Deconstructing LEGO Jonathan Rey Lee,2020-09-08 This book investigates a paradox of creative yet scripted play how LEGO invites players to build freely with and within its highly structured ideologically laden toy system First this book considers theories and methods for deconstructing LEGO as a medium of bricolage the creative reassembly of already significant elements Then it pieces together readings of numerous LEGO sets advertisements videogames films and other media that show how LEGO constructs five ideologies of play construction play dramatic play digital play transmedia play

and attachment play From suburban traffic patterns to architectural croissants from feminized mini doll bodies to toys to life stories from virtual construction to playful fan creations this book explores how the LEGO medium conveys ideological messages not by transmitting clear statements but by providing implicit instructions for how to reassemble meanings it had all along The Power of Little Ideas David Robertson,2017-04-11 The logical and enduring way to innovate Conventional wisdom today says that to survive companies must move beyond incremental sustaining innovation and invest in some form of radical innovation Disrupt yourself or be disrupted is the relentless message company leaders hear The Power of Little Ideas argues there s a third way that is neither sustaining nor disruptive This low risk high reward strategy is an approach to innovation that all company leaders should understand so that they recognize it when their competitors practice it and apply it when it will give them a competitive advantage This distinctive approach has three key elements It consists of creating a family of complementary innovations around a product or service all of which work together to make that product more appealing and competitive The complementary innovations work together as a system to carry out a single strategy or purpose Crucially unlike disruptive or radical innovation innovating around a key product does not change the central product in any fundamental way In this powerful practical book Wharton professor David Robertson illustrates how many well known companies including CarMax GoPro LEGO Gatorade Disney USAA Novo Nordisk and many others used this approach to stave off competitive threats and achieve great success He outlines the organizational practices that unintentionally torpedo this approach to innovation in many companies and shows how organizations can overcome those challenges Aimed at leaders seeking strategies for sustained innovation and at the quickly growing numbers of managers involved with creating new products The Power of Little Ideas provides a logical organic and enduring third way to innovate

*Free with Every Kids' Meal* Jonathan Alexandratos, 2025-07-10 When we hear the term fast food toys many of us picture specific favorites Whether they be the McDonald s Changeables Burger King s expansive Lord of the Rings figurines or the Star Wars Episode I premiums that gripped Taco Bell KFC and Pizza Hut simultaneously chances are high that you have a nostalgic go to But why Perhaps the element of surprise an unexpected toy accompanying your lunch delighted you as a child Maybe you loved the promotion s source material and wanted to collect everything within its domain Or it could be that this tiny random plaything intersected with your life at just the inexplicably right moment Whatever the case may be toys tucked into kids meals are designed to be

disposable but many of our experiences prove them to be anything but While there are many books devoted to cataloguing various fast food promotional products this is the first to undertake a deep analysis of their cultural impact By digging deep into kids meals past and present this work uncovers the history of their toys This work guides examines the ways in which these simple prizes interact with societal factors like race gender class and economics by connecting their analyses with the work of top theorists In so doing we learn why these allegedly forgettable toys embed in memory not because of the toy at the bottom of a brightly colored food container but because there in the in between space of toy and meal permanent and temporary meaningless and meaningful we find ourselves      **Virtual Reality: The Last Human Narrative?** Thorsten

Botz-Bornstein,2015-07-14 Is virtual reality the latest grand narrative that humanity has produced Our civilization is determined by a shift from an original event to a virtual narrative This concerns not only virtual reality but also psychoanalysis gene technology and globalization Psychoanalysis transforms the dream into a narrative and is able to spell out the dream s symbols Gene technology narrates dynamic self evolving evolution as a gene code Discourses on globalization let the globe appear as once more globalized because reproduced through narrative Finally reality itself has come to be narrated in the form of a second reality that is called virtual This book attempts to disentangle the characteristics of human reality and posthuman virtual reality and asks whether it is possible to reconcile both      Traditional Knowledge,

Traditional Cultural Expressions, and Intellectual Property Law in the Asia-Pacific Region Christoph Antons,2009-01-01 Among the many contentious matters thrown up by the relentless march of economic globalization those forms of knowledge variously known as indigenous or traditional remain seriously threatened despite numerous transnational initiatives and highly publicized debate It is not proving easy to bring these holistic worldviews into accordance with the technical terms and classifications of intellectual property law The contributions in this volume contrast efforts to find solutions and workable models at the international and regional level with experiences on the ground Legal policies related to indigenous knowledge in settler societies such as Australia and New Zealand are compared with those in densely populated neighbouring countries in Asia where traditional knowledge is often regarded as national heritage While many of the chapters are written by lawyers using an interdisciplinary approach other chapters introduce the reader to perspectives from disciplines such as legal sociology and anthropology on controversial issues such as the understandings of art culture tradition customary law and the opportunities for traditional cultural knowledge and traditional cultural expressions in an Internet environment Experienced observers of the international debate and regional experts discuss international model laws as well as legislation at regional and national level and the role of customary law Topics covered include the following and much more the concept of farmers rights biodiversity and bioprospecting traditional knowledge as a commodity encounters between different legalities geographical indications registration requirements sanctions remedies and dispute resolution mechanisms the ongoing fragmentation and loss of traditional knowledge and systems of data collection      *Digital Project Practice for New Work and*
