Learning Natural Capital And Sustainable Development Options For An Uncertain World:

Learning, Natural Capital and Sustainable Development John Michael Foster, Stephen Gough, 2005 This special issue of the journal Environmental Education Research looks at how the dominant model of steady development underpinned by a particular understanding of the natural capital metaphor impedes progress towards genuine sustainability

Learning, Natural Capital and Sustainable Development John Foster, Stephen Gough, 2013-09-13 This special issue of the journal Environmental Education Research addresses a topical area of importance human behaviour towards the environment The book explores the economic metaphor of natural capital in this context arguing that the currently dominant model of sustainable development underpinned by a particular understanding of this metaphor is impeding progress towards genuine sustainability and secondly that it will continue to do so until the metaphor can be reworked in both thought and practice This book explores an alternative economic model of natural capital value based on recent real options thinking which reworks the natural capital idea and provides a framework for articulating two major and closely related shifts of emphasis

Work, Learning and Sustainable Development John Fien, Rupert Maclean, Man-Gon Park, 2008-10-26 This book is the first that provides a comprehensive overview of the way countries education systems and institutions have responded to the call for an integration of learning for work citizenship and sustainability at the Second International Conference on Technical and Vocational Education which was held in Seoul in 1999 Discussions on the central theme of the Seoul Conference lifelong learning and training for all a bridge to the future led to the conclusion that a new paradigm of both development and Technical and Vocational Education TVET was needed This book showcases the wide range of international initiatives that have sought to put such exhortations into practice It includes case studies of national TVET policy reforms reoriented curricula sustainable campus management programs and examples of innovative approaches to integrating learning in TVET with on the job training and in community service It also focuses on the issues and challenges being faced and ways of moving forward Case studies feature initiatives in a wide range of world regions and countries and include authors from UK Germany Finland Canada USA Australia South Africa China Republic of Korea India Pakistan and the Philippines

Real Green Manuel Arias-Maldonado, 2016-03-23 What would a sustainable society look like How could it be achieved By challenging conventional wisdom about the ecological crisis and reframing the traditional values of green politics Real Green Sustainability after the End of Nature offers new answers to the key questions of the environmental debate In this ground breaking and challenging work Manuel Arias Maldonado convincingly argues that since nature has now been transformed into a part of the human environment it can be seen to no longer exist Ecological problems thus become an inevitable and normal feature of our relationship with nature Hence a post natural environmentalism realistic and liberal while remaining green is advocated In this framework sustainability democracy and liberalism become mutually reinforcing elements rather than conflicting ones Only by combining them can a green society be realised

Education, Nature, and Society Stephen

Gough,2014-11-20 Environmental issues continue to divide opinion sometimes in extreme ways Almost everyone agrees that education has a role to play in ensuring the future of humanity on Earth Some think we should all learn to leave a minimal environmental footprint others argue that education should promote economic growth because only growth can generate the capital needed to develop solutions to environmental problems Advocates on each side often find the views of their opponents simply incredible giving rise to accusations of bad faith or poor science This book explores the foundations of the debate by examining human interrelations with Nature It takes an educational perspective but also draws on evidence from anthropology economics ecology policy sciences and natural history The case presented is that any coherent view of the purposes and potential of education requires a theory of human society in the natural world For such a theory education and more broadly learning must be more than an instrument for the achievement of personal or policy goals Rather it is an integral continuing and necessary component of personal and policy development On this basis a novel approach to curriculum design and implementation is outlined

Technical and Vocational Education and Training

Stephen Gough,2011-11-03 Vocational education is central to the plans of policy makers around the world it underpins the development of the poorest economies and the continued competitiveness of the richest Technical and Vocational Education and Training debates the key issues How far can the same principles be applied to vocational learning in universities colleges schools and the workplace Do the needs of learners and the needs of the economy always coincide Should teachers focus on the delivery of skills or the development of cultures What will determine whether what is learnt corresponds to what is taught Who are the stakeholders in vocational learning and can they all be satisfied at once What does it really mean to say that vocational provision is a kind of investment Drawing on contemporary internationally significant case studies in water education management education and education for sustainable development along with UNESCO s International Centre for Technical and Vocational Education and Training Gough provides a challenging discussion

