Managing for Learning Melissa Adelman, Renata Lemos, 2021-05-20 How can countries make sustainable gains in student learning at scale This is a pressing question for Latin America and the Caribbean LAC and the developing world more broadly as countries seek to build human capital to drive sustainable growth Significant progress in access has expanded coverage such that nearly all children in the region attend primary school but many do not gain basic skills and drop out before completing secondary school in part due to low quality service delivery The preponderance of evidence shows that it is learning and not schooling in and of itself that contributes to individual earnings economic growth and reduced inequality For LAC in particular low levels of human capital are a critical factor in explaining

the region's relatively weak growth performance over the last half century. The easily measurable inputs are well known and the end goal is relatively clear but raising student achievement at scale remains a challenge. Why? Part of the answer lies in management: the managers' structures and practices that guide how inputs into the education system are translated into outputs and ultimately outcomes. While management is often mentioned as an important factor in education policy discussions, relatively little quantitative research has been done to define and measure it. And even less has been done to unpack how and how much management matters for education quality. This study presents new conceptual and empirical contributions that can be synthesized in four key messages: 1. Student learning is unlikely to improve at scale without better management. 2. Management quality can be measured and should be measured as a catalyst for improvement. 3. Management affects how well every level of an education system functions from individual schools to central technical units and how well they work together. 4. Several pathways to strengthening management are open to LAC countries now with the potential for significant results. The study elaborates on each of these messages synthesizing recent data and research and presenting the results of several new research initiatives from across the region.

Sociological Practice Review, 1990 Adolescence

, 2002. An international quarterly devoted to the physiological, psychological, psychiatric, sociological, and educational aspects of the second decade of human life. The Encyclopedia of Middle Grades Education. Steven B. Mertens, Vincent A.

Anfara, Gayle Andrews, 2005-10-01. The Encyclopedia of Middle Grades Education provides a comprehensive overview of the field. This publication includes seven anchor essays (5000 words) that cover the following topics: the history of the middle school movement; academically excellent curriculum, instruction, and assessment; developmental responsiveness in relation to young adolescents; social equity in middle grades schools; leadership in middle level schools; teacher and administrator preparation and professional development; and future directions in relation to the movement. Practices and policy. Leading scholars in the field of middle grades education were invited to author these essays. In addition to the seven anchor essays, the encyclopedia contains alphabetically organized entries: short entries (approximately 500 words) and long entries (approximately 2000 words) that address important concepts, ideas, terms, people, organizations, and seminal publications related to middle grades education. Contributors to the encyclopedia have provided sufficient information so that the reader can place the idea, concept, person, etc. into its proper context in the history of the middle school movement. Entries are meant to be introductory; after an overview of the essentials of the topic, the reader is guided to more extensive sources for further investigation. Where appropriate, the reader is also directed to electronic sources such as websites where additional information can be retrieved.

Education Policy for the 21st Century. Lawrence B. Joseph, 2001. Amid widespread concern that schools are failing to prepare students for workforce participation, higher education, and the economic and technological challenges of the twenty-first century, public school reform efforts across the nation have focused increasingly on standards, performance, and accountability. A particularly critical question involves improving educational opportunities for children in poverty and for

other at risk students who represent an increasing proportion of public school enrollment Education Policy for the 21st Century examines a range of key issues in standards based education reform Contributors focus on educational trends and issues in metropolitan Chicago state education policy in Illinois lessons of Chicago school reform and standards based systemic reform in other states The volume also includes chapters on standards and assessment in school accountability systems effects of school spending on student achievement and building level obstacles to urban school reform Presenting valuable data and a variety of perspectives this book illuminates both the challenges and opportunities presented by standards based education reform
