## **Legitimacy And Criminal Justice An International Exploration:**

Legitimacy and Criminal Justice Liebling Alison Tankebe Justice, 2013-01-01      Legitimacy and Criminal Justice Justice Tankebe, 2013 Based on an interdisciplinary conference held at the University of Cambridge in May 2012 Legitimacy and Criminal Justice An International Exploration brings together internationally renowned scholars from a range of disciplines including criminology international relations sociology and political science to examine the meaning of legitimacy and advance its theoretical understanding within the context of criminal justice In policy terms the conference afforded a timely opportunity for criminal justice senior managers and researchers to discuss the practical applications and implications of legitimacy for policing and prisons This resulting volume aims to advance conceptual understanding of legitimacy in the contexts of policing and criminal justice to develop a better understanding of the implications of analyses of legitimacy for the practical contexts of policing prisons and criminal justice and to recognise the growing number of contexts in which criminal justice personnel encounter ethnically and religiously diverse communities such as the acute dilemmas for legitimate authority posed by perceived terrorist threats Attention is also devoted to the growing importance of international organisations in relation to legitimacy both in its international and domestic manifestations The volume includes 16 substantial new contributions to this important field from leading political and theoretical scholars in the field along with the results of several recent empirical studies Together they constitute an unprecedented synthesis of disparate but leading thinkers in the growing field of legitimacy scholarship and should be of value to social scientists across different disciplines and to criminal justice practitioners      Procedural Justice and Relational Theory Denise Meyerson, Catriona

Mackenzie, Therese MacDermott, 2020-10-29 This book bridges a scholarly divide between empirical and normative theorizing about procedural justice in the context of relations of power between citizens and the state Empirical research establishes that people's understanding of procedural justice is shaped by relational factors A central premise of this volume is that this research is significant but needs to be complemented by normative theorizing that draws on relational theories of ethics and justice to explain the moral significance of procedures and make normative sense of people's concerns about relational factors The chapters in Part 1 provide comprehensive reviews of empirical studies of procedural justice in policing courts and prisons Part 2 explores empirical and normative perspectives on procedural justice and legitimacy Part 3 examines philosophical approaches to procedural justice Part 4 considers the implications of a relational perspective for the design of procedures in a range of legal contexts This collection will be of interest to a wide academic readership in philosophy law psychology and criminology      **The Oxford Handbook of Evidence-based Crime and Justice Policy** Brandon Welsh, Steven N. Zane, Daniel P. Mears, 2024 An evidence based approach to crime and justice policy can go a long way toward ensuring that the best available research is considered in decisions that bear on the public good However the term evidence based is characterized by a great deal of rhetoric Indeed there remains a marked disjuncture between calls for

evidence based policy and an understanding of what it means for policy to be evidence based The calls for evidence based policy nonetheless provide a powerful foundation for propelling a movement toward bringing about rational cost effective and humane policies for the betterment of society This handbook showcases the state of research on evidence based crime and justice policy and the challenges that impede its creation and use The volume has three core objectives to promote new and productive ways to think about evidence based policy to demonstrate how research can contribute to and guide evidence based policy in juvenile justice criminal justice and alternatives to system responses and to identify strategies that can increase reliance on evidence based policy To meet these objectives each chapter is guided by several central questions What do we know about evidence based policy and practice in crime and justice How can we improve knowledge of evidence based policy and practice How can we promote more use of evidence based policy and practice Taken as a whole the volume emphasizes the critical need for policies that are grounded in high quality research that address critical research gaps and that fully acknowledge the limitations of what extant research can do to inform policy decisions The Regulation of Medical Products Penny Gleeson,2024-12-31 This book develops a theoretical framework for examining and assessing the regulatory arrangements for medical products Since the first half of the 20th century the regulation of pharmaceuticals medical devices and more recently biologicals have been controlled in many jurisdictions by specific regulatory regimes and agencies Their regulatory mandates are similar to ensure the quality safety and efficacy of medical products This book provides a timely and relevant assessment of the complexities of medical regulatory regimes by drawing on a particular theory of political legitimacy In this respect the book adopts a dialogic approach according to which a shared set of normative beliefs and values are formulated as a theoretical tool to identify deficiencies in the regulatory arrangements for medical products Drawing on several Australian cases studies characterised by divergent normative perspectives the book develops its dialogic approach in order to challenge the usual legitimization of regulatory regimes from the perspective of science alone Specifically it maintains that such regimes need to embrace a normative pluralism that admits a diversity of types and sources of knowledge This evaluation of the increasingly influential domain of medical regulation will appeal to a range of scholars and practitioners working in law public health politics and science and technology studies