Sustainability and Security within Liberal Societies

Stephen Gough,Andrew Stables,2011-11-22 Much of the world will be living in broadly liberal societies for the foreseeable future Sustainability and security however defined must therefore be considered in the context of such societies yet there is very little significant literature that does so Indeed much ecologically oriented literature is overtly anti liberal as have been some recent responses to security concerns This book explores the implications for sustainability and security of a range of intellectual perspectives on liberalism such as those offered by John Rawls Robert Nozick Frederick Hayek Ronald Dworkin Michael Oakeshott Amartya Sen and J rgen Habermas

Science and Stewardship to Protect and Sustain Wilderness Values

,2011 **Curriculum and Environmental Education** Alan Reid,2019-11-14 This collection traces the development and findings of curriculum studies of environmental education since the mid 1970s Based on a virtual special issue of the Journal of Curriculum Studies the volume identifies a series of curriculum challenges for and from environmental education These include key questions in curriculum politics planning and

implementation including which educative experiences should a curriculum foster and why what the scope of a worthwhile curriculum should be and how it should be decided organised and reworked why distinctive curricula are provided to different groups of students and how curriculum should best be enacted and evaluated The editor and contributors call for renewed attention to the possibilities for future directions in research in light of previously published work and innovations in scholarship They also offer critical commentary on curriculum critique and crisis in environmental education through new material and previous studies from the journal by addressing three key themes perspectives on curriculum and environment education accounting for curriculum in environmental education and changes in curriculum for environmental education

Higher Education and Sustainable Development Stephen Gough, William Scott, 2008-01-08 The Key Issues in Higher Education series aims to raise both awareness and the standards of debate on the fundamental issues that lie at the very heart of higher education and intends to assist national and international debate Higher Education and Sustainable Development examines whether it is actually possible to mandate plan monitor and evaluate the higher education sector's route to the production of educated innovative independent self determining critical individuals while at the same time achieving a range of wider policy goals on the side This book examines this question in the context of a particular international policy issue sustainable development which is now seen across the globe as a necessary and urgent response to a range of social and environmental issues that threaten the integrity of the biosphere and human well being The book concludes that the idea of sustainable development holds both opportunities and dangers for universities as they pursue their proper role in a free society Illustrated by seven in depth case studies this book considers the complex inter relationships of a free society and sustainable development in the context of higher education and aims to make recommendations for realistic future development It is essential reading for the international higher education research community policy makers university managers students and non Governmental organizations in the development environment and social policy sectors

At the Edge Ann Dale, 2007-10-01 *At the Edge* is a rich and evocative call to action at a time when new ideas are urgently needed Mandatory reading for policy analysts and decision makers in the public private and volunteer sectors it will be equally useful to scholars teachers students and others interested in creating sustainable societies Throughout the world biophysical evidence is mounting that human growth and activity patterns are slowly destroying the earth This ecological deterioration is accompanied by similar social and economic decline with potentially grave consequences for the continued existence of human societies Yet as Ann Dale passionately argues it is not too late to take action Hope lies in sustainable development the fundamental human imperative of the 21st century Sustainable development in Dale's view is the process of reconciling three imperatives the ecological the social and the economic Equitable access to resources in all three spheres is fundamental to the global realization of sustainable development This will not be realized without strong leadership by governments at all levels Ultimately needed is a new framework for governance based on human responsibility and a

