Web mining wisdom Web and Web intelligence **Rev Up Robotics** Jorge Valenzuela (Engineering teacher), 2020 Unlike
other robotics books and curriculum Rev Up Robotics takes a cross curricular approach showing educators how to begin
incorporating robotics in tandem with computational thinking into content area lessons or adapting for electives The book
meets readers where they are and is arranged in three major parts Part 1 covers the basics defining robotics and sharing real
world applications along with how to teach foundational skills for computational thinking and computer science Part 2 shows
robotics in practice within the context of content areas and features lesson plans mapped to academic and technology
standards including the ISTE Standards and the Computer Science Teachers Association Standards Part 3 offers advice on
pedagogy and teaching strategies backed by research from the learning sciences and shares approaches to teaching robotics
using project based learning or as part of after school clubs or robotics competitions Included in the book are programming
considerations including a pathway from working with visual blocks to programming in C and K-8 applicable resources from
leading organizations including Carnegie Mellon LEGO Education littleBits Ozobot VEX Robotics Code.org and NASA The
book also features actionable steps pro tips and resources for getting started improving practice and preparing students for
computational thinking programming core coding concepts and computer science fundamentals The goal of Rev Up Robotics
is to provide an evergreen professional development resource that both teachers and schools can use to discover how to
incorporate computational thinking robotics and computer science into lessons that engage students and activate learning
