Math Made A Bit Easier Basic Math Explained In Plain English:

Math Made a Bit Easier Larry Zafran, 2009-11-02 An independent book written and self published by former math teacher and private math tutor Larry Zafran Students are justified in proclaiming that math is hard but there is a specific reason why they feel this way The author maintains that the struggle can be lessened by following the roadmap presented but it will take time and effort on the part of the student Since math is often not properly taught it is often not properly learned Anything that hasn't truly been learned regardless of subject is hard Once the various concepts are more secure and the student's gaps in understanding have been addressed math will have been made a bit easier as promised by the book's title However the book does not imply that learning math is fast fun or easy Most of the book's content is comprised of the roadmap of topics for a student to work through at his/her own pace Like all paths it begins at the beginning in this case starting with a review of basic arithmetic followed by basic operations negative numbers fractions decimals percents and basic probability and statistics This is the foundation of all math The space devoted to each topic is proportional to how difficult most students find the topic as well as how important the topic is in preparation for later math studies The material is explained conversationally and in plain English as promised by the book's subtitle without talking down to the reader and without the use of contrived examples or cartoonish illustrations The book concludes with a chapter on how to effectively study math and improve scores on exams Like the rest of the book the chapter takes a unique standpoint on the matter and offers suggestions which include how to get oneself into the proper mental and emotional mindset for being successful with math

Basic Algebra and Geometry Made a Bit Easier: Concepts Explained In Plain English, Practice Exercises, Self-Tests, and Review Larry Zafran, 2010-03-18 This is the fourth book in the Math Made a Bit Easier series by independent author and math tutor Larry Zafran As the second main book of the series it builds upon the first book which covered key topics in basic math Before working with this book it is absolutely essential to have completely mastered all of the material from the first book Continuing the roadmap which began with the first book this book covers the basics of the following topics of algebra and geometry Expressions equations inequalities exponents factoring the FOIL method lines angles area perimeter volume triangles the Pythagorean Theorem linear equations and the Cartesian coordinate plane Again if the prerequisite material from the first book has not been fully learned the student will almost certainly proclaim that this book and its material are hard and will continue to feel frustrated with math There is no way to avoid learning math step by step at one's own pace This book emphasizes concepts which commonly appear on standardized exams While it does not go into great detail about any concept it explains the material conversationally and in plain English Some practice exercises and self tests are included Mastery of these concepts will likely be sufficient for the student to achieve his/her math goals but more advanced exams may require some knowledge of material presented in later books in the series

Weight Loss Made a Bit Easier Larry Zafran,2011-04-19 A book by independent author Larry Zafran who overcame three decades of being overweight It is important for the prospective reader to understand for whom this book is NOT intended and what this book is NOT about This is not a diet book It does not include recipes menu plans eating schedules or calorie listings It is not an exercise book It does not include exercise schedules or routines or pictures or detailed descriptions of exercises It does not imply that losing weight is fast fun or easy This book is NOT intended for anyone waiting for a weight loss solution in the form of a new food drink diet exercise DVD gadget drug or supplement It is not intended for anyone hoping to lose weight via counting calories and regular weigh ins It is not intended for anyone morbidly obese or who has a medical condition requiring a doctor s supervision or anyone convinced that s he is genetically programmed to be overweight This book is intended for adults with typical modern lifestyles who are willing and able to accept that efficient and permanent weight loss requires basic effort and awareness as well as small gradual practical changes to both eating and exercise habits The author is not a doctor celebrity personal trainer or dietician After briefly describing his personal weight loss story the book provides guidance for becoming aware of one s eating and exercise patterns and slowly modifying them such that any changes are sustainable for life The book includes chapters on emotional and interpersonal issues in weight

loss the impact of restaurants fast food advertisers the news media American culture and myths The author advocates using a detailed journal to track patterns and foster accountability A companion journal is available but need not be purchased The book describes how to make a journal oneself Blank pages from the companion journal may be printed at no cost via the author s website which also hosts a discussion forum *America's (Math) Education Crisis* Larry Zafran,2010-10-19 America s education system is in a state of crisis A growing number of America s youth cannot read write or do math at all close to grade level In many cases these students and their families do not realize this or care The situation is compounded by the fact that American society no longer values education and does not understand how learning actually works Frequent reference is made to the illusion of learning in underperforming schools The book explains the difference between true learning and just being exposed to material It explains the essential role that parents play and that even with encouragement a child cannot be forced to learn The book is targeted at parents teachers administrators government officials and concerned citizens Older students may also benefit from reading it Despite its frankness about topics which are often disregarded and avoided there is nothing in the book that students don t intuitively understand In particular many students regularly experience the anonymity of being herded like cattle The goal of the book is to raise awareness and discuss whether we can fix the problem We cannot address our nation s education crisis until people understand its underlying causes and scope The book tells the truth in contrast to the misinformation provided by the government and the news media Suggested changes for improvement are made including those that can be implemented quickly and easily and those that require a great deal of money and coordination along with a fundamental change in how America handles education This book is controversial and covers issues that may anger upset or confuse some readers The book includes curse words to paint a vivid picture of the way many students speak and bluntly labels key aspects of our education system as bullsh t where applicable The Complete Homeschool Planner and Journal Larry Zafran,2011-05-13 A planner and journal for homeschoolers and involved parents by independent author and math tutor Larry Zafran This record book provides space for 180 days of comprehensive homeschool planner journal entries spanning 20 subjects They are self explanatory and adaptable for homeschoolers or involved parents who are tracking or supplementing the education of traditional school students The book also includes an attendance calendar forms to document the syllabus textbooks and materials being used for each subject and fields to document other pieces of information which may be requested and or required by government or school officials Additional printable pages from the book can be downloaded at no cost via the author s website which also hosts a discussion forum

