Left Back A Century Of Battles Over School Reform:

Education Reform Facts On File, Incorporated, 2003 This volume examines the complex issues surrounding education reform in the United States It contains a survey of the historical developments and major debates surrounding this topic and covers issues such as home schooling curriculum standards and standardized tests *Sick Schools* David V. Anderson, 2020-01-10 Who's afraid of for-profit education Those who work in non-profit or government owned and operated schools Many parents and other stakeholders have been made fearful by this education establishment What's more important to humans nutrition or education Nutrition is more important because it is the prerequisite for other human activities including education What organizations provide food and who pays for the food Food is provided by for-profit farmers for profit processors for profit wholesalers and for profit retailers Most food is purchased with the consumers own money but a significant amount is purchased by low income individuals using food stamps Why can't education be provided similarly using education stamps We trust for-profit enterprises to provide our food Why can't we trust for-profit enterprises to provide K-12 education Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for-profit K-12 education sector would please and amaze its customers *The Language Police* Diane Ravitch, 2007-12-18 If you're an actress or a coed just trying to do a man-size job a yes-man who turns a deaf ear to some sob sister an heiress aboard her yacht or a bookworm enjoying a boy's night out Diane Ravitch's internationally acclaimed *The Language Police* has bad news for you Erase those words from your vocabulary Textbook publishers and state education agencies have sought to root out racist sexist and elitist language in classroom and library materials But according to Diane Ravitch a leading historian of education what began with the best of intentions has veered toward bizarre extremes At a time when we celebrate and encourage diversity young readers are fed bowdlerized texts devoid of the references that give these works their meaning and vitality With forceful arguments and sensible solutions for rescuing American education from the pressure groups that have made classrooms bland and uninspiring *The Language Police* offers a powerful corrective to a cultural scandal **The Allure of Order** Jal Mehta, 2015 In *The Allure of Order* Mehta recounts a century of attempts at revitalizing public education and puts forward a truly new agenda to reach this elusive goal Over and over again outsiders have been fascinated by the promise of scientific management and have attempted to apply principles of rational administration from above What we want Mehta argues is the opposite approach which characterizes top-performing educational nations attract strong candidates into teaching develop relevant and usable knowledge train teachers extensively in that knowledge and support these efforts through a strong welfare state **Engendering Curriculum History** Petra Hendry, 2011-05-20 How can curriculum history be re-envisioned from a feminist poststructuralist perspective *Engendering Curriculum History* disrupts dominant notions of history as linear as inevitable progress and as embedded in the individual This conversation requires a

history that seeks remembrance not representation reflexivity not linearity and responsibility not truth Rejecting a compensatory approach to rewriting history which leaves dominant historical categories and periodization intact Hendry examines how the narrative structures of curriculum histories are implicated in the construction of gendered subjects Five central chapters take up a particular discourse wisdom the body colonization progressivism and pragmatism to excavate the subject identities made possible across time and space Curriculum history is understood as an emergent not a finished process as an unending dialogue that creates spaces for conversation in which multiple conflicting paradoxical and contradictory interpretations can be generated as a means to stimulate more questions not grand narratives

Curriculum Theory Michael Schiro, 2008 This book presents readers with a clear sympathetic and unbiased perspective on the major curriculum philosophies ideologies viewpoints or visions for schooling that have exerted influence on American educators and schooling over the last century It also helps readers better understand curricular disagreements that occur in schools determine the ideologies and intentions of other educators speak in the language of other educators while conveying their own meanings and more effectively negotiate curriculum decisions with colleagues curriculum committees school boards and their communities

A progressive education? Laura Tisdall,2019-10-29 A Progressive Education argues that ideas about both childhood and adolescence were transformed in English and Welsh schools after WWII Covering the period 1918 to 1979 this book shows that by putting childhood at the centre of the history of education we can challenge the stories we tell about how and why schooling itself changed It has been suggested that the dominance of progressive education after 1945 led to a backlash against permissive attitudes to pupils in both Western Europe and the United States But British child centred education in alliance with developmental psychology actually shaped a more restrictive and pessimistic image of childhood Drawing on an extensive range of sources that illuminate teaching practice from school logbooks to oral histories this book will be crucial not only for historians and sociologists of modern Britain but for education professionals and policy makers The Death and Life of the Great American School System Diane Ravitch,2016-06-28 An urgent case for protecting public education from one of America s best known education experts In this landmark book Diane Ravitch former assistant secretary of education and a leader in the drive to create a national curriculum examines her career in education reform and repudiates positions that she once staunchly advocated Drawing on over forty years of research and experience Ravitch critiques today s most popular ideas for restructuring schools including privatization the Common Core standardized testing the replacement of teachers by technology charter schools and vouchers She shows conclusively why the business model is not an appropriate way to improve schools Using examples from major cities like New York Philadelphia Chicago Denver and San Diego Ravitch makes the case that public education today is in peril and includes clear prescriptions for improving America s schools The Death and Life of the Great American School System is more than just an analysis of the state of play of the American education system It is a must read for any stakeholder in the future of American schooling **The Social History of the American Family** Marilyn J. Coleman, Lawrence H. Ganong,2014-09-02 The American family has come a long way from the days of the idealized family portrayed in iconic television shows of the 1950s and 1960s The four volumes of The Social History of the American Family explore the vital role of the family as the fundamental social unit across the span of American history Experiences of family life shape so much of an individual s development and identity yet the patterns of family structure family life and family transition vary across time space and socioeconomic contexts Both the definition of who or what counts as family and representations of the ideal family have changed over time to reflect changing mores changing living standards and lifestyles and increased levels of social heterogeneity Available in both digital and print formats this carefully balanced academic work chronicles the social cultural economic and political aspects of American families from the colonial period to the present Key themes include families and culture including mass media families and religion families and the economy families and social issues families and social stratification and conflict family structures including marriage
