*Legitimacy, Legal Development and Change* David K. Linnan, 2016-04-22 This book addresses critical questions about how legal development works in practice Can law be employed to shape behavior as a form of social engineering or must social behavior change first relegating legal change to follow as ratification or reinforcement And what is legal development s source of legitimacy if not modernization But by the same token whose version of modernization will predominate absent a Western monopoly on change There are now legal development alternatives especially from Asia so we need a better way to ask the right questions of different approaches primarily in non Western Asia Africa the Islamic world plus South America Incoming waves of change like the Arab spring lie on the horizon Meanwhile debates are sharpening about law s role in economic development versus democracy and governance under the rubric of the rule of law More than a general survey of law and modernization theory and practice this work is a timely reference for practitioners of institutional reform and a thought provoking interdisciplinary collection of essays in an area of renewed practical and scholarly interest The contributors are a distinguished international group of scholars and practitioners of law development social sciences and religion with extensive experience in the developing world Justice Reform and Development Linn A.

Hammergren, 2014-04-29 This book explores the objectives pursued in donor programs the methods used to advance them and the underlying assumptions and strategies It emphasizes the unexpected and sometimes unpleasant consequences of ignoring not only political and societal constraints but also advances in our technical approaches to performance improvement the one area where the First World has a comparative advantage The geographic scope of the work is broad incorporating examples from Eastern and Central Europe Latin America Africa and the Asia Pacific region as well as from several First World nations Justice Reform and Development examines First World assistance to justice or rule of law reforms in developing and transitional societies arguing that its purported failure is vastly exaggerated largely because of unrealistic expectations as to what could be accomplished Change nonetheless is needed if the programs are to continue and would be best based on targeting specific performance problems incorporation of donor countries experience with their own reforms and greater attention to relevant research While contributing to an on going debate among practitioners and academics involved in justice programs this book will also be accessible to readers with little exposure to the topics especially advanced undergraduate and graduate students in law political science and areas studies The Socio-Cultural, Ethnic and Historic

Seeking Supremacy Yasser Kureshi,2022-09-15 The emergence of the judiciary as an assertive and confrontational center of power has been the most consequential new feature of Pakistan s political system This book maps out the evolution of the relationship between the judiciary and military in Pakistan explaining why Pakistan s high courts shifted from loyal deference to the military to open competition and confrontation with military and civilian institutions Yasser Kureshi demonstrates that a shift in the audiences shaping judicial preferences explains the emergence of the judiciary as an assertive power center As the judiciary gradually embraced less deferential institutional preferences a shift in judicial preferences took place and the judiciary sought to play a more expansive and authoritative political role Using this audience based approach Kureshi roots the judiciary in its political social and institutional context and develops a generalizable framework that can explain variation and change in judicial military relations around the world

**Overcoming the Corruption Conundrum in Africa** Anzanilufuno Munyai,2020-01-15 This book adopts a holistic approach to identifying what could be done to surmount the corruption conundrum in the African continent It acknowledges the objective reality of corruption in Africa and identifies primary solutions to the issue The volume takes a socio legal approach in order to reveal the nature and extent of corruption and suggests that solutions can be found simply by interrogating how society reacts to it In conjunction with this the book identifies and critiques constraints in the formation of a definitive definition of corruption As shown here although it is critical for African states to develop anti corruption strategies the solution to the problem requires an understanding of the significance of political will and how the lack thereof has led to the endurance of corruption in Africa

**Saving the Sacred Sea** Kate Pride Brown,2018-03-01 Civil society is a

loaded concept in Russia during the Soviet period the voices that heralded civil society were the same ones that demanded the Union's dissolution So for the Kremlin civil society is not the guarantor of democracy but a force that has the power to end governments This book looks at how civil society negotiates power on a global stage under Russia's authoritarian regime and in a particularly isolated and remote part of the world within environmental activism around Lake Baikal in Siberia More than a mile deep Lake Baikal is the oldest deepest and most voluminous lake on the Earth and home to thousands of endemic species It is also ecologically unique in that it is oxygenated to its maximum depth and supports life even at the lake floor a phenomenon occurring nowhere else on the planet The lake is not just a natural wonder but home to a strong environmentalist community that works tirelessly to protect the lake from human harm Environmentalism at Baikal began in the late 1950s eventually igniting the first national protest in the USSR They have remained active in some form ever since across the years of chaos instability and crisis from the opening of Russia to the forces of globalization to the authoritarianism of Putin in the present This book examines the struggle of Baikal environmentalists to develop a new understanding of civil society under conditions of globalization and authoritarianism Through extended historically informed ethnographic analysis Kate Pride Brown argues that civil society is engaged with political and economic elites in a dynamic struggle within a field of power Understanding the field of power helps to explain a number of contradictions For example why does civil society seem to both bolster democracy and threaten it Why do capitalist corporations and environmental organizations form partnerships despite their general hostility toward each other And why has democracy proven to be so elusive in Russia The field of power posits new answers to these questions as Baikal environmental activists struggle to protect and save their Sacred Sea