Basic Algebra and Geometry Made a Bit Easier Lesson Plans Larry Zafran,2010 This is the fifth book in the Math Made a Bit Easier series by independent math tutor Larry Zafran It contains 50 abridged lesson plans covering basic algebra and geometry for a target audience of tutors parents and homeschoolers Each lesson plan includes all of the components of a typical classroom lesson such as aim motivation warm up exercises demonstrative examples questions for thought and

discussion and connections to earlier and later material This book is intended to be used in strict conjunction with the fourth book of the series Basic Algebra and Geometry Made a Bit Easier Concepts Explained in Plain English The book assumes that the instructor actually knows the material him herself but could benefit from having a general guideline to follow The author makes a point of identifying the concepts which most students tend to find easy or difficult including suggestions on how to help with the latter The book includes an introduction describing how the book can be put to best use as well as a section on how to effectively work with students who are struggling with the material The author explains that for the vast majority of students the root of the problem can be traced back to never having fully mastered basic math concepts and skills The book s lessons make frequent reference to reviewing earlier books in the series as needed so that the student masters all of the prerequisite material

Twelve Warm Bodies Larry Zafran, 2016-04-01 Readers may be surprised to learn that this protest begins with the following statement If you are called for jury duty and are reasonably able to serve it is important that you support your fellow Americans by serving to the best of your ability and with complete honesty even if serving is inconvenient or unpleasant Having said that the premise of the protest is as follows America s jury duty system much like American society in general has degraded to the point where it is essentially defunct The system i e summoning random citizens to appear in court is essentially the same as it has always been yet over the course of just the last 50 years American society and the average American citizen have completely changed By any reasonable standard America has become a completely new country and its citizens have devolved into a less advanced species The majority of people summoned for jury duty are not qualified to serve at least not by any reasonable standard Being the proverbial warm body albeit one who is a non felon American citizen and at least 18 years old is not sufficient At minimum a juror must be able to completely understand everything that transpires in a case and be intellectually capable of doing more than simple keyword matching Compliance with juror summonses is low Some are wastefully sent to people who have moved or are deceased but the concern is that many people toss their summonses in the garbage while likely thinking I never got it I never signed for it It wasn t sent with delivery confirmation They can t prove anything Let s see them waste their limited budget to come after me Even though the overwhelming majority of court cases are not handled by a jury we can t have a system in which criminals are set free because they were entitled to a trial by a jury of their peers but no such people were available We also can t have a system in which people who have been falsely accused of wrongdoing are left with no other option than to plead their case to a judge If someone mentions the phrase jury duty at a social gathering many people chime in with horror stories perhaps secondhand about bad experiences and share excuses and tactics they ve used or have heard were used to get out of attending or serving on a given case Some people are uncomfortable deciding whether to sentence a potentially innocent person to a long harsh prison term if not death or awarding a large sum of money in a civil case Others have anxiety about the logistics or financial ramifications of serving and are concerned about losing their job being punished by their employer or falling behind on work

For the self employed or unemployed the concern may be lost wages or opportunities The book includes sections addressing the minimum age and education level required of jurors volunteering for service references to religion in courthouses jury nullification plea bargaining with alleged criminals without juror approval grand jury duty mandatory jury service the juror handbook juror safety the penalty for perjury jury duty scams a list of things the government can do to improve juror turnout and a list of reasons why people are giving up on America s justice system Jury duty was is and hopefully always will be integral to America s system of justice Having said that our current system has become horribly outdated and a great deal of change is needed Hopefully this book will serve as a model of how someone can express his her viewpoints on a matter in a non violent non destructive and non disruptive manner The power to change laws policies and the collective consciousness of The People is best accomplished through the written or spoken word and as a last resort through non violent non destructive and non disruptive demonstrations or acts of civil as in civilized disobedience and resistance

Mathematics as an Educational Task Hans Freudenthal,2012-12-06 Like preludes prefaces are usually composed last Putting them in the front of the book is a feeble reflection of what in the style of mathematics treatises and textbooks I usually call the didactical inversion to be fit to print the way to the result should be the inverse of the order in which it was found in particular the key definitions which were the finishing touch to the structure are put at the front For many years I have contrasted the didactical inversion with the thought experiment It is true that you should not communicate your mathematics to other people in the way it occurred to you but rather as it could have occurred to you if you had known then what you know now and as it would occur to the student if his learning process is being guided This in fact is the gist of the lesson Socrates taught Meno s slave The thought experiment tries to find out how a student could re invent what he is expected to learn I said about the preface that it is a feeble reflection of the didactical inversion Indeed it is not a constituent part of the book It can even be torn out Yet it is useful Firstly to the reviewer who then need not read the whole work and secondly to the author himself who like the composer gets an opportunity to review the Leitmotifs of the book
