Legal Conceptions The Evolving Law And Policy Of Assisted Reproductive Technologies:

Legal Conceptions Susan L. Crockin, Howard W. Jones Jr., 2010-01-11 Written by a medical and a legal pioneer in the field this book comprehensively reviews and analyzes the evolving law and policy issues surrounding assisted reproductive technologies Dr Howard W Jones Jr founder of the first in vitro fertilization program in the United States offers medical commentary while attorney Susan L Crockin author of the column Legally Speaking in ASRM News the newsletter of the American Society for Reproductive Medicine provides legal analysis The book opens with a legal primer and timelines sketching the medical and legal milestones in the history of reproductive technology and law Each chapter provides a case by case discussion of the relevant law as well as cogent medical and legal commentary and analysis on a particular substantive area Chapter topics deal with a vast array of issues including artificial insemination sperm and egg donation traditional and gestational surrogacy posthumous reproduction same sex parentage genetics cryopreservation and embryo litigation discrimination and access to reproductive care professional liability stem cell research and abortion In discussing the medical and legal issues surrounding these topics Crockin and Jones reveal what has gone right and what at times has gone terribly wrong for both the families and the professionals involved They make clear that technological advancements have far outpaced the laws and policies in place to protect all who use them This book makes a timely contribution to current debates over the legal and policy issues raised by the highly publicized birth of octuplets in California and the embryo legislation activity taking place in many states It offers information and insight to policymakers medical and legal professionals patients and other participants and everyone else interested in the history and future direction of the field *Law, Policy and Reproductive Autonomy* Erin Nelson, 2014-07-18 Reproductive choices are at once the most private and intimate decisions we make in our lives and undeniably also among the most public Reproductive decision making takes place in a web of overlapping concerns political and ideological socio economic health and health care all of which engage the public and involve strongly held opinions and attitudes about appropriate conduct on the part of individuals and the state *Law Policy and Reproductive Autonomy* examines the idea of reproductive autonomy noting that in attempting to look closely at the contours of the concept we begin to see some uncertainty about its meaning and legal implications about how to understand reproductive autonomy and how to value it Both mainstream and feminist literature about autonomy contribute valuable insights into the meaning and implications of reproductive autonomy The developing feminist literature on relational autonomy provides a useful starting point for a contextualised conception of reproductive autonomy that creates the opportunity for meaningful exercise of reproductive choice With a contextualised approach to reproductive autonomy as a backdrop the book traces aspects of the regulation of reproduction in Canadian English US and Australian law and policy arguing that not all reproductive decisions necessarily demand the same level of deference in law and policy and making recommendations for reform **LGBT-Parent Families** Abbie E. Goldberg, Katherine R. Allen, 2012-10-12 LGBT Parent

Families is the first handbook to provide a comprehensive examination of this underserved area. Reflecting the nature of this issue, the volume is notably interdisciplinary with contributions from scholars in psychology, sociology, human development, family studies, gender studies, sexuality studies, legal studies, social work, and anthropology. Additionally, scholarship from regions beyond the U.S., including England, Australia, Canada, and South Africa, is presented. In addition to gender and sexuality, all contributors address issues of social class, race, and ethnicity in their chapters.

The Pursuit of Parenthood Margaret Marsh, Wanda Ronner, 2019-08-06. A wide-ranging history of assisted reproductive technologies and their ethical implications. Finalist of the PROSE Award for Best Book in History of Science, Medicine, and Technology by the Association of American Publishers. Since the 1978 birth of the first IVF baby, Louise Brown, in England, more than eight million children have been born with the help of assisted reproductive technologies. From the start, they have stirred controversy and raised profound questions: Should there be limits to the lengths to which people can go to make their idea of family a reality? Who should pay for treatment? How can we ensure the ethical use of these technologies? And what can be done to address the racial and economic disparities in access to care that enable some to have children while others go without? In *The Pursuit of Parenthood*, historian Margaret Marsh and gynecologist Wanda Ronner seek to answer these challenging questions. Bringing their unique expertise in gender history and women's health to the subject, Marsh and Ronner examine the unprecedented means—liberating for some and deeply unsettling for others—by which families can now be created. Beginning with the early efforts to create embryos outside a woman's body and ending with such new developments as mitochondrial replacement techniques and uterus transplants, the authors assess the impact of contemporary reproductive technology in the United States. In this volume, we meet the scientists and physicians who have developed these technologies and the women and men who have used them. Along the way, the book dispels a number of fertility myths, offers policy recommendations that are intended to bring clarity and judgment to this complicated medical history, and reveals why the United States is still known as the Wild West of reproductive medicine.

