Legal Research Legal Research:

Materials and Methods of Legal Research with Bibliographical Manual Frederick Charles Hicks, 1923 *Legal Research Explained* Deborah E. Bouchoux, 2008

Instructors who are looking for a clear and concise text introducing students to the basic methods of legal research will welcome *Legal Research Explained*. Based upon the legal research section of Bouchoux's highly successful *Legal Research and Writing for Paralegals*, the material in this text has been modified, condensed, and updated to fit courses covering only legal research. This engaging text helps students develop both knowledge and confidence using a building block approach which is instrumental in ensuring that students master the critical skills of legal research. Bouchoux discusses conventional print legal research sources before computer-assisted and electronic sources. Similarly, primary authorities are discussed before secondary authorities and statutes are covered before cases because this is the order in which it happens in practice. Divided into five sections: 1. conducting legal research using primary authorities, 2. conducting legal research using secondary authorities and other research aids, 3. computer-assisted legal research and the Internet, 4. legal citation form and validating authorities, and 5. putting it all together and providing a final overview of the legal research process. Text includes: o examples of citation form in both ALWD and Bluebook format o questions relating to the materials discussed in each chapter and requiring students to use pertinent sources to locate the answers to those questions o a section at the end of each chapter requiring students to access the Internet to locate answers to questions so that students become proficient in quickly locating the types of information an employer will require them to retrieve such as local court rules o Practice Tips in each chapter offering realistic and helpful suggestions for workplace success up to date sample pages in each chapter illustrate the features of various legal research authorities. The book is part of a comprehensive instructional package that includes PowerPoint slides and an extensive Instructor's Manual featuring sample syllabi, information on teaching strategies, chapter-by-chapter resource information, answer keys for all discussion questions and Internet assignments, detailed suggestions for additional assignments, a Test Bank of exam questions. Professors in search of a text that applies a building block approach to developing a firm foundation for legal research are sure to be delighted with Bouchoux's new book *Legal Research Explained*. In addition to providing students with the skills and resources that they will need as they progress professionally, instructors are also provided with a comprehensive educational package to aid in the effort to impart a complete understanding of the fundamentals of legal research. Methodologies of Legal Research Mark Van Hoecke, 2011-02-28 Until quite recently, questions

about methodology in legal research have been largely confined to understanding the role of doctrinal research as a scholarly discipline. In turn this has involved asking questions not only about coverage but fundamentally questions about the identity of the discipline. Is it mainly descriptive, hermeneutical or normative? Should it also be explanatory? Legal scholarship has been torn between on the one hand grasping the expanding reality of law and its context and on the other reducing this complex whole to manageable proportions. The purely internal analysis of a legal system isolated from any societal context remains an option and is still seen in the approach of the French academy but as law aims at ordering society and influencing human behaviour this approach is felt by many scholars to be insufficient. Consequently many attempts have been made to conceive legal research differently. Social scientific and comparative approaches have proven fruitful. However does the introduction of other approaches leave merely a residue of legal doctrine to which pockets of social sciences can be added or should legal doctrine be merged with the social sciences? What would such a broad interdisciplinary field look like and what would its methods be? This book is an attempt to answer some of these questions.