*Beyond the Euromaidan* Henry E. Hale, Robert W. Orttung, 2016-09-07 *Beyond the Euromaidan* examines the prospects for advancing reform in Ukraine in the wake of the February 2014 Euromaidan revolution and Russian invasion It examines six crucial areas where reform is needed deep internal identity divisions corruption the constitution the judiciary plutocratic oligarchs and the economy On each of these topics the book provides one chapter that focuses on Ukraine's own experience and one chapter that examines the issue in the broader context of international practice Placing Ukraine in comparative perspective shows that many of the country's problems are not unique and that other countries have been able to address many of the issues currently confronting Ukraine As with the constitution there are no easy answers but careful analysis shows that some solutions are better than others Ultimately the authors propose a series of reforms that can help Ukraine make the best of a bad situation The book stresses the need to focus on reforms that might not have immediate effect but that comparative experience shows can solve fundamental contextual challenges Finally the book shows that pressures from outside Ukraine can have a strong positive influence on reform efforts inside the country

**The Alchemists** Tom Gerald Daly, 2017-11-02 Can courts really build democracy in a state emerging from authoritarian rule This book presents a searching critique of the contemporary global model of democracy building for

post authoritarian states arguing that it places excessive reliance on courts Since 1945 both constitutional courts and international human rights courts have been increasingly perceived as alchemists capable of transmuting the base materials of a nascent democracy into the gold of a functioning democratic system By charting the development of this model and critically analysing the evidence and claims for courts as democracy builders this book argues that the decades long trend toward ever greater reliance on courts is based as much on faith as fact and can often be counter productive Offering a sustained corrective to unrealistic perceptions of courts as democracy builders the book points the way toward a much needed rethinking of democracy building models and a re evaluation of how we employ courts in this role **Third**

**Protecting Minority Rights in African Countries** John M. Mbaku, 2018-01-26 In this enlightening book John Mukum Mbaku analyses the main challenges of constitutional design and the construction of governance institutions in Africa today He argues that the central issues are providing each country with a constitutional order that is capable of successfully managing sectarian conflict and enhancing peaceful coexistence protecting the rights of citizens including those of minorities minimizing the monopolization of political space by the majority to the detriment of minorities and effectively preventing government impunity Mbaku offers a comprehensive analysis of various approaches to the management of diversity and shows how these approaches can inform Africa s struggle to promote peace and good governance He explores in depth the existence of dysfunctional and anachronistic laws and institutions inherited from the colonial state and the process through which laws and institutions are formulated or constructed adopted and amended A close look at the constitutional experiences of the American Republic provides important lessons for constitutional design and constitutionalism in Africa Additionally comparative politics and comparative constitutional law also provide important lessons for the management of diversity in African countries Mbaku recommends state reconstruction through constitutional design as a way for each African country to provide itself with laws and institutions that reflect the realities of each country including the necessary mechanisms and tools for the protection of the rights of minorities From students and scholars to NGOs lawyers and policymakers this unique and judicious book is an essential tool for all those seeking to understand and

**Religious Diversity in Muslim-majority States in Southeast Asia**

Bernhard Platzdasch, Johan Saravanamuttu, 2014-08-06 This book fills a gap in authoritative analyses of the causes of inter religious conflict and the practice of religious toleration The rise of more overt expressions of Islamic piety and greater bureaucratization of Islam in both Indonesia and Malaysia over several decades have tested the live and let live philosophy which used to characterize religious expression in these nations The analyses in each chapter of the book break new ground with contextualized studies of particular and recent incidents of conflict or harassment in a variety of areas from urban centres to more remote and even complex locations As these studies show legislation stands or falls on the ability and determination of local authorities to enforce it This volume is essential reading for understanding the dynamics of state religious interaction in Muslim majority nations and the crucial role civil society organizations play in negotiating interfaith toleration Emeritus Professor Virginia Hooker FAHA Department of Political Social Change College of Asia the Pacific The Australian National University A most welcome contribution to the academic discourse of political Islam in Indonesia and Malaysia For this volume focuses not on Islamic resurgence as many others have done but on the impact of Islamic resurgence upon its non Muslim minority counterparts Buddhists Christians Hindus and also the Syiah Muslims in the two plural societies and the varying responses of those minorities themselves often fragmented to Islamic resurgence The rich case studies highlight the changing character of politics in the two countries and their capacities to deal with religious diversity an aspect of politics often ignored because of the usual concern for economic and political institutional capacities The juxtaposition of Malaysian and Indonesian cases in a single volume and comparisons of contrasting developments in the two countries challenges readers not to resort to easy conclusions and overgeneralizations about rising inter religious tensions but to give more scholarly attention to this politics religion diversity nexus Emeritus Professor Francis Loh Kok Wah Department of Political Science Universiti Sains Malaysia
