Whether it is earning a GED a particular skill or technical topic for a career taking classes of interest or even returning to begin a degree program or completing it adult learning encompasses those beyond the traditional university age seeking out education This type of education could be considered non traditional as it goes beyond the typical educational path and develops learners that are self initiated and focused on personal development in the form of gaining some sort of education Essentially it is a voluntary choice of learning throughout life for personal and professional development While there is often a large focus towards K 12 and higher education it is important that research

also focuses on the developing trends technologies and techniques for providing adult education along with understanding lifelong learners choices developments and needs The Research Anthology on Adult Education and the Development of Lifelong Learners focuses specifically on adult education and the best practices services and educational environments and methods for both the teaching and learning of adults This spans further into the understanding of what it means to be a lifelong learner and how to develop adults who want to voluntarily contribute to their own development by enhancing their education level or knowledge of certain topics This book is essential for teachers and professors course instructors business professionals school administrators practitioners researchers academicians and students interested in the latest advancements in adult education and lifelong learning

An Alternative Framework for Community Learning Centers in the 21st Century Michael F. Reber, 2003 Public Community Learning Centers CLCs at least in the context of the United States are social structures that have been established to address particular community needs In the beginning they were instituted as extensions of state departments human services in order to assist communities with programs such as adult literacy and high school graduation certification Today they have taken on a broader role as a result of the Elementary and Secondary Education Act Title X Part I that gives rural and inner city public schools nearly 2 billion over five years 1999 2004 to develop CLCs for programs such as mentoring in basic skills or helping high school students prepare for college Despite these noble efforts public CLCs are still not integral parts of community sustainability One could argue that a major cause for this is that they are established mainly for political purposes However the problem is much deeper Public CLCs today are unable to serve as sustainable social structures because they lack several foundational principles that assist communities with creating and maintaining sustainability In short they do not adequately reflect the values beliefs and knowledge of the current community education movement Thus an alternative framework within which communities can develop CLCs is needed Using a systemic design approach toward the design of a community learning system an alternative framework for CLCs is designed that enables communities to create the conditions whereby they can become self reliant self governing and sustainable

Theoretical and Historical Evolutions of Self-Directed Learning Caleb Collier, 2023-04-14 This book analyzes the deep historical and theoretical roots of self-directed learning models in order to put forward a new conceptual understanding of self-directed learning. It utilizes philosophical methods to present arguments both historical and contemporary in favor of shifting education toward self-directed models and away from a view of education that places teachers, administration, curriculum, and standards at the center of the learning endeavor. This book demonstrates that self-directed learning has proven to be effective in numerous contexts and builds on this history to present a new philosophy of education termed Eudemonic Self-Directed Learning for individual and societal flourishing. Exploring exemplars from different cultural and historical settings to inform post-pandemic pedagogies and policies, this book will appeal to scholars and researchers of the history and philosophy of education with interests in self-directed learning and its potential for contemporary practice.
