

# LEED Quick Reference Guide for Operable Partitions

Operable partitions can contribute to or comply with various LEED credit categories. The specific categories will vary due to the customizable nature of operable partitions.

**Credit categories that apply to operable partitions are:**

**MR Credit 1.3 Building Reuse**

**MR Credit 3.1/3.2 Material Reuse**

**MR Credit 4.1/4.2 Recycled Content**

**MR Credit 5.1/5.2 Regional Materials**

**MR Credit 7 Certified Wood**

**EQ Credit 4.1 Low Emitting Materials**

**EQ Credit 4.2 Low Emitting Materials**

**EQ credit 4.4 Low Emitting Materials**

Alternative materials such as insulation allow products to contribute to additional LEED credit categories like "Rapidly Renewable" materials. The highly customizable operable partitions, like Modernfold's product offering, allow for the integration of customer specified green materials. The exact contributions will depend on what subcomponents are specified.

**MR Credit 1.3 Building Reuse-** Modernfold wall systems and ceiling track systems can contribute to this category as credit is achieved by reusing interior elements such as existing wall systems.

**MR Credit 3.1/3.2 Material Reuse-** Modernfold wall systems, while technically can be reused in a new location and contribute to this category, generally will not be because of the dimensional requirements. The ceiling track system, however, technically can be removed and used elsewhere to contribute to this category.

**MR Credit 4.1/4.2 Recycled Content-** All Modernfold products contain recycled content. The percentages of post-consumer and post-industrial recycled content are dependent on the specific details of the order.

**MR Credit 5.1/5.2 Regional Materials-** All Modernfold products are manufactured in Dyersville, Iowa. If the job site is within 500 miles of our manufacturing facility, then our product will contribute to this credit category.

**MR Credit 7 Certified Wood-** This credit category is only applicable when using wood veneer covering. Modernfold does have specific wood veneer products that are FSC certified and contribute to this category. These are subject to availability, lead time and price.

**EQ Credit 4.1 Low Emitting Materials- Adhesives and Sealants-** Modernfold complies with this credit category as we do not use any adhesives or sealants on site.

**EQ Credit 4.2 Low Emitting Materials- Paints and Coatings-** Modernfold wall systems do not require any paint or coating to be applied on site.

**EQ credit 4.4 Low Emitting Materials- Composite Wood and Agrifiber Products-** This is only applicable when ordering MDF skin panels. Modernfold can supply formaldehyde-free MDF upon request to comply with this credit category. These are subject to availability, lead time and price.
