easy to adapt to each teacher's needs. These are the books that secondary teachers have been waiting for to help engage students in building number sense. Pamela J. Dombrowski, Secondary Math Specialist, Geary County School District, Junction City, KS. Kickstart your high school math class. Do your students need more opportunities to develop number sense and reasoning? Are you looking to get your students energized and talking about mathematics? Have you wondered how practical, replicable, and engaging activities would complement your mathematics instruction? This guide answers the question: What could I do differently? Taking cues from popular number sense and reasoning routines, this book gives you the rundown on how to engage in five different daily 5-10 minute routines, all of which include content-specific examples, extensions, and variations of each for algebra, functions, geometry, and data analysis. Video demonstrations allow you to see the routines in action, and the book includes a year's worth of daily instructional material that you can use to begin each class period. The routines in this book will help students frequently revisit essential mathematical concepts, foster and shore up conceptual understanding, engage in mental mathematics leading to efficiency and fluency, engage in mathematical discourse by constructing viable arguments and critiquing the reasoning of others, reason mathematically, and prepare for high-stakes assessments. Move learning beyond correctness by valuing mistakes and discourse and encouraging a growth mindset. From trusted authors and experts, Eric Milou and John SanGiovanni, this teacher-friendly resource will give you all the tools and tips you need to reinvent those critical first five or ten minutes of math class for the better. **The ERIC Review**, 1999. Mathematics and Science Across the Curriculum, 2002. *Making Math Accessible to Students With Special Needs (Grades 9-12)*. r4Educated Solutions, 2011-12-30. The purpose of *Making Math Accessible to Students With Special Needs* is to support everyone involved in mathematics education to become confident and competent with mathematics instruction and assessment so that 99% of students will be able to access enrolled grade-level mathematics. Six chapters address topics critical to effective mathematical instruction, such as federal and state legislation, research-based instructional best practices in mathematics, and the selection, administration, and evaluation of accommodations for instruction and assessment. These topics are combined to offer teachers understandable, practical instructional procedures. The resource guides readers through the 5E instructional model, which provides an array of choices and strategies for providing high-quality instruction to all students. This resource actively engages readers through reflections and tasks in each chapter and can be used as a self-study, professional development, or as a group book study. Sample answers to tasks and reflections are found in the appendix along with additional supports. [The Organized Child](#). Richard Gallagher, Elana G. Spira, Jennifer L. Rosenblatt, 2018-01-18.