The Palgrave Handbook of Infertility in History Gayle Davis, Tracey Loughran, 2017-09-01. This ground-breaking interdisciplinary volume provides an overdue assessment of how infertility has been understood, treated, and experienced in different times and places. It brings together scholars from disciplines including history, literature, psychology, philosophy, and the social sciences to create the first large-scale review of recent research on the history of infertility. Through exploring an unparalleled range of chronological periods and geographical regions, it develops historical perspectives on an apparently transhistorical experience. It shows how experiences of infertility, access to treatment, and medical perspectives on this condition have been mediated by social, political, and cultural discourses. The handbook reflects on and interrogates different approaches to the history of infertility, including the potential of cross-disciplinary perspectives and the uses of different kinds of historical source material, and includes lists of research resources to aid teachers and researchers. It is an essential go-to point for anyone interested in infertility and its history. Chapter 19 is

In-Vitro Fertilization Gabor Kovacs, Peter Brinsden, Alan DeCherney, 2018-06-14 The birth of Louise Joy Brown the world's first baby born following in vitro fertilization heralded a medical revolution. Forty years later many thousands of babies are born each year following IVF. Assisted reproduction is a global industry with a multi-billion dollar turnover. It is a complex mix of science, clinical management, bioethics, and commercial imperatives. Many of the pioneers of IVF are still with us and have a fascinating tale to tell. Here they relate the story of the development of IVF and related technologies in a way that will prove invaluable to future generations of practitioners seeking to understand the genesis of the specialty. This is not an academic history; rather, it takes an informal and anecdotal approach, informing and entertaining for generations of past, present, and future medical and scientific specialists of IVF alongside the millions of parents who celebrated the successes of IVF treatment worldwide.

Third-Party Reproduction James M. Goldfarb, 2013-10-07 The first IVF-conceived birth in 1978 resulted in a significant growth of third-party reproductive options which continue to raise ethical, legal, and psychological questions. Third-party reproduction procedures can involve as many as five people: sperm donor, egg donor, gestational carrier, and intended parents. *Third-Party Reproduction: A Comprehensive Guide* utilizes experts in the field to address the medical, psychological, ethical, and legal aspects of sperm donation, egg donation, embryo donation, and the use of gestational carriers. In addition, there are chapters on the medical and ethical aspects of posthumous reproduction, religious aspects of third-party reproduction, and how to avoid pitfalls of third-party reproduction. Aimed at physicians, trainees, psychologists, nurses, and social workers whose practices may include patients considering third-party reproduction, the intent of this book is to provide a comprehensive and practical overview of the many aspects of third-party reproduction to help all those involved to better understand them. Patients considering third-party reproduction may also find value in this book.

Medieval Considerations of Incest, Marriage, and Penance Linda Marie Rouillard, 2020-01-16 *Medieval Considerations of Incest, Marriage, and Penance* focuses on the incest motif as used in numerous medieval narratives. Explaining the weakness of great rulers such as Charlemagne or the fall of legendary heroes such as Arthur, incest stories also reflect on changes to the sacramental regulations and practices related to marriage and penance. Such changes demonstrate the Church's increasing authority over the daily lives and relationships of the laity. Treated here are a wide variety of medieval texts, using as a central reference point Philippe de Rœmi's thirteenth-century *La Manekine*, which presents one lay author's reflections on the role of consent in marriage, the nature of contrition and forgiveness, and even the meaning of relics. Studying a variety of genres, including medieval romance, epic, miracles, and drama, along with modern memoirs, films, and novels, Linda Rouillard emphasizes connections between medieval and modern social concerns. Rouillard concludes with a consideration of the legacy of the incest motif for the twenty-first century, including survivor narratives and new incest anxieties associated with assisted reproductive technology.

Reproductive Donation Martin Richards, Guido Pennings, John B. Appleby, 2012-07-05 Reproductive donation is the most

contentious area of assisted reproduction Even within Europe there are wide variations in what is permitted in each country This multidisciplinary book takes a fresh look at the practices of egg sperm and embryo donation and surrogacy bringing together ethical analysis and empirical research New evidence is offered on aspects of assisted reproduction and the families these create including non traditional types One of the key issues addressed is should children be told of their donor origin If they do learn the identity of their donor what kinds of relationships may be forged between families the donor and other donor sibling families Should donation involve a gift relationship Is intra familial donation too close for comfort How should we understand the growing trend for reproductive tourism This lively and informed discussion offers new insights into reproductive donation and the resulting donor families
