book subsequently explores recent examples of cyber warfare including The Stuxnet attack on Iran's uranium refining capability The hacking of the German Federal Parliament's internal communication system The Wannacry malware campaign which used software stolen from a US security agency to launch ransomware attacks worldwide. The book then introduces readers to the concept of cyber peace including a discussion of confidence and security building measures. A section on Cyber Arms Control draws comparisons to global efforts to control chemical warfare to reduce the risk of nuclear war and to prevent the militarization of space. Additional topics include the security of critical information infrastructures and cultural violence and peace in social media. The book concludes with an outlook on the future role of IT in peace and security.

*Information Technology for Peace and Security* breaks new ground in a largely unexplored field of study and offers a valuable asset for a broad readership including students educators and working professionals in computer science IT security peace and conflict studies and political science.

**Black Wave** Daniel P. Aldrich, 2019-07-11 Despite the devastation caused by the magnitude 9.0 earthquake and 60 foot tsunami that struck Japan in 2011 some 96% of those living and working in the most disaster stricken region of Tohoku made it through. Smaller earthquakes and tsunamis have killed far more people in nearby

China and India What accounts for the exceptionally high survival rate And why is it that some towns and cities in the Tohoku region have built back more quickly than others Black Wave illuminates two critical factors that had a direct influence on why survival rates varied so much across the Tohoku region following the 3 11 disasters and why the rebuilding process has also not moved in lockstep across the region Individuals and communities with stronger networks and better governance Daniel P Aldrich shows had higher survival rates and accelerated recoveries Less connected communities with fewer such ties faced harder recovery processes and lower survival rates Beyond the individual and neighborhood levels of survival and recovery the rebuilding process has varied greatly as some towns and cities have sought to work independently on rebuilding plans ignoring recommendations from the national government and moving quickly to institute their own visions while others have followed the guidelines offered by Tokyo based bureaucrats for economic development and rebuilding Routledge Handbook of Trauma in East Asia Tina Burrett,Jeff Kingston,2023-04-03 This handbook explores trauma in East Asia from the nineteenth to the twenty first century assessing how victims perpetrators and societies have responded to such experiences and to what extent the legacies still resonate today Mapping the trauma scape of East Asia from an interdisciplinary perspective including anthropologists historians film and literary critics scholars of law media and education political scientists and sociologists this book significantly enhances understandings of the region s traumatic pasts and how those memories have since been suppressed exhumed represented and disputed In Asia s contested memory scape there is much at stake for perpetrators their victims and heirs to their respective traumas The scholarly research in this volume examines the silencing and distortion of traumatic pasts and sustained efforts to interrogate denial and impunity in the search for accountability Addressing collective traumas from across East Asia China Hong Kong Japan Russia Singapore South Korea Taiwan and Vietnam this book is a valuable resource for students and scholars of Trauma and Memory Studies Asian Studies and Contemporary Asian History more broadly **Humans and Devices in Medical Contexts** Susanne Brucksch,Kaori Sasaki,2021-06-19 This book explores the ways in which socio technical settings in medical contexts find varying articulations in a specific locale Focusing on Japan it consists of nine case studies on topics concerning experiences with radiation in Hiroshima Nagasaki and Fukushima patient security end of life and high tech medicine in hospitals innovation and diffusion of medical technology and the engineering and evaluating of novel devices in clinical trials The individual chapters situate humans and devices in medical settings in their given semantic pragmatic institutional and historical context A highly interdisciplinary approach offers deep insights beyond the manifold findings of each case study thereby enriching academic discussions on socio technical settings in medical contexts amongst affiliated disciplines This volume will be of broad interest to scholars practitioners policy makers and students from various disciplines including Science and Technology Studies STS medical humanities social sciences ethics and law business and innovation studies as well as biomedical engineering medicine and public health *Antinuclear Citizens* Akihiro Ogawa,2023-06-27 Following the Great