Interdisciplinary Perspectives on Trust Ellie Shockley,Tess M.S. Neal,Lisa M. PytlikZillig,Brian H. Bornstein,2015-10-21 This timely collection explores trust research from many angles while ably demonstrating the potential of cross discipline collaboration to deepen our understanding of institutional trust Citing among other things current breakdowns of trust in prominent institutions the book presents a multilevel model identifying universal aspects of trust as well as domain and context specific variations deserving further study Contributors analyze similarities and differences in trust across public domains from politics and policing to medicine and science and across languages and nations Innovative strategies for measuring and assessing trust also shed new light on this essentially human behavior Highlights of the coverage Consensus

on conceptualizations and definitions of trust are we there yet Differentiating between trust and legitimacy in public attitudes towards legal authority Examining the relationship between interpersonal and institutional trust in political and health care contexts Trust as a multilevel phenomenon across contexts Institutional trust across cultures The dark side of institutional trust With its stimulating array of concepts and applications Interdisciplinary Perspectives on Trust will attract a varied audience among them experts in political science criminal justice psychology law economics healthcare sociology public administration cross cultural studies and business administration

*Prisons, Punishment, and the Family* Rachel Condry, Peter Scharff Smith, 2018 Every year millions of families are affected by the imprisonment of a family member Children of imprisoned parents alone can be counted in millions in the USA and in Europe It is a bewildering fact that while we have had prisons for centuries and the deprivation of liberty has been a central pillar in the Western mode of punishment since the early nineteenth century we have only relatively recently embarked upon a serious discussion of the severe effects of imprisonment for the families and relatives of offenders and the implications this has for society This book draws together some of the excellent research that addresses the impact of criminal justice and incarceration in particular upon the families of offenders It assembles examples of recent and ongoing studies from eight different countries in order to not only learn about the secondary effects and collateral consequences of imprisonment but also to understand what the experiences and lived realities of prisoners families means for the sociology of punishment and our broader understanding of criminal justice systems While punishment and society scholarship has gained significant ground in recent years it has often remained silent on the ways in which the families of prisoners are affected by our practices of punishment This book provides evidence of the importance of including families within this scholarship and explores themes of legitimacy citizenship human rights marginalization exclusion and inequality

**Nobody's Law** Marc Hertogh, 2018-06-14 Nobody's Law shows how people who are disappointed disenchanted and outraged about the justice system gradually move away from law Using detailed case studies and combining different theoretical perspectives this book explores the legal consciousness of ordinary people businessmen and street level bureaucrats in the Netherlands The empirical research in this study tells an original and alternative narrative about the role of law in everyday life While previous studies emphasize the law's hegemony and argue that it's all over Hertogh shows that legal proliferation makes it harder for people to know and subsequently identify with the law As a result official law has become increasingly remote and irrelevant to many people The central finding presented in this highly topical text is that these developments signal a process of legal alienation a gradual and mundane process with potentially serious consequences for the legitimacy of law A timely and original study this book will be of particular interest to scholars in the fields of law and society socio legal studies and legal theory

anthropology and many others      **Regulating Corporate Bribery in International Business** Nicholas Lord, 2016-04-08

This book is about the regulation of corporations that use bribery in international commerce to win or maintain overseas business contracts and interests. Recent large scale cases involving multinational corporations demonstrate how large commercial non criminal enterprises are being implicated in substantive overseas bribery scandals and illustrate the difficulties faced by responsible enforcement authorities in the UK and Germany. The book imports concepts from regulation theory to aid our understanding of the emerging enforcement self regulatory and hybrid responses to transnational corporate bribery. Lord implements a qualitative comparative research strategy involving semi structured interviews, participant observation and document analysis to provide empirical insights into this relatively invisible area of criminological interest. Despite significant cultural differences between the jurisdictions, this book argues that UK and German anti corruption authorities face procedural, evidential, legal, financial and structural difficulties that are leading to convergence in prosecution policies. Although self regulatory and hybrid mechanisms are aiding the response and gaining some level of regulation, the default position is one of accommodation by state agencies even where the will to enforce the law is high. This book is essential reading for academics and students researching corporate and white collar crimes and the concept of regulation more generally, as well as law enforcement agencies and international and intergovernmental organisations concerned with anti corruption.
