Learning Marketplace, The: East Meets West In Singapore Prem Kumar, 2015-09-23 In Asia we are witnessing an era where the pendulum of power seems to be swaying towards the East with the rising strength of China and India and Singapore is at the crossroads between these populous nations Although Singapore may appear to be the most westernized country in Asia she is nevertheless a multi cultural Asian society Having the most open economy in the world Singapore is plugged into the global marketplace of education and learning The development of human capital is used as a strategic economic driver to internationalize and transform education for sustainable competitive advantage Singapore's education system regarded as one of the consistently best performing in the world offers a unique opportunity to explore issues where eastern and western culture values beliefs learning and knowledge systems converge clash and at times diverge This book is meant to extend our knowledge on the role

of learning often overlooked and taken for granted as the air that we breathe but which constantly transforms our lives and reshapes societies It is the first book that deals with the dichotomy of east and west going beyond the traditional learning and education framework to other areas such as economic socio cultural political and technological dimensions that impact Singapore It puts together key topical issues and explores the underbelly of how a small resourceless independent city state like Singapore stays ahead of the learning curve even while facing increasingly intense global competition where the discovery and emergence of new systems for empowerment and independence and the resulting creation of new knowledge and modes of communication are challenging traditional boundaries between the virtual and real world AN

Fault Lines in a Rising Asia Chung Min Lee, 2016-04-19 Asia has already risen by most hard power measures. But without an understanding of the downsides of Asia's rise, the conventional narrative is incomplete, misleading and inaccurate. Chung Min Lee explores the fundamental dichotomy that defines contemporary Asia. While the region has been an unparalleled economic success, it is also home to some of the world's most dangerous, diverse and divisive challenges. Contrary to prevailing wisdom, he says Asia's rise doesn't mean the demise of the West. Asia's rise over the past four decades is one of the most significant geopolitical and geoeconomic developments in world affairs, as evinced by China's and more recently India's accelerated economic growth. Yet the conventional narrative of Asia's rise is incomplete, if not misleading, given the fundamental dichotomy that defines contemporary Asia: a region with unparalleled economic success but also home to the world's most dangerous, diverse and divisive security, military and political challenges. How the strategically consequential Asian states manage to ameliorate or even overcome traditional geopolitical tinderboxes across the Taiwan Strait, the Korean Peninsula and the Indian subcontinent and new zones of strategic competition such as the South China Sea is going to have a profound impact on the shaping of regional order well into the 21st century.
