## **Learning From Strangers The Art And Method Of Qualitative Interview Studies:**

**Learning From Strangers** Robert S. Weiss, 1995-11-10 *Learning From Strangers* is the definitive work on qualitative research interviewing. It draws on Robert Weiss's thirty years of experience in interviewing and teaching others how to do it. The most effective interviews, says Weiss, rely on creating cooperation, an open and trusting alliance between interviewer and respondent, dedicated to specific and honest accounts of both internal and external events. Against the eclectic background of his work in national sample surveys, studies based on semi-structured interviewing and participant observation, Weiss walks the reader through the method of qualitative interview studies, sample selection, development of an interview guide, the conduct of the interview, analysis and preparation of the data. Weiss gives examples of successful and less successful interviews and offers specific techniques and guidelines for the practitioner.

Weiss, 1995-08-01 *Becoming a Writing Researcher* Ann M. Blakeslee, Ann Blakeslee, Cathy Fleischer, 2009-03-04 *Becoming a Writing Researcher* effectively guides students through the stages of conducting qualitative writing research, from the initial step of seeing themselves as researchers to identifying research questions, selecting appropriate tools, conducting the research, and interpreting and reporting the findings. Authors Ann M. Blakeslee and Cathy Fleischer describe various qualitative methods and provide readers with examples of real-world applications. Exercises and activities, as well as anecdotes from both novice and seasoned researchers, serve to acquaint readers thoroughly with the practice of carrying out research for scholarly or professional purposes. The textbook introduces students to research methods in a gradual and contextualized manner. Each chapter opens with a discussion of general issues regarding a particular portion of the research process, followed by a consideration of the various physical, conceptual, and strategic tools that allow a beginning researcher to conduct that part of the process. Sections within each chapter also cover personal and theoretical perspectives and biases that influence specific stages of the research process, ethical issues associated with phases of the research process, the identity, ethos, and experiences of the researcher. *Becoming a Writing Researcher* is an essential text for all novice researchers and is well suited for use in graduate-level research methods courses in composition and technical communication. It is also ideal for use in other disciplines with strong qualitative methodology research programs, including education.
