in depth analysis of how individual security issues have been incorporated into prevailing scholarly and policy paradigms on national security While security now seems an all encompassing phenomenon one general proposition still holds national interests and the nation state remain central to unlocking security puzzles As normative values intersect with raw power as new threats meet old ones and as new actors challenge established elites making sense out of the complex milieu of security theories actors and issues is a crucial task and is the main accomplishment of this book      **Hacker, Influencer, Faker, Spy** Robert Dover,2022-10-31 Intelligence agencies are reflections of the societies they serve No surprise then that modern spies and the agencies they work for are fixated on the internet and electronic communications These same officials also struggle with notions of privacy appropriateness national boundaries and the problem of disinformation They are citizens of both somewhere and nowhere serving a national public yet confronting spies who operate across borders These adversaries are utilising new technologies that offer a transnational anonymity Meanwhile ordinary people are keen to be protected from threats but equally keen basing their understanding of intelligence on news and popular culture to avoid over reach by authorities believed to have near God like powers This is the new operating environment for spies a heady mix of rapid technological development identity politics plausible deniability uncertainty and distrust of authority Hacker Influencer Faker Spy explores both the challenges spies face from these digital horizons and the challenges citizens face in understanding what spies do and how it impacts on them Robert Dover makes a radical case for overhauling intelligence to capitalise on open source information shrinking the secret state whilst still supporting the functioning of modern governments in the post COVID age      *Cuban Missile Crisis* Jonathan Colman,2016-02-15 October 1962 The Cuban Missile Crisis the confrontation that brought the world closer to nuclear catastrophe than ever before or since Both John F Kennedy and Nikita Khrushchev were determined to avoid nuclear war but events could easily have spiraled out of control with cataclysmic results Drawing on an extensive body of research including primary sources released only in the last few years this work places the crisis in a broader international and chronological context than previously possible Discover how America was responsible for causing the conflict and Cuba s role as an important actor rather than a superpower pawn      **Decision Advantage** Jennifer E. Sims,2022-08-02 In Decision Advantage Jennifer E Sims examines the role of intelligence in international conflict throughout history to show that intelligence has been a measurable buildable and consequential form of power over centuries Diving deep into the history of the 16th Century s Spanish Armada two Civil War battles the hunt for President Lincoln s assassin and key diplomatic crises before the two World Wars Sims develops insights into how competitors have created and used intelligence power to their advantage including winning against otherwise stronger opponents      *Big Data Surveillance and Security Intelligence* David Lyon,David Murakami Wood,2020-12-01 Intelligence gathering is in a state of flux Enabled by massive computing power new modes of communications analysis now touch the lives of citizens around the globe not just those considered suspicious or threatening Big Data Surveillance and Security Intelligence reveals the profound shift to big

data practices that security agencies have made in recent years as the increasing volume of information from social media and other open sources challenges traditional intelligence gathering Working together the Five Eyes intelligence partners Australia Canada New Zealand the United Kingdom and the United States are using new methods of data analysis to identify and pre-empt risks to national security But at what cost to civil liberties human rights and privacy protection In this astute collection leading academics civil society experts and regulators debate the pressing questions raised by security intelligence and surveillance in Canada in the age of big data