recognition of the interconnectedness of human and natural systems Healthy Europe: confidence and uncertainty for young people in contemporary Europe Council of Europe, 2016-03-01 What is it like to be young in a Europe faced with conflict and austerity Volume 3 of the series Perspectives on youth focuses on healthy Europe not just in the narrow sense but in the broader sense of what it is like to be young in a Europe faced with conflict and austerity and what it feels like to be young as transitions become ever more challenging The assumption when planning this issue was that health in this broader sense remains a controversial area within youth policy where the points of departure of policy makers on the one hand and young people themselves on the other are often dramatically different in fact young people tend to interpret the dominating discourse as limiting patronising maybe even offensive The question of health brings the old tensions between protection and participation as well as agency and structure to the forefront Not all questions are addressed in detail but many are touched upon It is intentionally an eclectic mix of contributions to provide a diversity of argumentation and to promote reflection and debate As has been the intention of Perspectives on youth throughout we have sought to solicit and elicit the views of academics policy makers and practitioners presenting theoretical empirical and hypothetical assertions and analysis Perspectives on youth is published by the partnership between the European Union and the Council of Europe in the field of youth in co operation with and with support from four countries Belgium Finland France and Germany Its purpose is to keep the dialogue on key problems of child and youth policies on a solid foundation in terms of content expertise and politics The series aims to act as a forum for information discussion reflection and dialogue on European developments and trends in the field of youth policy youth research and youth work while promoting a policy and youth work practice that is based on knowledge and participatory principles The editorial team of this volume is composed of 12 members representing the supporting countries the Pool of European Youth Researchers PEYR the co ordinator of the youth policy reviews of the Council of Europe the EU Council of Europe youth partnership and the co ordinator of the editorial team *Water security and sustainable development in an uncertain world* Miguel R. Peña, C. T. Dhanya, Richard J. Dawson, Ashvani Gosain, Zulkifli Yusop, 2023-10-05 American Book Publishing Record , 2005 **Handbook of Sustainable Development** Giles Atkinson, Simon Dietz, Eric Neumayer, Matthew Agarwala, 2014-09-26 This timely and important Handbook takes stock of progress made in our understanding of what sustainable development actually is and how it can be measured and achieved

Restoring Natural Capital James Aronson, Suzanne J. Milton, James N. Blignaut, 2012-09-26 How can environmental degradation be stopped How can it be reversed And how can the damage already done be repaired The authors of this volume argue that a two pronged approach is needed reducing demand for ecosystem goods and services and better management of them coupled with an increase in supply through environmental restoration Restoring Natural Capital brings together economists and ecologists theoreticians practitioners policy makers and scientists from the developed and developing worlds to consider the costs and benefits of repairing ecosystem goods and services in natural and socioecological

systems It examines the business and practice of restoring natural capital and seeks to establish common ground between economists and ecologists with respect to the restoration of degraded ecosystems and landscapes and the still broader task of restoring natural capital The book focuses on developing strategies that can achieve the best outcomes in the shortest amount of time as it considers conceptual and theoretical issues from both an economic and ecological perspective examines specific strategies to foster the restoration of natural capital and offers a synthesis and a vision of the way forward Nineteen case studies from around the world illustrate challenges and achievements in setting targets refining approaches to finding and implementing restoration projects and using restoration of natural capital as an economic opportunity Throughout contributors make the case that the restoration of natural capital requires close collaboration among scientists from across disciplines as well as local people and when successfully executed represents a practical realistic and essential tool for achieving lasting sustainable development

Sustainability Is the New Advantage Peter McAteer, 2019-03-23 During the last 150 years we have stressed the oceans warmed the planet and overextended almost every natural resource To create real change will require a generation of leaders and businesses that think and act differently Sustainability Is the New Advantage identifies the skill sets best practices and new ideas needed to teach a new generation to start grow and manage sustainable organizations

Future Sustainable Ecosystems Nathaniel K Newlands, 2016-10-03 Future Sustainable Ecosystems Complexity Risk Uncertainty provides an interdisciplinary integrative overview of environmental problem solving using statistics It shows how statistics can be used to solve diverse environmental and socio economic problems involving food water energy scarcity and climate change risks It synthesizes interdisciplinary theory concepts definitions models and findings involved in complex global sustainability problem solving making it an essential guide and reference It includes real world examples and applications making the book accessible to a broader interdisciplinary readership Discussions include a broad integrated perspective on sustainability integrated risk multi scale changes and impacts taking place within ecosystems worldwide State of the art statistical techniques including Bayesian hierarchical spatio temporal agent based and game theoretic approaches are explored The author then focuses on the real world integration of observational and experimental data and its use within statistical models