East Japan Earthquake on March 11 2011 tsunamis engulfed the Fukushima Daiichi nuclear power plant located on Japan's Pacific Coast leading to the worst nuclear disaster the world has seen since the Chernobyl crisis of 1986 Prior to this disaster Japan had the third largest commercial nuclear program in the world surpassed only by those in the United States and France nuclear power significantly contributed to Japan's economic prosperity and nearly 30% of Japan's electricity was generated by reactors dotted across the archipelago from northern Hokkaido to southern Kyushu This long period of institutional stasis was however punctuated by the crisis of March 11 which became a critical juncture for Japanese nuclear policymaking As Akihiro Ogawa argues the primary agent for this change is what he calls antinuclear citizens a conscientious Japanese public who envision a sustainable life in a nuclear free society Drawing on over a decade of ethnographic research conducted across Japan including antinuclear rallies meetings with bureaucrats and at renewable energy production sites Ogawa presents an historical record of ordinary people's actions as they sought to survive and navigate a new reality post Fukushima Ultimately Ogawa argues that effective sustainability efforts require collaborations that are grounded in civil society and challenge hegemonic ideology efforts that reimagine societies and landscapes especially those dominated by industrial capitalism to help build a productive symbiosis between industry and sustainability

**The ^AOxford Handbook of Energy Politics** Kathleen J. Hancock, Juliann Emmons Allison, 2020-12-02 This Handbook synthesizes the diverse literature on energy to provide a foundational resource for teaching and research on critical energy issues in international relations and comparative politics Through chapters authored by both scholars and practitioners the Handbook further develops the energy politics scholarship and community and generates sophisticated new work that will benefit all who work on energy issues

**Handbook of Japan's Environmental Law, Policy and Politics** Hiroshi Ohta, 2025-10-01 This handbook offers an exposition of the contemporary status of Japan's environmental law policy and politics The compass of ecological quandaries explored within this tome is expansive encompassing issues pertinent to both natural and synthetic ecosystems natural resources and inorganic materials Each chapter's temporal framework corresponds to the postwar period following the enactment of environmental statutes and the initiation of administrative institutionalization situated approximately in the early 1970s The central inquiry addressed in this compendium pertains to the extent to which prevailing environmental statutes and policies have contributed to the enhancement or conservation of Japan's natural and synthetic ecosystems as well as the resilience of its natural resources The authors within this volume undertake an analysis to discern the causal factors behind the quandaries by ascribing them to the existence or absence of enforceable regulations public involvement in policy formulation processes bureaucratic fragmentation pioneering regulatory measures institutional obstacles regulatory co-optation rational cost effective methodologies scientific understanding scientific communities ecological commerce environmental non governmental organizations NGOs and holistic ecological plans and programs Moreover pertinent sections raise an inquiry concerning Japan's ecological diplomacy inquiring whether Japan serves as a

leader bystander or obstructionist      **The Political Economy of the Abe Government and Abenomics Reforms** Takeo Hoshi, Phillip Y. Lipsky, 2021-02-25 Explores the politics and economics of the Abe government and evaluates major policies such as Abenomics policy reforms      Regulation of Outer Space Claudia Cinelli, 2024-08-30 This edited book focuses on how States should regulate activities in space and explores strategies to advance State responsible behaviour to ensure sustainable use and effective protection of outer space for peaceful purposes The time seems ripe to bring international law into the space sustainability discourse The concept of sustainable development was conceptualized by the 1987 Brundtland Report *Our Common Future* Today as then the overlap between the security environmental and economic dimensions including in terms of intra inter generational equity is reflected within the current new space era that is now our common future This edited book collects original theoretical and empirical contributions It contributes to unpack the international outer space regulatory framework in the light of current trends and pressing challenges This offers a unique perspective and guidance thus empowering regulatory strategies for stakeholders and end users such as scholars policy makers industry and society      *COVID-19: Systemic Risk and Resilience* Igor Linkov, Jesse M. Keenan, Benjamin D. Trump, 2021-04-30 This book aims to provide a collection of early ideas regarding the results of applying risk and resilience tools and strategies to COVID 19 Each chapter provides a distinct contribution to the new and rapidly growing literature on the developing COVID 19 pandemic from the vantage points of fields ranging from civil and environmental engineering to public policy from urban planning to economics and from public health to systems theory Contributing chapters to the book are both scholars and active practitioners who are bridging their applied work with critical scholarly interpretation and reflection The book's primary purpose is to empower stakeholders and decision makers with the most recent research in order that they can better understand the systemic and sweeping nature of the COVID 19 pandemic as well as which strategies could be implemented to maximize socioeconomic and public health recovery and adaptation over the long term      **Fragile Futures** Vito Tanzi, 2022-05-19 This book revisits a distinction introduced in 1921 by economists Frank Knight and John Maynard Keynes that between statistically predictable future events risks and statistically unpredictable uncertain events uncertainties Governments have generally ignored the latter perceiving phenomena such as pandemics natural disasters and climate change as uncontrollable Acts of God As a result there has been little if any preparation for future catastrophes Our modern society is more interconnected and more globalized than ever Dealing with uncertain future events requires a stronger and more globally coordinated government response This book suggests a larger more global government role in dealing with these disasters and keeping economic inequalities low Major institutional changes such as regulating the private sector for the common good and dealing with special harms risks and crises especially those concerning climate change and pandemics are necessary in order to achieve any semblance of future progress for humankind      *Cities at Risk* Pierre Filion, Gary Sands, 2016-03-03 As levels of urbanization increase around the world the growing concentrations of population and

