

## Overview

The **Laboratory Virtual Instrument Engineering Workbench (LabVIEW)** is a development environment designed by National Instruments that creates graphic-based programs called virtual instruments (VIs) that simulate actual laboratory instruments. A VI consists of two parts: a front panel and a back panel (Figure 1). The **front panel** allows the user to interact with the VI by displaying outputs and allowing the user to supply the program with inputs. The **back panel** consists of the code used by the VI to obtain inputs from the front panel, operate on the inputs, and display the results.

Figure 1: Front Panel (Left) and Back Panel (Right)

The front panel is built using controls and indicators. **Controls** are inputs that allow a user to supply information to the VI. **Indicators** are outputs that display the results based on the inputs given to the VI. Controls can be switches, knobs, dials, and buttons. Indicators can be meters, gauges, LEDs, and displays. These are located on the Controls palette and are placed on the front panel (Figure 2).

**Blended Learning in Engineering Education** Ataur Rahman, Vojislav Ilic, 2018-11-06 Blended Learning combines the conventional face-to-face course delivery with an online component. The synergistic effect of the two modalities has proved to be of superior didactic value to each modality on its own. The highly improved interaction it offers to students as well as direct accessibility to the lecturer adds to the hitherto unparalleled learning outcomes. Blended Learning in Engineering Education: Recent Developments in Curriculum Assessment and Practice highlights current trends in Engineering Education involving face-to-face and online curriculum delivery. This book will be especially useful to lecturers and postgraduate undergraduate students as well as university administrators who would like to not only get an up-to-date overview of contemporary developments in this field but also help enhance academic performance at all levels.

Bishop, 2015-12-28 This is the eBook of the printed book and may not include any media website access codes or print supplements that may come packaged with the bound book. The goal of this book is to help students learn to use LabVIEW on their own. Learning with LabVIEW is the textbook that accompanies the LabVIEW Student Edition from National Instruments Inc. This textbook as well as the LabVIEW software. LabVIEW software is not included with this book. LabVIEW software has undergone a significant revision from the previous edition. Learning with LabVIEW teaches basic programming concepts in a graphical environment and relates them to real-world applications in academia and industry. Understanding and using the intuitive and powerful LabVIEW software is easier than ever before. As you read through the book and work through the examples, we hope you will agree that this book is more of a personal tour guide than a software manual.      LabVIEW 2009 Robert H. Bishop, 2010 The goal of this book is to help students learn to use LabVIEW on their own. Very art intensive with over 400 figures in all. There are numerous screen captures in each section taken from a typical LabVIEW session. The figures contain additional labels and pointers added to the LabVIEW screen captures to help students understand what they are seeing on their computer screens as they follow along in the book. A directory of virtual instruments has been developed by the author exclusively for use by students using Learning with LabVIEW and is available on [www.pearsonhighered.com/bishop](http://www.pearsonhighered.com/bishop). These virtual instruments complement the

material in the book In most situations the students are asked to develop the virtual instrument themselves following instructions given in the book and then compare their solutions with the solutions provided by the author to obtain immediate feedback In other cases students are asked to run a specified virtual instrument as a way to demonstrate an important LabVIEW concept