economic activity increases vulnerability to natural disasters Interdependencies among urban populations mean that damage to the built environment including water sewer and energy infrastructure can affect millions Even if there is no change in the rate of occurrence of natural disasters an unlikely prospect in the face of ongoing climate change the potential for human and economic loss will continue to increase along with the time required to recover How do cities prepare for and recover from natural disasters In this book the authors provide a broad overview of the issues related to the impacts of disasters on cities around the world from assessing risks to accounting for damages The comparative approach across different types of disasters in a range of urban locations is useful in identifying opportunities for policy transfer While there is no one size fits all solution to hazard mitigation valuable lessons can be learned from the experiences of others The chapters emphasize different modes for assessing hazard risk as well as strategies for increasing the resiliency of vulnerable populations

*Managing Uncertainty, Mitigating Risk* Nick Firoozye, Fauziah Ariff, 2016-04-20 Managing Uncertainty Mitigating Risk proposes that financial risk management broaden its approach maintaining quantification where possible but incorporating uncertainty The author shows that by using broad quantification techniques and using reason as the guiding principle practitioners can see a more holistic and complete picture

*Disaster, Diversity and Emergency Preparation* Leif Inge Magnussen, 2019-11-15 One of NATO's objectives is a better understanding of the human and social aspects of security related issues This book presents the proceedings of the NATO Science for Peace and Security Advanced Research Workshop ARW Leadership Development Programme on Gender and Diversity Peace Risk and Emergency Preparedness and Collaboration held in Tnsberg Norway on 11-12 December 2018 one of the aims of which was to strengthen organizational leadership The workshop firmly established the collaboration between Japan and other NATO countries with regard to Women Peace and Security WPS The workshop gave the participating leaders and researchers an opportunity to meet and debate to learn and to build networks of leaders for change This book consists of fourteen chapters including a summarizing introductory chapter It explores topics related to the way in which continued progress and change in institutional behaviors require an approach focused on altering perspectives and enhancing the skill sets of leaders Each chapter stands alone but is ordered within the framework of the Societal Programme Model SPM described in Chapter 1 The book will be of interest to all those involved in building leadership and changing institutional behavior

**International Disaster Response Law**

Andrea de Guttry, Marco Gestri, Gabriella Venturini, 2012-08-31 With a Foreword by Kristalina Georgieva European Commissioner for International Cooperation Humanitarian Aid and Crisis Response Over the last decades natural and man made disasters have been increasing in terms of frequency size number of people affected and material damage caused There is growing awareness of the importance of adequate national and international legal frameworks for disaster prevention mitigation and response The implementation of these frameworks however poses serious challenges This book analyses International Disaster Response Law as developed in recent times and identifies the main existing normative gaps

The authors address the rights and duties of States in preventing and mitigating disasters in facilitating access to their territory for humanitarian relief actors as well as issues related to liability and compensation. Due attention is paid to European Union law governing disaster response and to its reform in the light of the Lisbon Treaty and to the main trends in domestic legislation. Human rights obligations are thoroughly examined and the potential relevance of international criminal law is assessed. Additional topics such as the status of relief personnel, the hindrances to the delivery of relief consignments by customs and excise administration, the use of civilian and military defence assets in emergency situations, the mechanisms and procedures available to offer financial support for recovery and rehabilitation, risk insurance and the issue of corruption during disaster related activities are specifically addressed. By drawing on the expertise of lawyers, political scientists, economists and humanitarian practitioners, the book promotes much needed interdisciplinary dialog and sheds light on a largely uncharted field of research. It is therefore essential reading for academics and practitioners in international and EU law, policy makers, civil protection and humanitarian operators and for anyone interested in exploring the legal facets of the international community's response to large scale calamitous events.
